This pioneering handbook proposes an approach to pluralism that is relational, principled, and non-relativistic, going beyond banal calls for mere "tolerance." The growing religious diversity within societies around the world presents both challenges and opportunities. A degree of competition between deeply held religious/worldview perspectives is natural and inevitable, yet at the same time the world urgently needs engagement and partnership across lines of difference. None of the world's most pressing problems can be solved by any single actor, and as such it is not a question of if but when you partner with an individual or institution that does not think, act, or believe as you do. The authors argue that religious literacy—defined as a dynamic combination of competencies and skills, continuously refined through real-world cross-cultural engagement—is vital to building societies and states of neighborly solidarity and civic fairness. Through examination, reflection, and case studies across multiple faith traditions and professional fields, this handbook equips scholars and students, as well as policymakers and practitioners, to assess, analyze, and act collaboratively in a world of deep diversity.

Jonathan Cohn's *The Ten Year War* is the definitive account of the battle over Obamacare, based on interviews with sources who were in the room, from one of the nation's foremost healthcare journalists. The Affordable Care Act, better known as

“Obamacare,” was the most sweeping and consequential piece of legislation of the last half century. It has touched nearly every American in one way or another, for better or worse, and become the defining political fight of our time. In *The Ten Year War*, veteran journalist Jonathan Cohn offers the compelling, authoritative history of how the law came to be, why it looks like it does, and what it’s meant for average Americans. Drawn from hundreds of hours of interviews, plus private diaries, emails and memos, *The Ten Year War* takes readers to Capitol Hill and to town hall meetings, inside the West Wing and, eventually, into Trump Tower, as the nation's most powerful leaders try to reconcile pragmatism and idealism, self-interest and the public good, and ultimately two very different visions for what the country should look like. At the heart of the book is the decades-old argument over what’s wrong with American health care and how to fix it. But the battle over healthcare was always about more than policy. *The Ten Year War* offers a deeper examination of how our governing institutions, the media and the two parties have evolved, and the dysfunction those changes have left in their wake. The trial of Cultural Revolution leaders, including Mao's widow and her Gang of Four, was the signal event in China's post-Mao transition. In its wake, Chinese socialism emerged from the rubble of the Cultural Revolution to create the China that we know today. This spectacular show trial was a curious example of transitional justice, marking a break from the trauma of the past, a shift to the present era of reform, and a blueprint for building a better future. In this groundbreaking reconstruction of the most famous

trial in Chinese history, Alex Cook shows how the event laid the cornerstone for a new model of socialist justice; at the same time, a comparison of official political and legal sources with works of popular literature reveals the conflicted cultural dimensions of this justice. The result, Cook argues, saved Chinese socialism as ruling ideology, but at the cost of its revolutionary soul.

The last decade has been one of dramatic progress in the field of Natural Language Processing (NLP). This hitherto largely academic discipline has found itself at the center of an information revolution ushered in by the Internet age, as demand for human-computer communication and information access has exploded. Emerging applications in computer-assisted information production and dissemination, automated understanding of news, understanding of spoken language, and processing of foreign languages have given impetus to research that resulted in a new generation of robust tools, systems, and commercial products. Well-positioned government research funding, particularly in the U. S. , has helped to advance the state-of-the-art at an unprecedented pace, in no small measure thanks to the rigorous 1 evaluations. This volume focuses on the use of Natural Language Processing in Information Retrieval (IR), an area of science and technology that deals with cataloging, categorization, classification, and search of large amounts of information, particularly in textual form. An outcome of an information retrieval process is usually a set of documents containing information on a given topic, and may consist of newspaper-like articles, memos,

reports of any kind, entire books, as well as annotated image and sound files. Since we assume that the information is primarily encoded as text, IR is also a natural language processing problem: in order to decide if a document is relevant to a given information need, one needs to be able to understand its content.

The fourth book in the best selling Space Marine Battles series featuring the Space Wolves It is M32, a thousand years after the Horus Heresy. The Scouring is over and the Imperium at the height of its post-Crusade power. When Magnus the Red is tracked down to Gangava Prime, the Space Wolves hasten to engage the daemon primarch. Even as Great Wolf Harek Ironhelm closes on his ancient enemy, the Fang on the Space Wolves home world is besieged by a massive force of Thousand Sons. A desperate battle ensues as the skeleton forces of Wolf Lord Asvald Greylock attempt to hold back the attacking hosts before the last of his meagre defences gives in. Though a single Scout ship survives to summon Great Wolf Harek Ironhelm back to Fenris, none of the defenders truly realise the full scale the horror that awaits them nor what the Battle for the Fang will cost them all.

Critical theory and popular wisdom are rife with images of surveillance as an intrusive, repressive practice often suggestively attributed to eastern powers and opposed to western liberalism. Hollywood-dominated global media has long promulgated a geopoliticized east-west axis of freedom vs. control. This book focuses on Asian and Asia-based films and cinematic traditions obscured by lopsided western hegemonic discourse and—more specifically—probes these films’ treatments of a phenomenon that western film often portrays with neo-orientalist hysteria. Exploring recent and historical movies made in post-social and anti-Communist societies such as China, Hong Kong, Taiwan, Vietnam and South Korea, the book picks up on the political and economic concerns implicitly underlying Sinophobic and anti-Communist Asian images in Hollywood films while also considering how these societies and states depict the issues of centralization, militarization and technological innovation so often figured as distinctive of the difference between eastern despotism and western liberalism.

Bishop move in together with a foster family, and it seems their lives may finally be normal again. But while exploring little known Pandora's Cave, a freak earthquake traps them deep underground. In the cave they witness an alliance between a mysterious businessman and a group of terrifying demons that promises to plunge our world into darkness and death. The good news? The kids have video proof of the entire event. The bad news? The video may still be in the demon-infested cave, and nobody believes their story. **READ WITH CAUTION!**

After half a century apart, in service to the Deathwatch and the Chapter, Space Wolves Ingvar and Gunnlaugr are reunited. Sent to defend an important shrine world against the plague-ridden Death Guard, the Grey Hunters clash with the pious Sisters of Battle, who see the Space Wolves as little better than the enemy they fight. As enemies close in around them and treachery is revealed, Gunnlaugr and his warriors must hold the defenders together - even as hidden tensions threaten to tear the pack apart.

Meet Chris and Elliott. Both are hard working American students in high school. Both live normal lives like everyone else. Ya, right. After being accepted into one of the most prized private schools in Japan the two find themselves involved in an adventure that will rock the rest of their lives. Not only are the two not your average students, they are both exceptional martial artists with powers passed down for centuries, powers that both shock and baffle their exchange family's daughter, Yui. Add a little humor, a pinch of romance and a butt load of martial arts action and you've got one of the greatest martial arts epics of all time.

Effective treatment for HIV and AIDS came in 1996. For sufferers in the developed world, this marked a true watershed moment: the end of the death sentence. But for many in the developing world, including in Southeast Asia, these new treatments remained far out of reach.

In his early thirties, following the loss of his partner to an AIDS-related illness, Chris Beyrer wrote the first edition of *War in the Blood*. Three decades later, having served as president of the International AIDS Society, he believes we have arrived at an extraordinary milestone. For the first time, a patient has been demonstrably cured of HIV, new vaccine trials in Thailand have shown great promise, and the PrEP programme genuinely works. So why are over half of the estimated 38.8 million people living with HIV still not on treatment? *War in the Blood* is a labour of love, both a celebratory account of Southeast Asia and the story of our failure to protect those most vulnerable the world over – gay men, adolescent girls, sex workers, drug users, and transgender women. Beyrer offers an impassioned plea for our communities and governments – and our own hearts and minds – to stop denying the realities of sex, sexuality, and gender, and to take affirmative action.

a novice who had bitterly attacked China from the campaign trail. Almost as soon as he entered office, Trump brought to a boil the long-simmering rivalry between the two countries, while also striking up a “friendship” with Chinese president Xi Jinping — whose manipulations of his American counterpart would undermine the White House’s already disjointed response to the historic challenge of a rising China. All the while, Trump’s own officials fought to steer U.S. policy from within. By the time the COVID-19 pandemic erupted in Wuhan, Trump’s love-hate relationship with Xi had sparked a trade war, while Xi’s aggression had pushed the world to the brink of a new Cold War. But their quarrel had also forced a long-overdue reckoning within the United States over China’s audacious foreign-influence operations, horrific human rights abuses, and creeping digital despotism. Ironically, this awakening was one of the biggest foreign-policy victories of Trump’s fractious term in office. ?Filled with shocking revelations drawn from Josh Rogin’s unparalleled access to top U.S. officials from the White House and deep within the country’s foreign policy machine, Chaos Under Heaven reveals an administration at war with itself during perhaps our most urgent hour. Konowa's destiny is to stand against the looming threat of the Shadow Monarch, whose destructive ambitions have called down an alien power from the stars and riven the land with all manner of ancient evils. The same Shadow Monarch whose tainted mark he bears... His quest leads Konowa deep into the desert wastes: the burning lands to which the original Iron Elves were banished. There he and his current companions must face trials beyond their imagining, to learn how to defeat the Shadow Monarch for all time.

In this book Henry A. Giroux passionately argues that education and critical pedagogy are needed now more than ever to combat injustices in our society caused by fake news, toxic masculinity, racism, consumerism and white nationalism. At the heart of the book is the idea that pedagogy has the power to create narratives of desire, values, identity, and agency at time when these narratives are being manipulated to promote right wing populism and emerging global fascist politics. The book expands on the notion of the plague as not only a medical crisis but also a crisis of politics, ethics, education, and democracy itself. The chapters cover a range topics beginning with historical perspectives on fascism and moving on to issues of social atomization, depoliticization, neoliberal pedagogy, the scourge of staggering inequality, populism, and pandemic pedagogy. The book concludes with a call for educators to make education central to politics, develop a discourse of critique and possibility, reclaim the

vision of a radical democracy, and embrace their role as powerful agents of change. Brings social and cultural anthropologists into dialogue with historical sociology and illustrates the continued potential of the concept of civilization for all participants. The concept of civilization has a long but checkered history in anthropology, and anthropological materials have been of great importance for the development of civilizational analysis in historical sociology. Anthropology and Civilizational Analysis brings these diverse fields together and explores a wide range of topics pertaining to civilization, from classical theories to contemporary rhetorical discourses, including detailed case studies of concrete practices documented through archival and ethnographic research. While many scholars and the wider public still think of civilization in simplistic terms, viewing it in terms of Enlightenment notions of progress and evolution to higher stages, others have pluralized the term only to create essentialized units which are only tenuously linked to historical processes. In this book contributors use dynamic approaches, including those rooted in the seminal writings of Émile Durkheim and Marcel Mauss, opening up the dimension of civilization as an important complement to other key terms such as society and culture in social science and historical analysis.

Wildlife and nature films are a hugely popular entertainment genre: networks such as Animal Planet and Discovery are stars in the cable television universe, viewers flock to IMAX theaters to see jaw-dropping footage from the wild, and

the venerable BBC still scores triumphs with series such as Planet Earth. As cinematic technology brings ever more breathtaking images to the screen, and as our direct contact with nature diminishes, an ever-expanding audience craves the indirect experience of wild nature that these films provide. But this success has a dark side, as Chris Palmer reveals in his authoritative and engrossing report on the wildlife film business. A veteran producer and film educator, Palmer looks past the headlines about TV host Steve Irwin's death by stingray and filmmaker Timothy Treadwell falling prey to his beloved grizzlies, to uncover a more pervasive and troubling trend toward sensationalism, extreme risk-taking, and even abuse in wildlife films. He tracks the roots of this trend to the early days of the genre, and he profiles a new breed of skilled, ethical filmmakers whose work enlightens as well as entertains, and who represent the future that Palmer envisions for the industry he loves.

"Bones jutted from the sand at angles--not odd angles, though, for that would suggest that there were ways bones could protrude that made sense--and the eyes of those still living stared and saw nothing. Amidst a scene of carnage on a desert battlefield blanketed in metallic snow, Major Konowa Swift Dragon sees his future, and it is one drenched in shadow and blood. Never mind that he has won a grand victory for the Calahrian Empire. He came here in search of his lost regiment of elves, while the Imperial Prince came looking for the treasures of a mystical library, and both ventures have failed. But Konowa knows, as do the Iron Elves--both living and dead--that another, far more important battle now looms before them. The campaign in the desert was only the latest obstacle on the twisted, darkening path leading inexorably to the Hyntaland, and the final confrontation with the dreaded Shadow Monarch"--Publisher description.

The dean of Columbia University's medical school explains why our bodies are out of sync with today's environment and how we can correct this to save our health. Over the past 200 years, human life-expectancy has approximately doubled. Yet we face soaring worldwide rates of obesity, diabetes, high blood pressure, mental illness, heart disease, and stroke. In his fascinating new book, Dr. Lee Goldman presents a radical explanation: The key protective traits that once ensured our species' survival are now the leading global causes of illness and death. Our capacity to store food, for example, lures us into overeating, and a clotting system designed to protect us from bleeding to death now directly contributes to heart attacks and strokes. A deeply compelling narrative that puts a new spin on evolutionary biology, *Too Much of a Good Thing* also provides a roadmap for getting back in sync with the modern world.

The Encyclopedia covers the genre from 1920 to 1994. The genre, however, can be very confusing: films often have several titles, and many of the stars have more than one pseudonym. In an effort to clarify some of the confusion, the authors have included all the information available to them on almost 3,300 films. Each entry includes a listing of the production company, the cast and crew, distributors, running times, reviews with star ratings whenever possible, and alternate film titles. A list of film series and one of the stars' pseudonyms, in addition to a 7,900 name index, are also included. Illustrated.

This book examines the Chinese Communist Party's attempts to improve China's image around the world, thereby increasing its "soft power." This soft, attractive form of power is crucial if China is to avoid provoking an international backlash against its growing military and economic might. The volume focuses on the period since Xi Jinping came to power in 2012, and is global in scope, examining the impact of Chinese policies from Hong Kong and Taiwan

to Africa and South America. The book explains debates over soft power within China and delves into case studies of important policy areas for China's global image campaign, such as film, news media and the Confucius Institutes. The most comprehensive work of its kind, the volume presents a picture of a Chinese leadership that has access to vast material resources and growing global influence but often struggles to convert these resources into genuine international affection. With a foreword by Joseph Nye, *Soft Power With Chinese Characteristics* will be invaluable to students and scholars of Chinese politics and Chinese media, as well as international relations and world politics more generally.

Raids and sieges; trench warfare and air campaigns; guerrilla warfare, naval engagements, and colonial wars—*American Battles & Campaigns* covers every major campaign and battle fought in North America or by United States' forces overseas, from the Pequot War of 1634 to the recent conflicts in Afghanistan and Iraq. Arranged chronologically, *American Battles & Campaigns: A Chronicle, from 1622-Present* includes hundreds of entries, ranging from the 1770 Boston Massacre through the Alamo (1836) and the Philippine-American War (1899–1902), to Chateau-Thierry (1918), Midway (1942) and Hue (1969). Major battles, such as Yorktown, Gettysburg, Pearl Harbor, and D-Day, are illustrated with full-color annotated 3-dimensional maps and detailed text explaining the course of the engagement. Stuffed with black and white and color photographs, battle maps, paintings and other artwork, *American Battles & Campaigns* contains expert accounts and analysis from thirty leading military historians.
