The greatest haunted house story ever written, the inspiration for a 10-part Netflix series directed by Mike Flanagan and starring Michiel Huisman, Carla Gugino, and Timothy Hutton First published in 1959, Shirley Jackson's The Haunting of Hill House has been hailed as a perfect work of unnerving terror. It is the story of four seekers who arrive at a notoriously unfriendly pile called Hill House: Dr. Montague, an occult scholar looking for solid evidence of a "haunting"; Theodora, his lighthearted assistant; Eleanor, a friendless, fragile young woman well acquainted with poltergeists; and Luke, the future heir of Hill House. At first, their stay seems destined to be merely a spooky encounter with inexplicable

phenomena. But Hill House is gathering its powers—and soon it will choose one of them to make its own. In *Critique of Black Reason* eminent critic Achille Mbembe offers a capacious genealogy of the category of Blackness—from the Atlantic slave trade to the present—to critically reevaluate history, racism, and the future of humanity. Mbembe teases out the intellectual consequences of the reality that Europe is no longer the world's center of gravity while mapping the relations among colonialism, slavery, and contemporary financial and extractive capital. Tracing the conjunction of Blackness with the biological fiction of race, he theorizes Black reason as the collection of discourses and practices that equated Blackness with the nonhuman in order to uphold forms of oppression. Mbembe powerfully argues that this equation of Blackness with the nonhuman will serve as the template for all new forms of exclusion. With *Critique of Black Reason*, Mbembe offers nothing less than a map of the world as it has been constituted through colonialism and racial thinking while providing the first glimpses of a more just future.

We have all used forms of manipulation in our lifetime. For example, a child manipulating a parent by crying incessantly when that parent balks at the idea of buying them the latest toy, crying to the point where that parent just eventually wears down and gives in or altering our appearance with the intention of getting a specific reaction or getting others to perceive us in a certain way. We all have engaged in the art of manipulation. Manipulating others is a great way to get what you want. It can be used in a positive sense or in negative one and that choice rests solely on the individual who is engaging in the manipulation. There are many techniques that are used to manipulate others and in his book entitled “*The Art of Manipulation*” author and serial entrepreneur Omar Johnson examines the secrets of how to use manipulation to get anybody to do what you want. You will also learn how to determine if someone is trying to manipulate you.

Who owns the street? Interwar Berliners faced this question with great hope yet devastating consequences. In Germany, the First World War and 1918 Revolution transformed the city streets into the most important media for politics and commerce. There, partisans and entrepreneurs fought for the attention of crowds with posters, illuminated advertisements, parades, traffic jams, and violence. The Nazi Party relied on how people already experienced the city to stage aggressive political theater, including the April Boycott and Kristallnacht. Observers in Germany and abroad looked to Berlin's streets to predict the future. They saw dazzling window displays that radiated optimism. They also witnessed crime waves, antisemitic rioting, and failed policing that pointed toward societal collapse. Recognizing the power of urban space, officials pursued increasingly radical policies to 'revitalize' the city, culminating in Albert Speer's plan to eradicate the heart of Berlin and build Germania.

From the bestselling author of *The Ascent of Money* and *The Square and the Tower* “A dazzling history of Western ideas.” —*The Economist* “Mr. Ferguson tells his story with characteristic verve and an eye for the felicitous phrase.” —*Wall Street Journal* “[W]ritten with vitality and verve . . . a tour de force.” —*Boston Globe* Western civilization’s rise to global dominance is the single most important historical phenomenon of the past five centuries. How did the West overtake its Eastern rivals? And has the zenith of Western power now passed? Acclaimed historian Niall Ferguson argues that beginning in the fifteenth century, the West developed six powerful new concepts, or “killer applications”—competition, science, the rule of law, modern medicine, consumerism, and the work ethic—that the Rest lacked, allowing it to surge past all other competitors. Yet now, Ferguson shows how the Rest have downloaded the killer apps the West once monopolized, while the West has literally lost faith in itself. Chronicling the rise and fall of empires alongside clashes (and fusions) of civilizations, *Civilization: The*

West and the Rest recasts world history with force and wit. Boldly argued and teeming with memorable characters, this is Ferguson at his very best.

An award-winning columnist and journalist describes how businesses that structure their teams into functional departments, or "silos," actually hinder work, cripple innovation, restrict thinking and force normally smart people to ignore risks and opportunities. --

Iran has one of the world's highest rates of drug addiction: estimated to be between 2 and 7 percent of the entire population. This makes the questions that this book asks all the more salient: what is the place of illegal substances in the politics of modern Iran? How have drugs affected the formation of the Iranian state and its power dynamics? And how have governmental attempts at controlling and regulating illicit drugs affected drug consumption and addiction? By answering these questions, Maziyar Ghiabi suggests that the Islamic Republic of Iran's image as an inherently conservative state is not only misplaced and inaccurate, but in part a myth. In order to dispel this myth, he skilfully combines ethnographic narratives from drug users, vivid field observations from 'under the bridge', with archival material from the pre- and post-revolutionary era, statistics on drug arrests and interviews with public officials. Final report of the National Commission on Terrorist Attacks upon the United States.

In the pantheon of air power spokesmen, Giulio Douhet holds center stage. His writings, more often cited than perhaps actually read, appear as excerpts and aphorisms in the writings of numerous other air power spokesmen, advocates-and critics. Though a highly controversial figure, the very controversy that surrounds him offers to us a testimonial of the value and depth of his work, and the need for airmen today to become familiar with his thought. The progressive development of air power to the point where, today, it is more correct to refer to aerospace power has not outdated the notions of Douhet in the slightest In fact, in many ways, the kinds of technological capabilities that we enjoy as a global air power provider attest to the breadth of his vision. Douhet, together with Hugh "Boom" Trenchard of Great Britain and William "Billy" Mitchell of the United States, is justly recognized as one of the three great spokesmen of the early air power era. This reprint is offered

in the spirit of continuing the dialogue that Douhet himself so perceptively began with the first edition of this book, published in 1921. Readers may well find much that they disagree with in this book, but also much that is of enduring value. The vital necessity of Douhet's central vision—that command of the air is all important in modern warfare—has been proven throughout the history of wars in this century, from the fighting over the Somme to the air war over Kuwait and Iraq.

This “shocking, tense” and sharply satirical novel has become a modern classic, and was the basis for two film adaptations (*San Francisco Chronicle*). “Crammed with suspense.” —*Chicago Tribune* “Condon is wickedly skillful.” —*Time*

Tender, moving, heartfelt and warm (and sporadically scandalous and outrageous too), these are the private messages between people in love. Yet they are also correspondence between the rulers of nations. From Henry VIII's lovelorn notes to Anne Boleyn and George IV's impassioned notes to his secret wife, to Queen Victoria's tender letters to Prince Albert and Edward VIII's extraordinary correspondence with Wallis Simpson - these letters depict romantic love from its budding passion to the comfort and understanding of a long union (and occasionally beyond to resentment and recrimination), all set against the background of great affairs of state, wars and the strictures of royal duty. Here is a chance to glimpse behind the pomp and ceremony, the carefully curated images of royal splendour and decorum, to see the passions, hopes, jealousies and loneliness of kings and queens throughout history. By turns tender, moving, heartfelt and warm (and sporadically scandalous and outrageous too), these are the private messages between people in love. Yet they are also correspondence between the rulers of nations, whose actions (and passions) changed the course of history, for good and bad. This morning I received your dear, dear letter of the 21st. How happy do you make me with your love! Oh! my Angel Albert, I am quite enchanted with it! I do not deserve such love! Never, never did I think I could be loved so much. Queen Victoria to Prince Albert (28 November 1839)

It has, improbably, been called uncommonly lucid, even riveting by The New York Times, and it was a finalist for the 2004 National Book Awards nonfiction honor. It is a literally chilling read, especially in its minute-by-minute description of the events of the morning of 9/11 inside the Twin Towers. It is The 9/11 Commission Report, which was, before its publication, perhaps one of the most anticipated government reports of all time, and has been since an unlikely bestseller. The official statement by the National Commission on Terrorist Attacks Upon the United States-which was instituted in late 2002 and chaired by former New Jersey Governor Thomas Kean-it details what went wrong on that day (such as intelligence failures), what went right (the heroic response of emergency services and self-organizing civilians), and how to avert similar future attacks. Highlighting evidence from the day, from airport surveillance footage of the terrorists to phone calls from the doomed flights, and offering details that have otherwise gone unheard, this is an astonishing firsthand document of contemporary history. While controversial in parts-it has been criticized for failing to include testimony from key individuals, and it completely omits any mention of the mysterious collapse of WTC 7-it is nevertheless an essential record of one of the most transformational events of modern times.

Bringing the worlds of neuroscience and social psychology together, this book examines the ethical problems involved in carrying

out the required experiments on humans, the limitations of animal models, and the frightening implications of such research. It also explores the history of thought-control and shows how it exists around us.

What happens when media and politics become forms of entertainment? As our world begins to look more and more like Orwell's 1984, Neil's Postman's essential guide to the modern media is more relevant than ever. "It's unlikely that Trump has ever read *Amusing Ourselves to Death*, but his ascent would not have surprised Postman." -CNN Originally published in 1985, Neil Postman's groundbreaking polemic about the corrosive effects of television on our politics and public discourse has been hailed as a twenty-first-century book published in the twentieth century. Now, with television joined by more sophisticated electronic media—from the Internet to cell phones to DVDs—it has taken on even greater significance. *Amusing Ourselves to Death* is a prophetic look at what happens when politics, journalism, education, and even religion become subject to the demands of entertainment. It is also a blueprint for regaining control of our media, so that they can serve our highest goals. "A brilliant, powerful, and important book. This is an indictment that Postman has laid down and, so far as I can see, an irrefutable one."  
—Jonathan Yardley, *The Washington Post Book World*

In this volume of 15 articles, contributors from a wide range of disciplines present their analyses of Disney movies and Disney music, which are mainstays of popular culture. The power of the Disney brand has heightened the need for academics to question whether Disney's films and music function as a tool of the Western elite that shapes the views of those less empowered. Given its global reach, how the Walt Disney Company handles the role of race, gender, and sexuality in social structural inequality merits serious reflection according to a number of the articles in the volume. On the other hand, other authors argue that Disney productions can help individuals cope with difficult situations or embrace progressive thinking. The different approaches to the assessment of Disney films as cultural artifacts also vary according to the theoretical perspectives guiding the interpretation of both overt and latent symbolic meaning in the movies. The authors of the 15 articles encourage readers to engage with the material, showcasing a variety of views about the good, the bad, and the best way forward.

Across the Middle East, the Mediterranean and the Nile Delta, awe-inspiring, monstrous ruins are scattered across the landscape - vast palaces, temples, fortresses, shattered statues of ancient gods, carvings praising the eternal power of long-forgotten dynasties. These ruins - the remainder of thousands of years of human civilization - are both inspirational in their grandeur, and terrible in that their once teeming centres of population were all ultimately destroyed and abandoned. In this major book, Richard Miles recreates these extraordinary cities, ranging from the Euphrates to the Roman Empire, to understand the roots of human civilization. His challenge is to make us understand that the cities which define culture, religion and economic success and which are humanity's greatest invention, have always had a cruel edge to them, building systems that have provided both amazing opportunities and back-breaking hardship. This exhilarating book is both a pleasure to read and a challenge to us all to think about our past - and about the present.

In its comprehensive analysis of a wide range of primary and secondary sources in both Chinese and Western languages, this authoritative work stands as the definitive study of the theory, implementation and legacy of the Chinese Communist Party's thought-remolding campaign. This decades-long campaign involved the extraction of confessions from millions of Chinese citizens suspected of heterodoxy or disobedience to party dictates, along with their subjection to various forms of "re-education" and indoctrination. Hu Ping's carefully structured overview provides a valuable insider's perspective, and supersedes the previous landmark study on this vastly interesting topic.

Who was the original circus ringmaster? When did the first teddy bear make an appearance? Who first produced champagne, and who invented the typewriter? Where and when were traffic lights first used? Everyone knows that Neil Armstrong was the first man on the moon and that George Washington was the first U.S. president, but what about all those other pioneers, originators, and even the occasional guinea pig, who have been lost in the footnotes of history? This a fascinating collection of those lesser-known innovators who deserve their place among the list of "famous firsts." It will probably come as no surprise that the first ever restaurateur was a Parisian; his name was Monsieur Boulanger and he originally served up soups which he called restaurants (restoratives) to his clientele. But who knew that the first circus ringmaster was a celebrated cavalryman called Philip Astley who developed his horse-riding act into a grand spectacle that established a blueprint for the circus we know today? More than 100 firsts are uncovered, including the first heart transplant, rollercoaster, soap opera, Christmas card, person to turn down an Oscar, TV chef, crossword, and much more.

Why would someone write a book on Mind Control? Because as much as we try to elevate ourselves above being human animals we are, in fact, animals. We are subject to the wants and desires of any being with a genome and vertebrae. To rise above that is an admirable and a task we should take on as a worthy spiritual endeavor. But to deny that we are, truly, animals is to lie to ourselves. We must deal with people who may not be so enlightened advanced as we are. They may desire what we have and be secretly filled with envy and contempt. The worst event is to have these suspicions fulfilled and then be pulled down into the politics of man. Do we deny that it's happening and hope others will be touched by our honesty and good will enough to change? Or do we drop our highest spiritual ideals and play their game? I would like to suggest a radically different strategy. Take the game of manipulation and Mind Control and make it a part of your spirituality.
