A computação de nuvem oferece inúmeros benefícios, incluindo elasticidade, pagamento pelo uso efetivo dos recursos, infraestrutura de autosserviço e automação baseada em APIs. Ela permite que as organizações tenham DATACENTERS automatizados e paguem somente por aquilo que utilizam. A plataforma utilizada para o desenho da arquitetura é a Amazon Web Services (AWS), que é abordada em detalhes e de forma estruturada. A própria Amazon utiliza a arquitetura AWS para operar um dos maiores varejos online do mundo.

Empresas como Shell, Samsung, NASA, The New York Times, Grupo Pão de Açúcar, Gol Linhas Aéreas e SulAmérica Seguros já desfrutam dos benefícios da computação de nuvem e estabeleceram novas arquiteturas orientadas pela demanda. O livro traz uma abordagem sobre a construção de um DATACENTER utilizando a Arquitetura De Nuvem e a estratégia adotada foi estruturá-lo em três grandes partes; Aspectos Básicos, com conceitos, infraestrutura, precificação, identidade e acesso Serviços de Infraestrutura, sobre os serviços de computação, armazenamento, rede, banco de dados e gerenciamento; e Aspectos Avançados, cobrindo desenho da arquitetura, governança, segurança e continuidade.

This book presents the outcomes of the 3rd IEEE/ACIS International Conference on Big Data, Cloud Computing, Data Science & Engineering (BCD 2018), which was held on July 10–12, 2018 in Kanazawa. The aim of the conference was to bring together researchers and scientists, businesspeople and entrepreneurs, teachers, engineers, computer users, and students to discuss the various fields of computer science, to share their experiences, and to exchange new ideas and information in a meaningful way. All aspects (theory, applications and tools) of computer and information science, the practical challenges encountered along the way, and the solutions adopted to solve them are all explored here. The conference organizers selected the best papers from among those accepted for presentation. The papers were chosen on the basis of review scores submitted by members of the program committee and subsequently underwent further rigorous review. Following this second round of review, 13 of the conference's most promising papers were selected for this Springer (SCI) book. We eagerly await the important contributions that we know these authors will make to the field of computer and information science.
