How does this work? Everyone jokes about the ferocity of Maine winters, but driving in them is no laughing matter, which is why in order to get your driver's permit, you need to thoroughly study this: the Maine Driver's Handbook. Even if you've lived in Maine your entire life, there are probably things you don't know, and this latest version, which we pull directly from the Maine Bureau of Motor Vehicles page, contains only the very latest in laws and regulations. Once you feel comfortable with the handbook information, you can start practicing with our free Maine permit practice tests, so that you'll be prepared for the real exam. Finally, it'll be time to schedule the exam, and soon, you'll have a Maine driver's permit of your very own!

"... A field guide and reference for securing cargo on commercial motor vehicles according to the standards in effect in both the United States and Canada"--P. 1. How can teachers make sure that all students gain the reading skills they need to be successful in school and in life? In this book, Karen Tankersley describes the six foundational "threads" that students need to study in order to become effective readers: phonemic awareness, phonics and decoding, vocabulary, fluency, comprehension, and higher-order processing. For each area, the author explains how students acquire the reading skills they need and offers a series of skill-building strategies and activities that teachers can use in the classroom. Although reading is perhaps most intensely taught in the kindergarten and 1st-grade classrooms, Tankersley emphasizes that helping students become lifelong readers is a task for all teachers, including content-area teachers in middle and high schools. The Threads of Reading addresses key questions about literacy, such as * What makes a difference in reading achievement? * How much reading

time is enough? * How can teachers use writing to build reading skills? * How can teachers help students make meaning from their reading? The strategies in this book address many situations, from individual instruction to small- or large-group instruction, from kindergarten to high school. Teachers will appreciate the multitude of activities provided, and administrators will learn to better evaluate the reading programs in place in their districts and schools. Grounded in both research and "teacher lore" from actual classrooms, this book is a solid guide to helping students become lifelong readers. Teenagers are by far the most dangerous age group on the road: a 16-year-old is 12 times as likely as older drivers to die in a crash as a single occupant; put two young teens in a vehicle, and the odds of death and injury nearly double. Safe Young Drivers helps to address this enormous problem. It is an indispensable guide for teaching teens to drive. Intended for parents and teens to use together, it addresses parental issues such as how to choose a car for your teen, and provides teens with simple instruction and important tips to remember. With simple graphics, a complete index, and a section called Some ABCs for the Road, Safe Young Drivers is a valuable tool for all new drivers and their teachers.

In Learning and Leading with Habits of Mind, noted educators Arthur L. Costa and Bena Kallick present a comprehensive guide to shaping schools around Habits of Mind. The habits are a repertoire of behaviors that help both students and teachers successfully navigate the various challenges and problems they encounter in the classroom and in everyday life. The Habits of Mind include * Persisting * Managing impulsivity * Listening

Access Free Behind The Wheel Instruction Log 30 Hours Tdlr

with understanding and empathy * Thinking flexibly * Thinking about thinking (metacognition) * Striving for accuracy * Questioning and posing problems * Applying past knowledge to new situations * Thinking and communicating with clarity and precision * Gathering data through all senses * Creating, imagining, innovating * Responding with wonderment and awe * Taking responsible risks * Finding humor * Thinking interdependently * Remaining open to continuous learning This volume brings together--in a revised and expanded format--concepts from the four books in Costa and Kallick's earlier work *Habits of Mind: A Developmental Series*. Along with other highly respected scholars and practitioners, the authors explain how the 16 Habits of Mind dovetail with up-to-date concepts of what constitutes intelligence; present instructional strategies for activating the habits and creating a "thought-full" classroom environment; offer assessment and reporting strategies that incorporate the habits; and provide real-life examples of how communities, school districts, building administrators, and teachers can integrate the habits into their school culture. Drawing upon their research and work over many years, in many countries, Costa and Kallick present a compelling rationale for using the Habits of Mind as a foundation for leading, teaching, learning, and living well in a complex world.
