As recently as the early 1970s, the news media was one of the most respected institutions in the United States. Yet by the 1990s, this trust had all but evaporated. Why has confidence in the press declined so dramatically over the past 40 years? And has this change shaped the public's political behavior? This book examines waning public trust in the institutional news media within the context of the American political system and looks at how this lack of confidence has altered the ways people acquire political information and form electoral preferences. Jonathan Ladd argues that in the 1950s, '60s, and early '70s, competition in American party politics and the media industry reached historic lows. When competition later intensified in both of these realms, the public's distrust of the institutional media grew, leading the public to resist the mainstream press's information about policy outcomes and turn toward alternative partisan media outlets. As a result, public beliefs and voting behavior are now increasingly shaped by partisan predispositions. Ladd contends that it is not realistic or desirable to suppress party and media competition to the levels of the mid-twentieth century; rather, in the contemporary media environment, new ways to augment the public's knowledgeability and responsiveness must be explored. Drawing on historical evidence, experiments, and public opinion surveys, this book shows that in a world of endless news sources, citizens' trust in institutional media is more important

than ever before.

The ground covered in the following 954 articles is as comprehensive as would be covered by a standard systematic theology. The difference is that the subject matter is divided up into small units and arranged alphabetically for easy reference. Readers with some degree of expertise in these matters will note that this dictionary represents a very broad definition of theology. As a consequence, many topics are discussed which might be expected to be found in other kinds of dictionaries. This dictionary is unabashedly evangelical and just as unabashedly Wesleyan. - Preface.

A Book of Shadows is a book containing religious texts and instructions for magical rituals found within the Neo-

pagan religion of Wicca. The first Book of Shadows was created by Gerald B. Gardner, (an author as well as an amateur archaeologist and anthropologist), in the late 1940's or early 1950's, which he used in his Bricket Wood coven and then in later covens which he founded. The concept was adopted by other traditions. The current Book of Shadows is a compilation of manuscripts found in his museum after his death.

You can be free from the effects of rejection! No one totally escapes rejection. But not everybody has to be damaged by it! Our Father has provided a means for us as His children to be delivered from the painful consequences of rejection.

This collection brings together some of the most influential sociologists of law to confront the challenges of current transnational constitutionalism. It shows the constitution appearing in a new light: no longer as an essential factor of unity and stabilisation but as a potential defence of pluralism and innovation. The first part of the book is devoted to the analysis of the concept of constitution, highlighting the elements that can contribute from a socio-legal perspective, to clarifying the principle meanings attributed to the constitution. The study goes on to analyse some concrete aspects of the functioning of constitutions in contemporary society. In applying Luhmann's General Systems Theory to a comparative analysis of the concept of constitution, the work contributes to a better understanding of this

traditional concept in both its institutionalised and functional aspects. Defining the constitution's contents and functions both at the conceptual level and by taking empirical issues of particular comparative interest into account, this study will be of importance to scholars and students of sociology of law, sociology of politics and comparative public law.

Studies the meaning of such key New Testament words as agape, charisma, and hubris in classical and Hellenistic Greek, the Septuagint, and the papyri Young's Literal Translation of the Bible is, as the name implies, a strictly literal translation of the Hebrew and Greek texts (from the Textus Receptus and Majority Text). Compiled by Robert Young in 1862, he went on to produce a revised version in 1887 based on the Westcott-Hort text which had been completed in 1885. Young died on October 14, 1888, and the publisher released a New Revised Edition in 1898. Young used the present tense in many places where other translations used the past tense- particularly in narratives. The Preface to the Second Edition states: "If a translation gives a present tense when the original gives a past, or a past when it has a present; a perfect for a future, or a future for a perfect; an a for a the, or a the for an a; an imperative for a subjunctive, or a subjunctive for an imperative; a verb for a noun, or a noun for a verb, it is clear that verbal inspiration is as much overlooked as if it had no existence. THE WORD OF GOD IS MADE VOID BY THE TRADITIONS OF

MEN. [Emphasis in original.]” For example, the YLT version of Genesis begins as follows: 1. In the beginning of God’s preparing the heavens and the earth--- 2. The earth hath existed waste and void, and darkness on the face of the deep, and the Spirit of God fluttering on the face of the waters, 3. And God saith, ‘Let light be;’ and light is. 4. And God seeth the light that it is good, and God separateth between the light and the darkness, 5. And God alled to the light ‘Day,’ and to the darkness He hath called ‘Night;’ and there is an evening, and there is a morning---day one. Young's Literal Translation in the 1898 Edition also consistently renders the Hebrew Tetragrammaton (the four Hebrew letters usually transliterated YHWH or JHVH that form a biblical proper name of God) throughout the Old Covenant/Testament as "Jehovah", instead of the traditional practice of "LORD" in small capitals, which was used in editions prior to 1898. Young's usage of English present tense rather than past tense has been supported by scholars ranging from the medieval Jewish rabbi Rashi (who advised, "If you are going to interpret [this passage] in its plain sense, interpret it thus: At the beginning of the creation of heaven and earth, when the earth was (or the earth being) unformed and void . . . God said, ‘Let there be light.’") to Richard Elliott Friedman in his translation of the Five Books in "The Bible with Sources Revealed" (2002). There is a linked Table of

Biblical Hebrew Vocabulary in Context by Miles V. Van Pelt and Gary D. Pratico is a biblical Hebrew language resource designed to reinforce a student's basic vocabulary by reading words that occur fifty times or more in the context of the Hebrew Bible. All 642 of these Hebrew words have been collated into 195 key biblical verses and/or verse fragments to

help students practice and retain their Hebrew vocabulary. In lieu of rote memorization, Biblical Hebrew Vocabulary in Context reinforces essential vocabulary by reading words in the context of the Hebrew Bible. The book includes two primary sections. The first section provides room for students to write their own glosses of the biblical verse and to parse as they feel necessary. An English translation is also provided and any term that appears less than fifty times is glossed. Proper names are identified with gray text. The second section of the book provides the same biblical verses from the first section but with minimal room to write glosses and parse and without an English translation for aid. The end of the book includes a Hebrew-English lexicon of all the words occurring fifty times or more in the Hebrew Bible.

Empathy as epistemically central for our folk psychological understanding of other minds; a rehabilitation of the empathy

thesis in light of contemporary philosophy of mind. In this timely and wide-ranging study, Karsten Stueber argues that empathy is epistemically central for our folk-psychological understanding of other agents—that it is something we cannot do without in order to gain understanding of other minds. Setting his argument in the context of contemporary philosophy of mind and the interdisciplinary debate about the nature of our mindreading abilities, Stueber counters objections raised by some in the philosophy of social science and argues that it is time to rehabilitate the empathy thesis. Empathy, regarded at the beginning of the twentieth century as the fundamental method of gaining knowledge of other minds, has suffered a century of philosophical neglect. Stueber addresses the plausible philosophical misgivings about empathy that have been responsible for its failure to gain widespread philosophical acceptance. Crucial in this context is his defense of the assumption, very much contested in contemporary philosophy of mind, that the notion of rational agency is at the core of folk psychology. Stueber then discusses the contemporary debate between simulation theorists—who defend various forms of the empathy thesis—and theory theorists. In distinguishing between basic and reenactive empathy, he provides a new interpretive framework for the investigation into our mindreading capacities. Finally, he considers epistemic objections to empathy raised by the philosophy of social science that have been insufficiently discussed in contemporary debates. Empathy theorists, Stueber writes, should be prepared to admit that, although empathy can be regarded as the central default mode for understanding other agents, there are certain limitations in its ability to make sense of other agents; and there are supplemental theoretical strategies available to overcome these limitations.

There is an epidemic of insecurity in society today. Many

people suffer from an unhealthy need for affirmation. They are not capable of feeling good about themselves. For some the quest for approval becomes an actual addiction, as they seek self-worth from the outside world because they can't find it within themselves. Joyce Meyer understands the need for seeking approval from others to overcome feelings of rejection and low self-esteem. The good news, she says, is that there is a cure. God provides all the security anyone needs. Her goal is to provide a pathway toward freedom from the approval addiction.

Through flashbacks, recollections, and short narratives, this story powerfully communicates an individual's experience of exile from an emotional and psychological perspective while at the same time linking the individual experience to the collective one."--BOOK JACKET.
