Henry, not to mention genre-bending cases by science-fiction greats Poul Anderson and Michael Moorcock. The most dangerous move in business is the failure to make a move. Global business celebrity and prime-time Bloomberg Television host, Jeffrey W. Hayzlett empowers business leaders to tie their visions to actions, advancing themselves past competitors and closer to their business dream. Drawing upon his own business back stories including his time as CMO of Kodak and sharing examples from the many leaders featured on "The C-Suite with Jeffrey Hayzlett," Hayzlett imparts ten core lessons that dare readers to own who they are as a leader and/or company, define where they want to go, and fearlessly do what it takes to get there--caring less about conventional wisdom, re-framing limitations, and steamrolling obstacles as they go.

While television has always played a role in recording and curating history, shaping cultural memory, and influencing public sentiment, the changing nature of the medium in the post-network era finds viewers experiencing and participating in this process in new ways. They skim through commercials, live tweet press conferences and award shows, and tune into reality shows to escape reality. This new era, defined by the heightened anxiety and fear ushered in by 9/11, has been documented by our media consumption, production, and reaction. In *Small Screen, Big Feels*, Melissa Ames asserts that TV has been instrumental in cultivating a shared memory of emotionally charged events unfolding in the United States since September 11, 2001. She analyzes specific shows and genres to illustrate the ways in which cultural fears are embedded into our entertainment in series such as *The Walking Dead* and *Lost* or critiqued through programs like *The Daily Show*. In the final section of the book, Ames provides three audience studies that showcase how viewers consume and circulate emotions in the post-network era: analyses of live tweets from Shonda Rhimes's drama, *How to Get Away with Murder*

(2010--2020), ABC's reality franchises, *The Bachelor* (2002--present) and *The Bachelorette* (2003--present), and political coverage of the 2016 Presidential Debates. Though film has been closely studied through the lens of affect theory, little research has been done to apply the same methods to television. Engaging an impressively wide range of texts, genres, media, and formats, Ames offers a trenchant analysis of how televisual programming in the United States responded to and reinforced a cultural climate grounded in fear and anxiety.

Big Data, gathered together and re-analysed, can be used to form endless variations of our persons - so-called 'data doubles'. Whilst never a precise portrayal of who we are, they unarguably contain glimpses of details about us that, when deployed into various routines (such as management, policing and advertising) can affect us in many ways. How are we to deal with Big Data? When is it beneficial to us? When is it harmful? How might we regulate it? Offering careful and critical analyses, this timely volume aims to broaden well-informed, unprejudiced discourse, focusing on: the tenets of Big Data, the politics of governance and regulation; and Big Data practices, performance and resistance. An interdisciplinary volume, *The Politics of Big Data* will appeal to undergraduate and postgraduate students, as well as postdoctoral and senior researchers interested in fields such as Technology, Politics and Surveillance.

Over the course of his long career, legendary bluesman William "Big Bill" Broonzy (1893–1958) helped shape the trajectory of the genre, from its roots in the rural Mississippi River Delta, through its rise as a popular genre in the North, to its eventual international acclaim. Along the way, Broonzy adopted an evolving personal and professional identity, tailoring his self-presentation to the demands of the place and time. His remarkable professional fluidity mirrored the range of expectations from his audiences, whose ideas about race, national belonging, identity, and the blues were refracted through Broonzy as if through a prism. Kevin D. Greene argues that Broonzy's popular success testifies to his ability to navigate the cultural expectations of his different audiences. However, this constant reinvention came at a personal and professional cost. Using Broonzy's multifaceted career, Greene situates blues performance at the center of understanding African American self-presentation and racial identity in the first half of the twentieth century. Through Broonzy's life and times, Greene assesses major themes and events in African American history, including the Great Migration, urbanization, and black expatriate encounters with European culture consumers. Drawing on a range of historical source materials as well as oral histories and personal archives held by Broonzy's son, Greene perceptively interrogates how notions of race, gender, and audience reception continue to shape concepts of folk culture and musical authenticity.

This book will be entertaining, which is what it was intended to be. To some, it may even be offensive, but it is the story of a man that actually existed; a man of great courage and few resources, a man who protected and loved his family in the midst of great human challenges. This book will let you become acquainted with an unusual man who possessed an uncanny sense of impending danger; a gift that allowed him to see the other man's character weaknesses in time to arm himself with the necessary armor needed for the moment. Excluding a few words in the beginning chapters of the book, to make the story interesting, ninety- five percent of this book is true, as told to the author by his father, his aunt, and his uncles. Many stories were also supplied by the author's mother and many other family members.

It was not until after the Second World War and the successful struggle of Tito's partisans and the forging of a new Yugoslavia that Macedonia realized in some measure her autonomy as a republic, federated within that new state. It was only then that she had her own university, that Macedonian became the teaching language of her schools, and that she achieved a variety of self-government. It is pride in these achievements that has shaped the consciousness of her people. This collection offers for the first time in English representative stories of 20 writers, all of whom are still living, and all of whom began their careers after 1945. They are the writers of at least two generations: Some were partisans, but some never knew war and are still in their twenties or thirties. Their stories range from rather traditional work in imitation of Russian or European masters to radical experiments in the anti-story.

Why, in the world's most affluent nation, are so many corporations squeezing their employees dry? In this fresh, carefully researched book, New York Times reporter Steven Greenhouse explores the economic, political, and social trends that are transforming America's workplaces, including the decline of the social contract that created the world's largest middle class and guaranteed job security and good pensions. We meet all kinds of workers—white-collar and blue-collar, high-tech and low-tech, middle-class and low-income—as we see shocking examples of injustice, including employees who are locked in during a hurricane or fired after suffering debilitating, on-the-job injuries. With pragmatic recommendations on what government, business and labor should do to alleviate the economic crunch, The Big Squeeze is a balanced, consistently revealing look at a major American crisis.

An entertaining book "filled with inspirational anecdotes" (People) about second acts in life and reinventing yourself from beloved television actress Patricia Heaton—Emmy Award-winning star of Everybody Loves Raymond, The Middle, Patricia Heaton Parties, and most recently, Carol's Second Act. Patricia Heaton is one of TV's most recognizable and beloved moms. She's won three Emmys, two for her starring role as Debra Barone on the long-running comedy Everybody Loves Raymond, and followed that career-making role with another gem as Frances Heck on the popular sitcom The Middle. She returned to television as the lead in the series Carol's Second Act, which followed divorced fifty-year-old Carol Kenney (played by Heaton), who after raising two children and retiring as a teacher decides to finally pursue her dream of becoming a doctor. Patricia Heaton knows what it's like to stage a second act and navigate pivotal transitions in life. When Heaton's children left the nest, she found herself in a new and unfamiliar stage of life, compelling her to evaluate which direction to take next. Heaton discovered she had the time pursue passions that were previously placed on hold, both personally and professionally. She made her move and took a step forward in her career and for the first time, Heaton was not only the star of her own show, but also the executive producer. She now finds her greatest fulfillment in using her influence to support humanitarian efforts as a Celebrity Ambassador for World Vision, the world's largest non-governmental organization. She and her husband support their work in poverty relief around the globe, something that was planted in her heart long ago. Through her own experience, Heaton became curious about other people's stories of second-act transitions and ways to offer support in the process. Now, in Your Second Act, she shares wisdom from her own personal journey as well as insight from stories of numerous people across the country. From work to health, to love

and more, the results are heartwarming, inspiring, and surprisingly relatable. “If you’ve been wanting to start your second act, Patricia Heaton may have just what you need” (Today). Filled with light-hearted anecdotes and pragmatic steps, Heaton shows us that midlife doesn’t have to be about crisis when you focus on the opportunity. After all, it’s never too late, or too early to stage your second act. In this collection of essays and speeches written over the course of four decades, beloved storyteller Natalie Babbitt explores what it was like to be a “little dog” in the literary world, continually being forced to justify her choice to write books for children—instead of doing something more serious. Babbitt offers incisive commentary on classic children’s books as well as contemporary works, and reveals colorful insights into her own personal creative life. Filled with a voice that rings with truth, wisdom, and humor across the years, the essays gathered in *Barking with the Big Dogs* exemplify on every page true reverence for children and an endless engagement with the challenge to write the books that shape them.

More than 100 of the best, most thrilling accounts of hauntings from the Mountain State from one of the nation's leading experts.

After graduating from the University of Missouri in 1969 I was commissioned as an officer in the Marines. I served an interesting ‘tour of duty’ in Southeast Asia in 1972, during which time I was “in and out” of six different countries...including Vietnam. A greenhorn lieutenant when I landed, I was eventually promoted to captain. Because of my God given ‘take charge personality’ and a few “very junior officer” notable accomplishments I found myself frequently being handpicked for special assignments. I ‘saw action’ with seven different units...some good ...some bad...some ugly. I saw men die. I saw capable men withered by fatigue, brave men crippled by fear. Since I served, more than forty years ago now, I have had the pleasure and privilege of meeting and getting to know hundreds of fellow-Vietnam Vets; short term acquaintances, professional colleagues, neighbors, close friends, family members. Although our individual Vietnam stories are unique and intensely personal, I have come to realize that a common thread runs through most of them. For more than twenty-five years I have been asked to formally speak to sundry civic organizations, history classes, and social gatherings. As a result of fielding thousands of audience questions and listening to their spontaneous reactions to my “talks” I have learned what people are interesting in hearing. I have seen their reactions to my version of America’s ‘Vietnam experience’. I know what’s interesting and what’s not; what’s important to those who weren’t there, ordinary people who merely wonder ‘what it was like’. I have enjoyed two “successful careers” and am currently embarked upon my third. I have fired most of life’s best bullets, emptied most of my chosen weapon’s most precious magazines, drained my fullest canteens, exhausted most of my allotted time on this fair planet we call earth. I want to share a few of the stories of men I served with, men I came to know later in life, men I loved as brothers-in-arms surviving in harm’s way; or men who were simply ‘Crazy Vietnam Vets’ (like me) with a special story to tell. “Men JUST like me...only different!” Ours are interesting up and down tales of wonder and weird, of good times and bad. I am happily married to a “seasoned” school nurse, am the father of three college educated sons, and have two fine grandsons. I live in Blanco, Texas about forty miles due west of Austin. I have always viewed life’s glass as half full; hope you enjoy our ‘Not Ordinary’ war stories.

The Big Data Now anthology is relevant to anyone who creates, collects or relies upon data. It's not just a technical book or just a business guide. Data is ubiquitous and it doesn't pay much attention to borders, so we've calibrated our coverage to follow it wherever it goes. In the first edition of Big Data Now, the O'Reilly team tracked the birth and early development of data tools and data science. Now, with this second edition, we're seeing what happens when big data grows up: how it's being applied, where it's playing a role, and the consequences -- good and bad alike -- of data's ascendance. We've organized the second edition of Big Data Now into five areas: Getting Up to Speed With Big Data -- Essential information on the structures and definitions of big data. Big Data Tools, Techniques, and Strategies -- Expert guidance for turning big data theories into big data products. The Application of Big Data -- Examples of big data in action, including a look at the downside of data. What to Watch for in Big Data -- Thoughts on how big data will evolve and the role it will play across industries and domains. Big Data and Health Care -- A special section exploring the possibilities that arise when data and health care come together.
