"I don't want you to rehabilitate me," Philip Roth said to his only authorized biographer, Blake Bailey. "Just make me interesting." Granted complete independence and access, Bailey spent almost ten years poring over Roth's personal archive, interviewing his friends, lovers, and colleagues, and listening to Roth's own breathtakingly candid confessions. Cynthia Ozick, in her front-page rave for the *New York Times Book Review*, described Bailey's monumental biography as "a narrative masterwork ... As in a novel, what is seen at first to be casual chance is revealed at last to be a steady and powerfully demanding drive. ... under Bailey's strong light what remains on the page is one writer's life as it was lived, and almost as it was felt." Though Roth is generally considered an autobiographical novelist—his alter-egos include not only the Roth-like writer Nathan Zuckerman, but also a recurring character named Philip Roth—relatively little is known about the actual life on which so vast an oeuvre was supposedly based. Bailey reveals a man who, by design, led a highly compartmentalized life: a tireless champion of dissident writers behind the Iron Curtain on the one hand, Roth was also the Mickey Sabbath-like roué who pursued scandalous love affairs and aspired "[t]o affront and affront and affront till there was no one on earth unaffronted"—the man who was pilloried by his second wife, the actress Claire Bloom, in her 1996 memoir, *Leaving a Doll's House*. Towering above it all was Roth's achievement: thirty-one books that give us "the truest picture we have of the way we live now," as the poet Mark Strand put it in his remarks for Roth's Gold Medal at the 2001 American Academy of Arts and Letters ceremonial. Tracing Roth's path from realism to farce to metafiction to the tragic masterpieces of the American Trilogy, Bailey explores Roth's engagement with nearly every aspect of postwar American culture.

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress.

Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

By 1979, we knew all that we know now about the science of climate change - what was happening, why it was happening, and how to stop it. Over the next ten years, we had the very real opportunity to stop it. Obviously, we failed. Nathaniel Rich's groundbreaking account of that failure - and how tantalizingly close we came to signing binding treaties that would have saved us all before the fossil fuels industry and politicians committed to anti-scientific denialism - is already a journalistic blockbuster, a full issue of the New York Times Magazine that has earned favorable comparisons to Rachel Carson's Silent Spring and John Hersey's Hiroshima. Rich has become an instant, in-demand expert and speaker. A major movie deal is already in place. It is the story, perhaps, that can shift the conversation. In the book Losing Earth, Rich is able to provide more of the context for what did - and didn't - happen in the 1980s and, more important, is able to carry the story fully into the present day and wrestle with what those past failures mean for us in 2019. It is not just an agonizing revelation of historical missed opportunities, but a clear-eyed and eloquent assessment of how we got to now, and what we can and must do before it's truly too late.

This is not a book about Religion. Using the real birthday of Jesus, kinda, plus fractals and other patterns found in nature, I have created several new zodiac charts to help locate, and describe, the evil ones among us. I gave these charts such names as 'Heaven to Hell', 'Child, Teen, Adult', 'Leaping Lizards', and my favorite, 'The Wheel of Good & Evil'. With certain specific patterns, I was able to locate such horrible people as 'The Professional Victims', 'People of Rage', and 'The Laughing Idiots'. A "Health Chart" is included that might help you feel better and look younger for years longer. It uses the separation of white light through a prism, or the power of 3, to let you know who on the zodiac wheel might help in restoring you back to life. If hell is other people, then heaven can be other people too. Names were giving to all 12 zodiac zones on the wheel, and most of the evil subzones too. These names describe the basic essence of those individuals who were born inside those zones. Some of the names giving include:

#1 NEW YORK TIMES BESTSELLER • The compelling, inspiring, and comically sublime story of one man's coming-of-age, set during the twilight of apartheid and the tumultuous days of freedom that followed NAMED ONE OF PASTE'S BEST MEMOIRS OF THE DECADE • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY Michiko Kakutani, New York Times • USA Today • San Francisco Chronicle • NPR • Esquire • Newsday • Booklist Trevor Noah's unlikely path from apartheid South Africa to the desk of The Daily Show began with a criminal act: his birth. Trevor was born to a white Swiss father and a black Xhosa mother at a time when such a union was punishable by five years in prison. Living proof of his parents' indiscretion, Trevor was kept mostly indoors for the earliest years of his life, bound by the extreme and often absurd measures his mother took to hide him from a government that could, at any moment, steal him away. Finally liberated by the end of South Africa's tyrannical white rule, Trevor and his mother set forth on a grand adventure, living openly and freely and embracing the opportunities won by a centuries-long struggle. Born a Crime is the story of a mischievous young boy who grows into a restless young man as he struggles to find himself in a world where he was never supposed to exist. It is also the story of that young man's relationship with his fearless, rebellious, and fervently religious mother—his teammate, a woman determined to save her son from the cycle of poverty, violence, and abuse that would ultimately threaten her own life. The stories collected here are by turns hilarious, dramatic, and deeply affecting. Whether subsisting on caterpillars for dinner during hard times, being thrown from a moving car during an attempted kidnapping, or just trying to survive the life-and-death pitfalls of dating in high school, Trevor illuminates his curious world with an incisive wit and unflinching honesty. His stories weave together to form a moving and searingly funny portrait of a boy making his way through a damaged world in a dangerous time, armed only with a keen sense of humor and a mother's unconventional, unconditional love. Praise for Born a Crime "Compelling . . . By turns alarming, sad and funny, [Trevor Noah's] book provides a harrowing look, through the prism of Mr. Noah's family, at life in South Africa under apartheid. . . . Born a Crime is not just an unnerving account of growing up in South Africa under apartheid, but a love letter to the author's remarkable mother."—Michiko Kakutani, The New York Times
