Treehouses have always been a symbol of imagination and adventure, but

despite the traditional stereotype, treehouses are not just for children and children's stories. Well built and in the right spot, they can add real value to your home and lifestyle. Beloved for centuries as ramshackle palaces of backyard escape and fun, the modern-day treehouse has evolved from more traditional structures, in the process morphing and expanding its agenda to capture the heart and soul of a new breed of acolytes. Versatile and endlessly adapting, it gives us a unique opportunity for creative expression and an individualistic challenge. It enables us to build on 'unbuildable' plots, create unusual business models and even use it as a form for art installations. Using high-end interiors, landscape and lifestyle photography and styling in the specially commissioned images (photographed in all seasons and weather conditions), the book includes 35 treehouses with different budgets and styles, from the rustic that seem to disappear into the foliage to the futuristic made out of contemporary materials. Embracing a world-wide approach, the seeds of inspiration in this book come from far and wide: from contemporary minimalist treehouses, recycled urban structures in backyards, bespoke Welsh hideaways and glass walls in the African wilderness to cabins perched on trees in the scented lavender fields of southern Italy. Creativity and vision definitely anchor each and every one of them firmly to the ground. The accompanying narrative for each of these projects will give information about the location, the owners and their inspiration as well as style notes. Word count: 25,000

In daylong hackathons, design thinking seems deceptively easy. On the surface, it involves a set of seemingly simple activities such as gathering data, identifying insights, generating ideas, prototyping, and experimentation. But practiced at a superficial level, even great design tools don't go deep enough to create the shifts in mindset and skillset that are required to achieve transformational impact. Going deep with design requires more than changing the activities of innovators; it involves creating the conditions that shape who they become. Individuals become design thinkers by experiencing design. Drawing on decades of researching design thinking and teaching it to people not trained in design, Jeanne Liedtka, Karen Hold, and Jessica Eldridge offer a guide for how to create these deep experiences at each stage of the design thinking journey, whether for an individual, a team, or an organization. For each experience phase, they specify the mindset shifts and competencies that need to be achieved, describe how different personality types experience different kinds of journeys, and show how to fully leverage the diversity of teams. Experiencing Design explores both the science and practicalities of design and includes two assessment instruments for individual and organizational development. Ultimately, innovators need to be someone new to create something new. This book shows you how to use design thinking to make this happen. John Harris shows the reader how to build their own safe and comfortable treehouse to specifications that his business The TreeHouse Company is famous for. Including detailed plans and step-by-step advice, each section will also have ideas on alternative approaches to personalize the look of your house.
