

Berger Transit Level Manual

First Published in 2011. Routledge is an imprint of Taylor & Francis, an informa company.

Contains the proceedings of the Michigan Engineering Society.

A real boon for medical practitioners from a number of disciplines, this is a practice-oriented manual of medical oncology and hematology for day-to-day use in caring for patients' hematologic and neoplastic diseases. It is founded on the longstanding experience of a large specialized university department accustomed to having to provide reliable advice in a broad range of circumstances. The authors have chosen not to give a comprehensive review of the various subjects but have instead focused on practical methods which have proven to be useful in their experience, with special emphasis on standardizing chemotherapy protocols.

CD includes pdf version of the print book plus supplementary Excel spreadsheets and a library of related TCRP publications.
