About the Book: Ajay Wahi began his career with a bluechip software corporate called NIIT in 1985. His first job was in Sales and Product Management. He moved on to International Marketing across the USA and Asia. Subsequently, he gained considerable technical experience in the Systems Integration division, where his mandate was to build high value, long term business relationships with top Indian corporates. With an intensive 360° exposure to business, Ajay was ready to don the mantle of a CEO. He was hired to turn around Mantas (subsidiary of a US company). His efforts were successful, and also won him recognition, resulting in his being requested by the management of a UK company (Electrobug) to repeat his success story by turning around their subsidiary in India. At present, Ajay heads FastBooking India which is an Indian subsidiary of a French IT company. Unlike at the earlier enterprises, where he had legacies to counter, here he had the wonderful opportunity to build a company from scratch. He was responsible for everything: Recruiting his leadership team and other employees; Visioning and Strategizing for the future; Finalizing roles and goals at all levels; Evolving policies to create a motivated staff and a vibrant company; Putting in place internationally acclaimed processes; Analyzing and brainstorming to increase employee productivity through a mix of automation, training etc. At each company where he has worked as CEO, Ajay has brilliantly demonstrated his ability to create success with fewer people than he actually required. He has developed and retained a productive, proactive and energized team, enabling large benefits to be shared amongst relatively few

people. All this was possible just because Ajay was always identifying the best and star employees and tasking them with senior and challenging roles. In the process, he created success for both the performers and the company itself. It is these learnings he is sharing in this book. Ajay lives in Delhi with his wife Monica, a finance professional, and their two children, Varun and Vanshika. You may also like to read Ajay's other best seller: and the award for BEST SME of the year goes to About The Book PREFACE Having worked for the last two and a half decades and that too in different roles and capacities, I had the unique privilege of interacting with employees and staff across all levels. The interactions were of all types: brainstorming with them, guiding them, cracking cases with them, appraising them etc. And after every interaction, my mind would always try to figure out that of all the employees I interacted with today, who were the ones who exhibited something different, something positive, something energetic, something out-of-the-box etc./p> Being a CEO, it was natural to find out the star employees as the company would grow only if I could identify the BEST/BETTER of the so many employees I have. Identify them and then task them with senior and /or challenging opportunities. They would grow and that would be there WIN. My company would go thus grow too and that's my WIN. The experience I have thus gathered over the years in observing thousands of employees and then choosing the better from the lot is what I now wanted to share with everyone. Both the employer and employee. While it's really the duty of the employee to exhibit to the management how they stand out compared to others, at the same time, the employers could also share the learnings from this book so that each of their employee stands out. And if so many stand out, well, that's the winning and competitive advantage for the company! So, dear employee, read this book, implement the thoughts, start to look different from the crowd. The faster you look different, the faster you would get noticed and thus get promoted! Good luck and catch me at ajaywahi@rediffmail.com for any guidance and advise you may need. Ajay Wahi April, 2011

Do You Know What It Takes to Be a High Potential in Your Organization? Being seen as a high-potential leader is essential to getting promoted and reaching your organization's upper echelons, but most companies keep their top-talent list a closely guarded secret. And the assessment process they use to decide who is and isn't a future leader is an even greater mystery. The High Potential's Advantage takes you behind the scenes and shows how you can get on, and stay on, your company's fast track. Leadership development experts Jay Conger and Allan Church draw upon decades of research and experience--designing high-potential programs for hundreds of large well-known global organizations and assessing and coaching thousands of talented leaders--to answer the critical questions asked by ambitious individuals like you: What will it take for me to advance in this organization? What does my boss look for when deciding whether I'm a high potential? Once I'm on the list, then what? Can I fall off it and, if so, what do I do? Revealing the key differentiators--five critical "X factors"--that set people apart across companies of all types, Conger and Church show what you need to do to achieve and maintain top-talent status. You'll find detailed advice for cultivating and practicing each X factor, with numerous and rich examples from those on the verge of their first promotion to those only a step away from the C-suite. The High Potential's Advantage also shows you how to gain insight into and excel at the specific process your company uses to identify and develop high potentials--and how to determine which unique capabilities your company values the most. The High Potential's Advantage is the essential guide to becoming a leader in your organization.

Have you ever noticed that there are certain people who seem to get ahead just a bit faster than everyone else? You know, the types who always seem to be a bit ahead of the curve, to get noticed a bit more, and to achieve their goals a bit more quickly than the rest of the pack? And have you ever noticed how much this small edge can matter, and the outsized impact it can have on the trajectory of their careers? Twenty-four year old entrepreneur Brian Wong is one of these people, having graduated from college by age 18, having raised \$24 million in venture capital to start his own company before he

turned 25, and having grown that company into a global mobile advertising giant in just 4 years. His secret? The Cheat Code. Wong believes that most people -- even creative people -- have a tendency to follow a script; to do things the way others do them simply because that way works. But therein lies the secret at the heart of the Cheat Code: anyone can easily shortcut his or her way to success, simply by going slightly off script; by doing things just a little differently from everyone else. Here, Wong unlocks the power of the Cheat Code through 71 bite-sized and virtually effortless short-cuts to get a leg up on the competition, garner attention for ourselves and our ideas, and accelerate our success. For example: Cheat #7: Don't Ask – Announce Cheat #16: Know Your Superpower! Cheat #32: Make Boldness Your Genius Cheat #47: Know Who's the Boss Cheat #49: Get a Trademark Haircut Cheat #51: Use Exclamation Points Cheat #55: Focus on What Won't Change Cheat #71: Imagine, What If? No matter where you aspire to go in your life or career, THE CHEAT CODE will help get you there - faster.

Because many people want more attention, in their jobs as well as in their private lives. Unwanted solitude and social isolation affect many people of all ages, from the employee in a secluded office to the single person in a home office to the retiree without a family. This sounds absurd in an age of unimagined communication possibilities. The Internet can also only be recommended as a tool to a limited extent, because lonely people in particular can very well lose themselves here. In addition, lack of attention is the No. 1 career killer. But the solution to the problem starts with everyone themselves: Being open, approaching others, working on one's own communication skills, positive thinking and motivation help not least to improve one's own effect on other people and to break through the sometimes seemingly never-ending downward spiral of lack of contact, social isolation and depression. This applies both professionally and privately. This book shows you how to do that. We give you the best possible help on the topics of career, finance, management, personnel work and life assistance. For this purpose, we gather in each book the best experts in their field as authors - detailed biographies in the book - , who give a comprehensive overview of the topic and additionally offer you success planner workbooks in printed form. Our guidebooks are aimed primarily at beginners. Readers who are looking for more in-depth information can get it for free as an add-on with individual content in German and English as desired. The Jungle is a 1906 novel written by the American journalist and novelist Upton Sinclair (1878–1968). Sinclair wrote the novel to portray the lives of immigrants in the United States in Chicago and similar industrialized cities. Many readers were most concerned with his exposure of health violations and unsanitary practices in the American meatpacking industry during the early 20th century, based on an investigation he did for a socialist newspaper. The book depicts working class poverty, the lack of social supports, harsh and unpleasant living and working conditions, and a hopelessness among many workers. These elements are contrasted with the deeply rooted corruption of people in power. A review by the writer Jack London called it, "the Uncle Tom's Cabin of wage slavery." Sinclair was considered a muckraker, or journalist who exposed corruption in government and business. He first published the novel in serial form in 1905 in the Socialist newspaper, Appeal to Reason, between February 25, 1905, and November 4, 1905. In 1904, Sinclair had spent seven weeks gathering information while working incognito in the meatpacking plants of the Chicago stockyards for the newspaper. It was published as a book on February 26, 1906 by Doubleday and in a subscribers' edition.

Read the Wall Street Journal Bestseller for "cultivating intense focus" for fast, powerful performance results for achieving success and true meaning in one's professional life (Adam Grant, author of Give and Take). Deep work is the ability to focus without distraction on a cognitively demanding task. It's a skill that allows you to quickly master complicated information and produce better results in less time. Deep Work will make you better at what you do and provide the sense of true fulfillment that comes from craftsmanship. In short, deep work is like a super power in our increasingly competitive twenty-first century economy. And yet, most people have lost the ability to go deep-spending their days instead in a frantic blur of e-mail and social media, not even realizing there's a better way. In Deep Work, author and professor Cal Newport flips the narrative on impact in a connected age. Instead of arguing distraction is bad, he instead celebrates the

power of its opposite. Dividing this book into two parts, he first makes the case that in almost any profession, cultivating a deep work ethic will produce massive benefits. He then presents a rigorous training regimen, presented as a series of four "rules," for transforming your mind and habits to support this skill. 1. Work Deeply 2. Embrace Boredom 3. Quit Social Media 4. Drain the Shallows A mix of cultural criticism and actionable advice, Deep Work takes the reader on a journey through memorable stories-from Carl Jung building a stone tower in the woods to focus his mind, to a social media pioneer buying a round-trip business class ticket to Tokyo to write a book free from distraction in the air-and no-nonsense advice, such as the claim that most serious professionals should quit social media and that you should practice being bored. Deep Work is an indispensable guide to anyone seeking focused success in a distracted world.
