"A collection of ten short stories that all take place in the same day about kids walking home from school"--

The Chicago Honey Bear cheerleaders, in their iconic white boots, cheered and danced their way across Soldier Field right into the hearts of Chicagoans and Bears fans throughout the world for nine NFL seasons. Fans watched these talented, vivacious, young women help support the team through one of the best decades of Bears football, leading up to the 1986 Super Bowl XX championship. But while celebrating the Super Bowl XX victory, the Honey Bears found out they would never take the field again. The abrupt decision by Bears management sent shock waves throughout the Bears nation and the entire National Football League. Legendary NFL co-founder and owner of the Chicago Bears, George "Papa Bear" Halas, wanted nothing more than to have cheerleaders on the sidelines at Soldier Field in Chicago; and an amazing staff was quickly put together to make his dream a reality. So why were the Honey Bears sent packing after one of the most successful seasons in the Chicago Bear's history? "Missing from the Sidelines" poses that question, along with many more: * Why were the Honey Bears disbanded? Was it the Playboy scandal? Was it fraternization between players and cheerleaders? * Were the Honey Bears a distraction to the players on the field? * Was the disbandment of the Honey Bears really just a "business decision?" * Is there a Honey Bear curse and will it ever be lifted? Written and compiled by two former Honey Bears, "Missing from the Sidelines" opens the door to the behind-the-scenes world of the Honey Bears through their own personal stories. Including an exclusive new interview with Coach Mike Ditka, stories from the Bear's notorious super fans, and over 400 Honey Bear photos, "Missing from the Sidelines" is a must-read for any Chicago Bear's fan!

With full captions explaining how the species hunts and feeds, rears its cubs and migrates, Bears is a brilliant examination in 150 outstanding color photographs of this fascinating animal. There are eight species of bears that roam the world today; from the polar bears of the Arctic, the grizzlies of Yellowstone, and the black bears that prowl America's eastern woodlands, to the giant panda, the sun bear of Asia, and the Andean bear of South America. In this beautifully photographed book, you'll discover how bears survive in the cold winter climates - they eat a massive amount of food so they can live off body fat during the winter when food is scarce. How do bears hunt? They are not the bloodthirsty predators that are often portrayed in cartoons and movies, they actually eat more plants than animals. Bears features a variety of bears from around the world, including: The Florida black bear, Himalayan black bear, Grizzly bear, Kodiak bear, Atlas bear, Polar bear and many more. It is an introduction to an animal that has fascinated and terrified people throughout history.

Richard L. Proenneke--a modern-day Henry David Thoreau--built a cabin in Twin Lakes, Alaska, during the spring of 1968, sparking thirty years of personal growth in which he spent the majority of his time strengthening his relationship with the wilderness around him. Following in the footsteps of One Man's Wilderness, a classic book compiling some of the mountain man's journals, More Readings from One Man's Wilderness chronicles Proenneke's experiences with animals, the elements, park visitors, and observations he made while hiking in Lake Clark National Park and Preserve. A master woodcraftsman, a mechanical genius, a tireless hiker with a keen eye, and a journalist, Proenneke's life at Twin Lakes has inspired thousands of readers for decades. Editor John Branson--a longtime friend of Proenneke's and a park historian--ensures that Proenneke's journals from 1974-1980 are kept entirely intact. His colloquial writing is not changed or altered, but Branson's footnotes make his world more approachable by providing a background for names and places that may have otherwise been unknown. Any reader with a love for conservation and true-life wilderness narratives will undoubtedly admire and relish Proenneke's tales of living in the wild. 'Highly recommended' Financial Times Today we know of only a single planet that hosts life: the Earth. But across a Universe of at least 100 billion possibly habitable worlds, surely our planet isn't the only one that, like the porridge Goldilocks sought, is just right for life? Astrobiologists search the galaxy for conditions that are suitable for life to exist, focusing on similar worlds located at the perfect distance from their Sun, within the aptly named 'Goldilocks Zone'. Such a place might have liquid water on its surface, and may therefore support a thriving biosphere. What might life look like on other worlds? It is possible to make best-guesses using facts rooted in science, and by studying 'extremophiles' – organisms such as the near-indestructible water bears, which can survive in the harshest conditions that Earth, and even space, can offer. *Goldilocks and the Water Bears* is a tale of the origins and evolution of life, and the quest to find it on other planets, on moons, in other galaxies, and throughout the Universe.

Presents a history of the Chicago Bears, from the team's inception to the present day.

"A beautiful deep-winter story, full of magic and monsters and the sharp edges of growing up."—Naomi Novik, bestselling author of *Uprooted* Winter lasts most of the year at the edge of the Russian wilderness, and in the long nights, Vasilisa and her siblings love to gather by the fire to listen to their nurse's fairy tales. Above all, Vasya loves the story of Frost, the blue-eyed winter demon. Wise Russians fear him, for he claims unwary souls, and they honor the spirits that protect their homes from evil. Then Vasya's widowed father brings home a new wife from Moscow. Fiercely devout, Vasya's stepmother forbids her family from honoring their household spirits, but Vasya fears what this may bring. And indeed, misfortune begins to stalk the village. But Vasya's stepmother only grows harsher, determined to remake the village to her liking and to groom her rebellious stepdaughter for marriage or a convent. As the village's defenses weaken and evil from the forest creeps nearer, Vasilisa must call upon dangerous gifts she has long concealed—to protect her family from a threat sprung to life from her nurse's most frightening tales. Bear's Super Shape Search

This lush book of photography represents National Geographic's Photo Ark, a major cross-platform initiative and lifelong project by photographer Joel Sartore to make portraits of the world's animals—especially those that are endangered. His powerful message, conveyed with humor, compassion, and art— to know these animals is to save them. Sartore intends to photograph every animal in captivity in the world. He is circling the globe, visiting zoos and wildlife rescue centers to create studio portraits of 12,000 species, with an emphasis on those facing extinction. He has photographed more than 6,000 already and now, thanks to a multi-year partnership with National Geographic, he may reach his goal. This book showcases his animal portraits— from tiny to mammoth, from the Florida grasshopper sparrow to the greater one-horned rhinoceros. Paired with the eloquent prose of veteran wildlife writer Douglas Chadwick, this book presents a thought-provoking argument for saving all the species of our planet.
