A Mom's Practical Guide to Baby-Led Weaning is written by popular blogger and mother of two, Brittany Dixon ([www.ahealthysliceoflife.com](http://www.ahealthysliceoflife.com)). Prior to starting her blog, Brittany was a certified fitness and weight management consultant, who managed her own health coaching and metabolic testing company before closing it to stay home and raise her two beautiful daughters. This book includes a brief history of the practice of Baby-Led Weaning, outlines benefits both for baby and parents, answers common concerns, discusses when and how to begin, and even includes some recipes to get you started! Baby-led weaning, or BLW, is the practice of allowing babies to feed themselves whole foods from the very beginning. That means babies use their little hands to grasp, mash, and feed themselves whole, natural foods without special preparation. It also means there's no need for you, as a parent, to stock up on hundreds of jars of pureed baby food (or spend hours making your own), or to sit and spoon food into your little one's mouth. BLW does away with lots of the time-consuming parts of baby feeding by allowing your baby to feed him or herself. There are many reasons why parents might decide to try baby-led weaning with their children. There has been quite a bit of research lately that deals with the developmental benefits of BLW but there are also many more practical reasons why parents might be enticed to try BLW. Perhaps they, themselves, were picky eaters and they are hoping to raise children with more adventurous palettes. Maybe they are trying to save money on their family's food budget and they want to avoid having to purchase expensive baby foods. Or maybe they care about obesity issues facing people—particularly children—and want to instill in their children a healthy relationship with food. Any of these reasons are great ones for exploring baby-led weaning with your children. Maybe all of them make sense to you. Or maybe your reasons are entirely different. Whatever the rationale, A Mom's Practical Guide to Baby-Led Weaning is thorough enough to answer your questions and give you the confidence to succeed!

What can parents do to help their youngest children in their task of self-formation? How does the Montessori method of hands-on learning and self-discovery relate to the youngest infants? This authoritative and accessible book answers these and many other questions. Based on Dr. Maria Montessori's instructions for raising infants, its comprehensive exploration of the first three years incorporates the furnishings and tools she created for the care and comfort of babies. From the design of the baby's bedroom to the child-sized kitchen table, from diet and food preparation to clothing and movement, the authors provide guidance for the establishment of a beautiful and serviceable environment for babies and very young children. They introduce concepts and tasks, taking into account children's "sensitive periods" for learning such skills as dressing themselves, food preparation, and toilet training. Brimming with anecdote and encouragement, and written in a clear, engaging style, Montessori from the Start is a practical and useful guide to raising calm, competent, and confident children.

With a little patience, presence, and skill, you can transform nearly any family meal into a baby-friendly food. Who knew a little planning could have the whole family eating together, and better? For thousands of years, humans have thrived without “baby food” (which was invented in the late nineteenth century). Think about it: the human race has made it this far largely on whole food. Only in recent decades have we begun overthinking and over-processing our foods, which has led to chronic dieting, chronic disease, disordered eating, body distrust, and epidemic confusion about the best way to feed ourselves and families. Eating is an innate skill that has been overcomplicated by marketing schemes and a dieting culture. It’s time to leave the dieting culture behind for the whole family. It starts with the baby’s first bite! Aside from the United States, most countries are accepting of babies starting of solids with the foods of the family. With a focus on self-feeding and a baby-led weaning approach, nutritionists and wellness experts Wendy Jo Peterson and Leslie Schilling provide useful advice every parent should have.
