

Aztec And Maya Myths The Legendary Past

Matt Clayton

Aztec and Maya Myths Karl Taube,1993 The myths of the Aztec and Maya derive from a shared Mesoamerican cultural tradition. This is very much a living tradition, and many of the motifs and gods mentioned in early sources are still evoked in the lore of contemporary Mexico and Guatemala. Professor Taube discusses the different sources for Aztec and Maya myths. The Aztec empire began less than 200 years before the Spanish conquest, and our knowledge of their mythology derives primarily from native colonial documents and manuscripts commissioned by the Spanish. The Maya mythology is far older, and our knowledge of it comes mainly from native manuscripts of the Classic period, over 600 years before the Spanish conquest. Drawing on these sources as well as nineteenth- and twentieth-century excavations and research, including the interpretation of the codices and the decipherment of Maya hieroglyphic writing, the author discusses, among other things, the Popol Vuh myths of the Maya, the flood myth of Northern Yucatan, and the Aztec creation myths.

The Chinese and the Iron Road Gordon Chang, Shelley Fisher Fishkin, 2019-04-30 Essays examining the Chinese worker experience during the construction of America's Transcontinental Railroad. The completion of the transcontinental railroad in May 1869 is usually told as a story of national triumph and a key moment for American Manifest Destiny. The Railroad made it possible to cross the country in a matter of days instead of months, paved the way for new settlers to come out west, and helped speed America's entry onto the world stage as a modern nation that spanned a full continent. It also created vast wealth for its four owners, including the fortune with which Leland Stanford would found Stanford University some two decades later. But while the Transcontinental has often been celebrated in national memory, little attention has been paid to the Chinese workers who made up 90 percent of the workforce on the Western portion of the line. The Railroad could not

have been built without Chinese labor, but the lives of Chinese railroad workers themselves have been little understood and largely invisible. This landmark volume explores the experiences of Chinese railroad workers and their place in cultural memory. *The Chinese and the Iron Road* illuminates more fully than ever before the interconnected economies of China and the US, how immigration across the Pacific changed both nations, the dynamics of the racism the workers encountered, the conditions under which they labored, and their role in shaping both the history of the railroad and the development of the American West. Praise for *The Chinese and the Iron Road* "This timely and essential volume preserves the humanity of the often-ignored and forgotten immigrant worker, while also uncovering just how important Chinese American railroad workers were in the making of America and its place in the world." —Erika Lee, author of *The Making of Asian America* "Gordon H. Chang and Shelley Fisher Fishkin's meticulously researched and beautifully written book fills [a] critical gap in our nation's history. *The Chinese and the Iron Road* brings to life the stories of workers who defied incredible odds and gave their lives to unite these states into a nation." —David Henry Hwang, Tony Award-winning playwright of *The Dance and the Railroad* and *M. Butterfly* "Destined to become the go-to resource about Chinese railroad workers in the American West." —Madeline Hsu, author of *The Good Immigrants: How the Yellow Peril Became the Model Minority* "Deeply researched and richly detailed, *The Chinese and the Iron Road* brings to life the Chinese immigrants whose work was essential to the railroad's construction." —Thomas Bender, author of *A Nation Among Nations: America's Place in World History*

Concepts of Conversion Lars Kirkhusmo Pharo, 2017-12-18 There has not been conducted much research in religious studies and (linguistic) anthropology analysing Protestant missionary linguistic translations. Contemporary Protestant missionary linguists employ grammars, dictionaries, literacy campaigns, and translations of the Bible (in particular the New

Testament) in order to convert local cultures. The North American institutions SIL and Wycliffe Bible Translators (WBT) are one of the greatest scientific-evangelical missionary enterprises in the world. The ultimate objective is to translate the Bible to every language. The author has undertaken systematic research, employing comparative linguistic methodology and field interviews, for a history-of-ideas/religions and epistemologies explication of translated SIL missionary linguistic New Testaments and its premeditated impact upon religions, languages, sociopolitical institutions, and cultures. In addition to taking into account the history of missionary linguistics in America and theological principles of SIL/WBT, the author has examined the intended cultural transformative effects of Bible translations upon cognitive and linguistic systems. A theoretical analytic model of conversion and translation has been put forward for comparative research of religion, ideology, and knowledge systems.

Thales of Miletus Patricia F. O'Grady, 2017-03-02 'What is the basic building block of the universe?' Thales of Miletus was the first to ask this fundamental, yet to be answered, question in the sixth century B.C. This book offers an in-depth account of the answers he gave and of his adventure into many areas of learning: philosophy, science, mathematics and astronomy. Thales proved that the events of nature were comprehensible to man and could be explained without the intervention of mythological beings. Henceforth they became subject to investigation, experiment, questioning and discussion. Presenting for the first time in the English language a comprehensive study of Thales of Miletus, Patricia O'Grady brings Thales out of pre-Socratic shadows into historical illumination and explores why this historical figure has proved to be of lasting significance.

Astronaut Gods of the Maya Erich von Däniken, 2017-05-25 A visual tour of the evidence for ancient astronauts in Mesoamerica • Includes more than 200 full-color photographs from the author's personal archives • Details the astronaut technology--helmets, tanks, hoses, keyboards, rockets--clearly illustrated in stone carvings and statues from Mesoamerican sites such as Palenque, Chichén Itzá, and Teotihuacán in Mexico and Tikal in Guatemala • Explores the similarities of Maya pyramids with those at Kanchipuram in South India Sharing more than 200 never-before-published full-color photographs from his personal archives, bestselling author Erich von Däniken provides clear evidence of ancient alien contact and technology among the archaeological sites of the Maya as well as other ancient cultures, such as the Aztecs and the Hindus. He reveals how the "gods" immortalized in Maya sculptures, carved reliefs, and myth were not supernatural beings but technologically advanced visitors, astronauts who gifted the Maya with their sophisticated understanding of calendar time and cosmology. He explains how, with no explanation for their technologies and origins, the Maya interpreted the visitors as divine and, thus, the "gods" were born. Examining stone carvings and statues from many Mesoamerican sites such as Palenque, Chichén Itzá, and Teotihuacán in Mexico and Tikal in Guatemala, von Däniken reveals the astronaut technology--helmets, tanks, hoses, keyboards, rockets--clearly illustrated in these ancient depictions of the gods. He explores the similarities of Plato's writings with the Chilam Balam books of Mexico and compares "ancient alien" features in myths around the world, paralleling how mercury is mentioned as a fuel ingredient of flying machines in ancient India with the discovery of mercury at Copán, Palenque, and Teotihuacán as well as in the grave of a Chinese emperor and two Egyptian graves on Nabta Playa. Illustrating the similarities of Mayan step pyramids with those of Kanchipuram in South India, the author explains how Mayan pyramids are crowned with a small temple, residence, or landing field of the gods, while the pyramids of South India are topped with a Vimana, a "godly" flying vehicle. Offering visual proof of the ancient world's contact with advanced alien visitors they recorded as gods and teachers, von Däniken also raises the question of the "heavenly" origins of royal families and dynasties in Mesoamerica, Egypt, and beyond, revealing how the Mayan kings of Palenque and the pharaohs of Egypt may be descendants of the "gods."

The Taking and Displaying of Human Body Parts as Trophies by Amerindians Richard J. Chacon, David H. Dye, 2007-08-21 This edited volume mainly focuses on the practice of taking and displaying various body parts as trophies in both North and South America. The editors and contributors (which include Native Peoples from both continents) examine the evidence and causes of Amerindian trophy taking. Additionally, they present objectively and discuss dispassionately the topic of human proclivity toward ritual violence. This book fills the gap in literature on this subject.
