From acclaimed photographer Elinor Carucci, a vivid chronicle of one woman's passage through aging, family, illness, and intimacy. It is a period in life that is universal, at some point, to everyone, yet in our day-to-day and cultural dialogue, nearly invisible. Midlife is a moving and empathetic portrait of an artist at the point in her life when inexorable change is more apparent than ever. Elinor Carucci, whose work has been collected in the previous acclaimed volumes *Closer* (2002, 2009) and *Mother* (2013), continues her immersive and close-up examination of her own life in this volume, portraying this moment in vibrant detail. As one of the most autobiographically rigorous photographers of her generation, Carucci recruits and revisits the same members of her family that we have seen since her work gained prominence two decades ago. Even as we observe telling details--graying hair, the pressures and joys of marriage, episodes of pronounced illness, the evolution of her aging parents' roles as grandparents, her children's increasing independence--we are invited to reflect on the experiences that we all share contending with the challenges of life, love, and change.

Using an interdisciplinary framework, Mia Fischer connects media coverage with state regulation of transgender people to show how, despite their increased visibility in national discourse, dominant representations of trans people as deceptive, deviant, and threatening are used to justify, even normalize, state-sanctioned violence against transgender communities.

While we are aggressively confronting fraud born of the financial crisis,

the reality is that we cannot prosecute our way out of the situation. Instead, we must address it with an equally broad and comprehensive enforcement response. This is the mission of the Financial Fraud Enforcement Task Force.

The suggestion, coming from various sources, appealed to me for the reason that I saw in it an opportunity to give the general public certain information in regard to the prison, based upon my personal observation and experience, that I hoped might result in some beneficial changes in the management of prisons and in the treatment of their inmates."—Eugene Victor Debs, Introduction

The original Bill of Rights, sponsored largely by James Madison, is now about 210 years old. Reinforced by the Fourteenth Amendment, which eventually applied many of its provisions to the states, it has served us well. It is time to re-evaluate our fundamental constitutional rights and to seriously consider their major renovation. This is my central proposal. Are we ready to trust ourselves as individuals with the personal responsibilities that go with rights? When government defines personal moral values, we tend to take less account for not only our own actions but also our own underlying values, for those spiritual yearnings that make us, all unique people, who we are. We tend to lose interest in speaking for ourselves and tend to leave moral judgments to "experts" who get paid to pass judgment on all of us. I discuss a philosophy, often called libertarianism, of extremely restricted government. I present it from the personal perspective of a gay man who grew up in a period of enormous change and migration toward cultural individualism. My argument is intended for everyone, but I provide my own detailed perspectives on many issues. The parallel between draft deferments during the Vietnam era and the gays-in-the-military battle today How close the gay community, as we know it, came to total catastrophe during the early days of AIDS crisis What the "family values" debate is really all about Volunteerism and social obligations, and how both military service and parenting fit into these What "discrimination" is really all about How the "Dont Tell" mentality interferes with political and social debate in many areas Why equal rights for gays is important for everybody A science of personal growth and why libertarianism is good for personal growth

This book tells how South Africa came to lead the world in enshrining sexual equality in our Bill of Rights, which forms part of the Constitution. The achievement, which has been hailed as a model for the rest of the world, did not come about without a long struggle. This was spearheaded by gender activists and movements during the 1980s, whose campaigns on the one hand evoked hostility from the apartheid state and were also dismissed as an irrelevance by conservative factions within the liberation movement. Indeed, the end of apartheid did not automatically guarantee that sexual equality would be realised, and the book explains how in the end this was achieved. The volume draws upon the rich archive of the Gay and Lesbian association and incorporates fascinating first-hand documents from the time as well as essays by participants in the events and later commentators.

Former chief of police in Minneapolis and commander of the Bronx police force Tony Bouza pulls no punches in this blunt, candid assessment of police culture. Emphasizing the gap between the average citizen's perception of police work and the day-to-day reality of life as a cop, Bouza reveals the inner dynamics of a secretive, fraternal society that will do almost anything to protect itself. The strong bonds of loyalty among police both inspire individual acts of heroism in the face of danger but also repress full disclosure of the truth when corruption or abuse of power are suspected, says Bouza. Young rookies are quickly molded by the unspoken rules and the code of silence that govern a cop's professional life, and they soon learn that physical but not moral courage is expected. Bouza evaluates sweeps, roundups, sting operations, the controversial practice of racial profiling, and the politics of law enforcement. He critically examines the excesses, abuses, and corruption of the New York, Los Angeles, and Minneapolis police forces, among others, offering insights into what went wrong in the infamous Louima and Diallo cases. But his most telling criticism is not directed against the police per se but against our society's ruling elites and the middle class, who give police the unmistakable message that the underclass must be kept down and property owners protected at all costs. He charges that the heart of the problem of both crime and police abuse in America is our tacitly accepted class structure separating the privileged from the poor, and along with it the systemic racism that society as a whole is not yet willing to face. Bouza concludes his critique on a positive note with straightforward proposals on how to make the police more ethical and effective. This controversial, eye-opening book by a veteran insider exposes a reality that TV cop shows never portray and raises serious moral questions about class and race.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Johnny Cash is a living icon, one of the defining country musicians of the century and patriarch of a clan that rules as country royalty. He has also been a hard-living firebrand whose air of danger and rebellion made him godfather of the bad boys of today's rock and rap. He has garnered him an immense audience across generations, selling more than fifty million albums and winning ten Grammy awards. Ring of Fire is the first book to explore Cash's life and work through essays by some of the best music journalists—Ralph Gleason, George Vecsey, Richard Goldstein, Alanna Nash, Nick Tosches, Jon Pareles, and Ben Ratliff. Whether dispatched in the heat of Cash's meteoric rise to fame in the '60s or looking back from the vantage point of his recent musical resurgence and phenomenal new albums, these writings reveal the complex soul of an American legend.

In the Federation, efforts to replenish diminished resources and give succor to millions of evacuees are thwarted at every turn. As events undermining the quadrant's attempts to heal itself become increasingly widespread, one man begins to understand what is truly unfolding. Sonek Pran -- teacher, diplomat, and sometime adviser to the Federation President -- perceives a pattern in the seeming randomness. And as each new piece of evidence falls into place, a disturbing picture encompassing half the galaxy begins to take shape...revealing a challenge to the Federation and its allies utterly unlike anything they have faced before.
