Introductory Statistics is designed for the one-semester, introduction to statistics course and is geared toward students majoring in fields other than math or engineering. This text assumes students have been exposed to intermediate algebra, and it focuses on the applications of statistical knowledge rather than the theory behind it. The foundation of this textbook is Collaborative Statistics, by Barbara Illowsky and Susan Dean. Additional topics, examples, and ample opportunities for practice have been added to each chapter. The development choices for this textbook were made with the guidance of many faculty members who are deeply involved in teaching this course. These choices led to innovations in art, terminology, and practical applications, all with a goal of increasing relevance and accessibility for students. We strove to make the discipline meaningful, so that students can draw from it a working knowledge that will enrich their future studies and help them make sense of the world around them.

"Finnie Walsh will forever remain in my daily thoughts, not only because of the shocking circumstances of his absurd demise, but because he managed to misunderstand what was truly important even though he was right about almost everything else." So begins Steven Galloway's critically acclaimed first novel. The story is told by Paul Woodward, Finnie's best friend and the only good child in a long line of delinquents. Hockey is one of the few things they have in common: Finnie's family is rich and snobbish, while Paul's father works the night shift at the local mill owned by Finnie's father. One fateful day, the boys noisily play hockey in the Woodward's driveway, keeping Paul's father awake. This seemingly innocent activity triggers a shattering chain of events. "Finnie Walsh" has been compared to the work of John Irving, but Galloway's voice, most particularly his unforgettable portrait of the title character, is uniquely his own.

Asbestos, explosives, and chemical waste are only a few of the hazards involved in the meticulous work of destroying a giant ship. When new labor laws and environmental standards came to Europe, the ship-breaking industry moved to places like Chittagong on the coast of Bangladesh—places where the lives of workers seem expendable, and the environment is someone else's problem. follows the demise of the Asian Tiger, a ship destroyed at one of the twenty ship-breaking yards along the beaches of Chittagong. BBC Bangladesh correspondent Roland Buerk takes us through the process—from beaching the vessel to its final dissemination, from wealthy shipyard owners to poverty-stricken ship cutters, and from the economic benefits for Bangladesh to the pollution of its once pristine beaches.

This bibliography draws together references to Canadian materials on testing and evaluation of student achievement published between 1976 and 1984. It also includes some earlier works of significance. The entries are arranged alphabetically under topical subheadings and have been annotated wherever possible.

Learn how 14 schools became exemplary using excellent planning processes and action steps for total school improvement. Building on their work in Harbors of Hope, the authors reveal seven lessons for success based on the correlates of effective schools. Equip yourself with viable, practical school improvement strategies that are supported by a solid research base. Crow Lake is that rare find, a first novel so quietly assured, so emotionally pitch perfect, you know from the opening page that this is the real thing—a literary experience in which to lose yourself, by an author of immense talent. Here is a gorgeous, slow-burning story set in the rural “badlands” of northern Ontario, where heartbreak and hardship are mirrored in the landscape. For the farming Pye family, life is a Greek tragedy where the sins of the fathers are visited on the sons, and terrible events occur—offstage. Centerstage are the Morrisons, whose tragedy looks more immediate if less brutal, but is, in reality, insidious and divisive. Orphaned young, Kate Morrison was her older brother Matt's protegee, her fascination for pond life fed by his passionate interest in the natural world. Now a zoologist, she can identify organisms under a microscope but seems blind to the state of her own emotional life. And she thinks she's outgrown her siblings—Luke, Matt, and Bo—who were once her entire world. In this universal drama of family love and misunderstandings, of resentments harbored and driven underground, Lawson ratchets up the tension with heartbreaking humor and consummate control, continually overturning one's expectations right to the very end. Tragic, funny, unforgettable, Crow Lake is a quiet tour de force that will catapult Mary Lawson to the forefront of fiction writers today. Praise for Crow Lake “A finely crafted debut . . . conveys an astonishing intensity of emotion, almost Proustian in its sense of loss and regret.”—Kirkus Reviews (starred review) “The assurance with which Mary Lawson handles both reflection and violence makes her a writer to read and watch. . . . [Crow Lake] has a resonance at once witty and poignant.”—The New York Times Book Review “Crow Lake is the kind of book that keeps you reading well past midnight; you grieve when it's over. Then you start pressing it on friends.”—The Washington Post Book World “A touching meditation on the power of loyalty and loss, on the ways in which we pay our debts and settle old scores, and on what it means to love, to accept, to succeed—and to negotiate fate's obstacle courses.”—People “Lawson's tight focus on the emotional and moral effects of a drastic turn of events on a small human group has its closest contemporary analogue in the novels of Ian McEwan.”—The Toronto Star

Garnet Havelock was always a bit different from other guys. He never quite fit in and he was okay with that. Now, in his final year of high school, he's just marking time, waiting to get out into the real world. When a mysterious girl transfers to his school Garnet thinks he might have found the girl of his dreams, if only he could get her to talk to him. As Garnet struggles to win over one girl, another girl is trying to get his attention – unfortunately she lived over 150 years ago. Garnet becomes fascinated by her history and that of the black community she belonged to. As he draws closer to the truth, he uncovers a horrifying chapter in his town's history, and discovers the ways in which deep-seated prejudices and persecution from the past can still reverberate in the present.

At three years old, Garnet Raven is taken from his home on an Ojibway reserve and placed in a series of foster homes. In his mid-teens, he escapes at the first available opportunity only to find himself cast adrift on the streets of the big city, trying to avoid its bleak underbelly. By age twenty, Garnet is in jail. While there, he receives an unexpected letter from his long-forgotten native family, and the sudden communication from his past spurs him to return to the reserve following his release from jail. Deciding to stay awhile, Garnet's life is changed completely when he is initiated into the ways of the Ojibway - both ancient and modern - by Keeper, a friend of his grandfather, and one of the last founts of their people's history. Garnet comes to discover his sense of place - and of self.

Three narratives, set in the fifth, fourteenth, and twentieth centuries, all revolving around an ancient text and each with a love story at its centre, are the elements of this brilliantly ingenious novel, a follow-up to the international bestseller *An Instance of the Fingerpost*. Now Ian Pears returns with a greatly anticipated novel, so expertly imagined and perfectly constructed the author himself describes it as “a complexity.” The centuries are the 5th (the final days of the Roman Empire); the 14th (the years of the Plague — the Black Death); and the 20th (World War II). The setting for each is the same — Provence — and each has at its heart a love story. The narratives intertwine seamlessly, and what joins them thematically is an ancient text — “The Dream of Scipio” — a work of neo-Platonism that poses timeless philosophical questions. What is the obligation of the individual in a society under siege? What is the role of learning when civilization itself is threatened, whether by acts of man or nature? Does virtue lie more in engagement or in neutrality? “Power without wisdom is tyranny; wisdom without power is pointless,” warns one of Pears’s characters. *The Dream of Scipio* is a bona fide novel of ideas, a dazzling feat of storytelling, fiction for our times.

Despite the enormous resources and thought that has been put into improving our educational systems, there has been little success in reducing the gap between Aboriginal and non-Aboriginal educational success. This book reviews the actual situation in terms of Métis, Inuit, and First Nations peoples in Canada using the most recent data available. It explores the issues historically, assesses the costs to both Aboriginal peoples and the country, reviews alternative approaches to solving the problems, and includes innovative analysis of the causes of these problems. This book presents a “philosophy of science education” as a research field as well as its value for curriculum, instruction and teacher pedagogy. It seeks to re-think science education as an educational endeavour by examining why past reform efforts have been only partially successful, including why the fundamental goal of achieving scientific literacy after several “reform waves” has proven to be so elusive. The identity of such a philosophy is first defined in relation to the fields of philosophy, philosophy of science, and philosophy of education. It argues that educational theory can support teacher’s pedagogical content knowledge and that history, philosophy and sociology of science should inform and influence pedagogy. Some case studies are provided which examine the nature of science and the nature of language to illustrate why and how a philosophy of science education contributes to science education reform. It seeks to contribute in general to the improvement of curriculum design and science teacher education. The perspective to be taken on board is that to teach science is to have a philosophical frame of mind—about the subject, about education, about one’s personal teacher identity.
