ESSAY: The focus of this essay is on Bill Gates as a creative, gifted and talented person (business & entrepreneurship). An easy and very interesting read. SEATTLE - If you spend time with the Gates family it is most probable that someone will mention the "water incident". The future software guru was a headstrong 12-year-old and was having a particularly nasty argument with his mother at the dinner table. His father lost his cool and threw a glass of cold water in the boy's face. The young boy snapped back with something like this: "Hey thanks for the shower!" (Guth, 2009) Behind the Bill Gates, a success story, is the other William Gates (Sr.), his father. It is the story of his father about the young Gates junior's early years and the raising of Bill (Jr.) that generates interest by almost everyone. Questions like: 'How did he grow up?'; 'What was his life like as a child in the Gates household?', and 'What was he like in senior high school?' In this case study, I will look primarily at "Raising the young Gates" and I will endeavor to identify patterns and traits of giftedness, talent, and creativity which could be linked to the work of Renzulli (1986), Simonton (2000), Sternberg (2006), and Csikszentmihalyi (1999a). In the second section, I will look at some influences, time frames, historical, political, economic and social events that shaped the wealthy and very successful Bill Gates (Jr.) to become one of the wealthiest men and most influential men in the world Executive Summary This case study assesses, analyses, and discusses the prosperous life of the entrepreneur Bill Gates (Founder of Microsoft software) as an intelligent, gifted and talented person. The work of Simonton (2000), Sternberg (2006), Renzulli (1986) Csikszentmihalyi (1999a), on talented and gifted persons, shows that Bill Gates fits into three of the four categories outlined by Riley et al. (2004) Ministry of Education (New Zealand), namely: 1. Intellectual/Academic refers to students with exceptional abilities in one or more of the learning areas (i.e., English, the arts, health and physical education, learning languages, mathematics and statistics, science, social sciences, and technology). 2. Creativity refers to students with general creative abilities as evidenced in their abilities to problem-find and problem-solve, and their innovative thinking and productivity. 3. I have taught a graduate course on the history of the information and communications industry for 20 years. The course shows students how the world has moved from primitive communication to the integrated multi-media situation we are in today. Concentration is on the fields of journalism, telecommunications, broadcasting, and computing. Emphasis is placed on the leaders of the areas and the political and cultural surroundings that encouraged or discouraged growth of the industry. It is true that technology is a driving force of this industry, but it has been the individual people (characters) impelled by discovery, acceptance and marketability of that technology who have taken the next step to improve communication. The Journalism field started with Gutenberg and early added Ben Franklin, later it got a little yellow with Hearst and Pulitzer. I think Henry Luce started the business of media integration, but Rupert Murdoch certainly keeps it going. The first practical use of electricity was found by Samuel Morse and his telegraph. Bell invented the telephone, or was it Meucci? Theodore Vail invented the Bell System. Broadcasting started with Marconis invention, or was it Teslas? David Sarnoff and William Paley made the medium practical and

characters like Edwin R. Morrow, Walter Cronkite and even Oprah Winfrey gave it credibility. Certainly Charles Babbage and Ada Lovelace had something to do with the start of computers, but later scientists Vannevar bush and Jon von Neumann added the electronics. Then UNIVAC convinced Thomas Watson Junior that IBM better start making them. Jobs and Wozniac started the personal computer business, but Bill Gates created the software to make them run. Tim Berners-Lee hooked those computers to a network and then Amazon, eBay, and Google found a way to make money using the result. This book is the story of these people and companies.
