Rover V8 – the Story of the Engine tells the fascinating story of the engine that created a legend in its own lifetime. Starting life as a General Motors design in 1961, but withdrawn three years later in favour of cheaper technology, it reached Rover by chance in the mid-1960s. Few other British companies then had V8 engines in production, and Rover immediately gained a special status when the V8 entered UK production during 1967. This was an extraordinarily compact design and also extraordinarily light, thanks to its all-aluminium alloy construction. It was not a temperamental high-performance engine, but had a well-proven and simple architecture that made it both reliable and easy to work on. Small wonder, then, that the Rover V8 was bought by sports car makers who needed a light, compact and powerful engine. Small wonder that Rover kept it in production for so long, developing multiple different sizes and versions. Small wonder that the engine is still revered by Rover and Land Rover enthusiasts today, or that its popularity as an aftermarket conversion has ensured that it remains in small-volume production, half a century after entering production in the UK.

Born in Shropshire soon after the end of the First World War, venerable motoring writer W de Forte has driven everything from his grandfather's first Daimler, to modern-day supercars ... ridden everything from vertiginous Victorian penny farthings, to high velocity twenty-first century superbikes ... travelled everywhere from the permafrost of the Arctic Circle to the baking sands of the Baja Peninsula ... and met everyone from Tazio Nuvolari to Valentino Rossi. W de Forte enjoyed an eventful career as a top-level journalist, spanning 75 years, during which time he tested many thousands of cars and reported on countless automotive events around the world. This made him uniquely qualified to comment on all aspects of classic and vintage motoring and motorcycling. Relatively undimmed by age and age, even in his 90s, de Forte had no plans to retire, but, in early 2011, a high-speed prang while testing a wayward Rudge Ulster at a racing circuit in Belgium brought him up with a jolt, both literally and metaphorically. After recuperating in hospital, he settled down to write his long-awaited and much requested autobiography. This unique and insightful book is the result. Packed with fascinating stories about classic cars and motorcycles, A Life Awheel – the 'Auto' Biography of W de Forte is an account of an extraordinary motoring life, and the story of motoring in the 20th century.

When the Range Rover Sport was launched in 2005, it was aimed at a new group of customers who in many cases would never have considered a Land Rover product before.
