First published in 1937. The Book of Songs is a collection of ancient Chinese songs, dating from 800 to 600 B.C. Until this was published in 1937 it had not been translated into English since the middle of nineteenth century, when sinology was still in its infancy. For the first time the original meaning of 290 out of the 305 songs is given, use being made of the advances in the study of old Chinese. The result is not merely a clear picture of early Chinese life, but also the restoration to its proper place in world literature of one of the finest collection of traditional songs.

At last—there is a truly effective and enjoyable way to learn Chinese characters! This book helps students to learn and remember both the meanings and the pronunciations of over 800 characters. This otherwise daunting task is made easier by the use of techniques based on the psychology of learning and memory. Key principles include the use of visual imagery, the visualization of short "stories," and the systematic building up of more complicated characters from basic building blocks. Although Learning Chinese Characters is primarily a book for serious learners of Mandarin Chinese, it can be used by anyone with an interest in Chinese characters, without any prior knowledge of Chinese. It can be used alongside (or after, or even before) a course in the Chinese language. All characters are simplified (as in mainland China) but traditional characters are also given, when available. Key features: Specially designed pictures and stories are used in a structured way to make the learning process more enjoyable and effective, reducing the need for rote learning to the absolute minimum. The emphasis throughout is on learning and remembering the meanings and pronunciations of the characters. Tips are also included on learning techniques and how to avoid common problems. Characters are introduced in a logical sequence, which also gives priority to learning the most common characters first. Modern simplified characters are used, with pronunciations given in pinyin. Key information is given for each character, including radical, stroke-count, traditional form, compounds, and guidance on writing the character. This is a practical guide with a clear, concise and appealing layout, and it is well-indexed with easy look-up methods. The 800 Chinese characters and 1,033 compounds specified for the original HSK Level A proficiency test are covered.

Suitable for college and high school students and those learning on their own, this fully illustrated coursebook provides comprehensive instruction in the history and practical techniques of Chinese calligraphy. No previous knowledge of the language is required to follow the text or complete the lessons. The work covers three major areas: 1) descriptions of Chinese characters and their components, including stroke types, layout patterns, and indications of sound and meaning; 2) basic brush techniques; and 3) the social, cultural, historical, and philosophical underpinnings of Chinese calligraphy—all of which are crucial to understanding and appreciating this art form. Students practice brush writing as they progress from tracing to copying to free-hand writing. Model characters are marked to indicate meaning and stroke order, and well-known model phrases are shown in various script types, allowing students to practice different calligraphic styles. Beginners will find the author's advice on how to avoid common pitfalls in writing brush strokes invaluable. Chinese Writing and Calligraphy will be welcomed by both students and instructors in need of an accessible text on learning the fundamentals of the art of writing Chinese characters.

Having mastered the basic vocabulary and elementary grammar, a student generally learns to use a language that he wants to achieve mainly by practice in the sentence patterns, which are the living substance of the language. There are basic sentence patterns and special sentence patterns in Chinese. Most of the special sentence patterns involve word group patterns, adjective patterns, noun patterns, preposition patterns, etc. However, in English most sentence patterns are verb patterns. A large part of Chinese special sentence patterns are related to the predicate of the sentence, in which nouns, adjectives, word groups, etc play a part. Word groups are important elements forming the predicate of the sentence. Nouns and adjectives alone can also function as the predicate of the sentence. However, phrases (similar to Chinese word groups) as well as nouns and adjectives alone cannot function as the predicate of the sentence in English. In this book, six Chinese basic sentence patterns and twelve Chinese special sentence patterns are introduced, which cover all the most important and most commonly-used Chinese sentence patterns. This book will minutely illustrate them one by one with charts. They are classified in accordance with their functions in the sentence in a systematical way, along with necessary comparison with English sentence patterns and translation. When you have got a good command of the structures and usage of the Chinese sentence patterns introduced in this book, you are able to write or to speak standard Chinese more readily and fluently.

Learning Chinese can be frustrating and difficult, partly because it's very different from European languages. Following a teacher, textbook or language course is not enough. They show you the characters, words and grammar you need to become proficient in Chinese, but they don't teach you how to learn them! Regardless of what program you're in (if any), you need to take responsibility for your own learning. If you don't, you will miss many important things that aren't included in the course you're taking. If you study on your own, you need to be even more aware of what you need to do, what you're doing at the moment and the difference

between them. Here are some of the questions I have asked and have since been asked many times by students: How do I learn characters efficiently? How do I get the most out of my course or teacher? Which are the best learning tools and resources? How can I become fluent in Mandarin? How can I improve my pronunciation? How do I learn successfully on my own? How can I motivate myself to study more? How can I fit learning Chinese into a busy schedule? The answers I've found to these questions and many others form the core of this book. It took eight years of learning, researching, teaching and writing to figure these things out. Not everybody has the time to do that! I can't go back in time and help myself learn in a better way, but I can help you! This book is meant for normal students and independent language learners alike. While it covers all major areas of learning, you won't learn Chinese just by reading this book. It's like when someone on TV teaches you how to cook: you won't get to eat the delicious dish just by watching the program; you have to do the cooking yourself. That's true for this book as well. When you apply what you learn, it will boost your learning, making every hour you spend count for more, but you still have to do the learning yourself. This is what a few readers have said about the book: "The book had me nodding at a heap of things I'd learnt the hard way, wishing I knew them when I started, as well as highlighting areas that I'm currently missing in my study." - Geoff van der Meer, VP engineering "This publication is like a bible for anyone serious about Chinese proficiency. It's easy for anyone to read and written with scientific precision." - Zachary Danz, foreign teacher, children's theatre artist About me I started learning Chinese when I was 23 (that's more than eight years ago now) and have since studied in many different situations, including serious immersion programs abroad, high-intensity programs in Sweden, online courses, as well as on the side while working or studying other things. I have also successfully used my Chinese in a graduate program for teaching Chinese as a second language, taught entirely in Chinese mostly for native speakers (the Graduate Institute for Teaching Chinese as a Second Language at National Taiwan Normal University). All these parts have contributed to my website, Hacking Chinese, where I write regularly about how to learn Mandarin.
