The Art of Record Production Simon Zagorski-Thomas,Katia Isakoff,Serge Lacasse,Sophie Stévançe,2016-04-01 The playback of recordings is the primary means of experiencing music in contemporary society, and in recent years 'classical' musicologists and popular music theorists have begun to examine the ways in which the production of recordings affects not just the sound of the final product but also musical aesthetics more generally. Record production can, indeed, be treated as part of the creative process of composition. At the same time, training in the use of these forms of technology has moved from an apprentice-based system into university education. Musical education and music research are thus intersecting to produce a new academic field: the history and analysis of the production of recorded music. This book is designed as a general introductory reader, a text book for undergraduate degree courses studying the creative processes involved in the production of recorded music. The aim is to introduce students to the variety of approaches and methodologies that are currently being employed by scholars in this field. The book is divided into three sections covering historical approaches, theoretical approaches and case studies and practice. There are also three interludes of commentary on the academic contributions from leading record producers and other industry professionals. This collection gives students and scholars a

broad overview of the way in which academics from the analytical and practice-based areas of the university system can be brought together with industry professionals to explore the ways in which this new academic field should progress.

The Ashgate Research Companion to Popular Musicology Derek B. Scott,2016-03-23 The research presented in this volume is very recent, and the general approach is that of rethinking popular musicology: its purpose, its aims, and its methods. Contributors to the volume were asked to write something original and, at the same time, to provide an instructive example of a particular way of working and thinking. The essays have been written with a view to helping graduate students with research methodology and the application of relevant theoretical models. The team of contributors is an exceptionally strong one: it contains many of the pre-eminent academic figures involved in popular musicological research, and there is a spread of European, American, Asian, and Australasian scholars. The volume covers seven main themes: Film, Video and Multimedia; Technology and Studio Production; Gender and Sexuality; Identity and Ethnicity; Performance and Gesture; Reception and Scenes and The Music Industry and Globalization. The Ashgate Research Companion is designed to offer scholars and graduate students a comprehensive and authoritative state-of-the-art review of current research in a particular area. The companion's editor brings together a team of respected and experienced experts to write chapters on the key issues in their speciality, providing a comprehensive reference to the field.

Rhymin' and Stealin' Justin A Williams,2013-07-25 Rhymin' and Stealin'begins with a crucial premise: the fundamental element of hip-hop culture and aesthetics is the overt use of preexisting material to new ends. Whether it is taking an old dance move for a breakdancing battle, using spray paint to create street art, quoting from a famous speech, or sampling a rapper or 1970s funk song, hip-hop aesthetics involve borrowing from the past. By appropriating and reappropriating these elements, they become transformed into something new, something different, something hip-hop. Rhymin' and Stealin' is the first book-length study of musical borrowing in hip-hop music, which not only includes digital sampling but also demonstrates a wider web of references and quotations within the hip-hop world. Examples from Nas, Jay-Z, A Tribe Called Quest, Eminem, and many others show that the transformation of preexisting material is the fundamental element of hip-hop aesthetics. Although all music genres use and adapt preexisting material in different ways, hip-hop music celebrates and flaunts its

“open source” culture through highly varied means. It is this interest in the web of references, borrowed material, and digitally sampled sounds that forms the basis of this book—sampling and other types of borrowing becomes a framework with which to analyze hip-hop music and wider cultural trends.

Producing Music Russ Hepworth-Sawyer, Jay Hodgson, Mark Marrington, 2019-03-28 During the last two decades, the field of music production has attracted considerable interest from the academic community, more recently becoming established as an important and flourishing research discipline in its own right. Producing Music presents cutting-edge research across topics that both strengthen and broaden the range of the discipline as it currently stands. Bringing together the academic study of music production and practical techniques, this book illustrates the latest research on producing music. Focusing on areas such as genre, technology, concepts, and contexts of production, Hepworth-Sawyer, Hodgson, and Marrington have compiled key research from practitioners and academics to present a comprehensive view of how music production has established itself and changed over the years.

Drum Sound and Drum Tuning Rob Toulson, 2021-05-26 Drum Sound and Drum Tuning assists drummers, sound engineers, and music students in learning critical skills related to drum sound and achieving an optimised and personalised drum kit set-up. The book covers the essential theories of percussion acoustics and develops this knowledge in order to facilitate creative approaches to drum tuning and professional-level recording and mixing of drums. All aspects of drumhead vibration, drumhead equalisation, and resonant drumhead coupling are de-mystified, alongside discussions relating to drumhead types, drum shell vibration, and tuning to musical intervals for different performance genres. The book develops drum sound theory and creative analysis into a detailed dissection of recording and production techniques specifically for drums, including discussions on studio technologies, room acoustics, microphone techniques, phase coherence, and mixing drums with advanced digital audio workstation (DAW) techniques and creative processing tools. Drum Sound and Drum Tuning includes many practical hands-on exercises that incorporate example tutorials with Logic Pro and iDrumTune Pro

software, encouraging the reader to put theory into immediate creative practice and to develop their own listening skills in an informed and reflective manner. The book also documents primary interviews and opinion from some of the world's most celebrated drummers, music producers, and sound engineers, enabling the reader to connect the relevant theories with real-world context, whilst refining their own personalised approach to mastering drum sound.

Audio Mastering: The Artists Russ Hepworth-Sawyer, Jay Hodgson, 2018-09-28 *Audio Mastering: The Artists* collects more than twenty interviews, drawn from more than 60 hours of discussions, with many of the world's leading mastering engineers. In these exclusive and often intimate interviews, engineers consider the audio mastering process as they, themselves, experience and shape it as the leading artists in their field. Each interview covers how engineers got started in the recording industry, what prompted them to pursue mastering, how they learned about the process, which tools and techniques they routinely use when they work, and a host of other particulars of their crafts. We also spoke with mix engineers, and craftsmen responsible for some of the more iconic mastering tools now on the market, to gain a broader perspective on their work. This book is the first to provide such a comprehensive overview of the audio mastering process told from the point-of-view of the artists who engage in it. In so doing, it pulls the curtain back on a crucial, but seldom heard from, agency in record production at large.

Listen to the Blues! James E. Perone, 2019-02-15 *Listen to the Blues! Exploring A Musical Genre* provides an overview of this distinctly American musical genre for fans of the blues and curious readers alike, with a focus on 50 must-hear artists, albums, and subgenres. Unlike other books on the blues, which tend to focus on musician biographies, *Listen to the Blues!* devotes time to the compositions, recordings, and musical legacies of blues musicians from the early 20th century to the present. Although the author references musical structure, harmony, form, and other musical concepts, the volume avoids technical language; therefore, it is a volume that should be of interest to the casual blues fan, to students of blues music and its history, and to more serious blues fans. The chapters on the impact of the blues on popular culture and the legacy of the blues also put the genre in a broader historical context than what is found in many books on the blues. The book opens with a background chapter that provides an overview of the history and structure of blues music. A substantial, encyclopedic

chapter that focuses on 50 must-hear blues musicians follows, as does a chapter that explores the impact on popular culture of blues music and musicians and a chapter that focuses on the legacy of the genre. A bibliography rounds out the work.

Confessions of a Record Producer Moses Avalon, 2016-03-01 For more than 15 years, *Confessions of a Record Producer* has exposed the inner workings of the music business and empowered artists to protect their interests. With inside knowledge and hard numbers, Moses Avalon reveals the truth of how the industry functions (or dysfunctions), showing what artists actually make from their “hits” and how producers, labels, managers, and even the artists' own lawyers conspire to rip them off. This is the only music business trade book that:

- Intimately analyzes the differences between ASCAP, BMI, and SESAC
- Compares different types of record deals using real-world math and dollar figures
- Speaks critically about relationships between big industry entities and how they can hurt artists
- Gives the reasoning behind major industry trends and decisions, particularly recent deals with Spotify, Apple, etc.

Since the first edition's release in 1998, *Confessions* has grown from an underground favorite to a widely read staple, evolving along the way to address Internet-age realities and the pitfalls coming with rapidly changing technologies. This new, fifth edition tackles the complexities of music streaming and how the diminishing revenue it provides is becoming the new normal for an industry that has shrunk by half in less than two decades. Fully updated with recent industry developments and the latest scams, *Confessions of a Record Producer* remains a must for artists who want to survive, thrive, and get their fair share.

Wired for Sound Paul D. Greene, Thomas Porcello, 2012-01-01 Winner of the Society for Ethnomusicology's Klaus Wachsmann Award (2006) *Wired for Sound* is the first anthology to address the role of sound engineering technologies in the shaping of contemporary global music. *Wired for Sound* is at the basis of digital audio editing, multi-track recording, and other studio practices that have powerfully impacted the world's music. Distinctions between musicians and engineers increasingly blur, making it possible for people around the globe to imagine new sounds and construct new musical aesthetics. This collection of 11 essays employs primarily ethnographical, but also historical and psychological, approaches to examine a range of new, technology-intensive musics and musical practices such as: fusions of Indian film-song rhythms, heavy metal, and gamelan in Jakarta; urban Nepali pop which juxtaposes heavy metal, Tibetan Buddhist ritual chant, rap, and Himalayan folksongs; collaborations between Australian aboriginals and sound engineers; the production of heaviness in heavy metal music; and the production of the Austin sound. This anthology is must reading for anyone interested in the global character of contemporary music technology. CONTRIBUTORS: Harris M. Berger, Beverley Diamond, Cornelia Fales, Ingemar Grandin, Louise Meintjes, Frederick J. Moehn, Karl Neunfeldt, Timothy D. Taylor, Jeremy Wallach.
