"[Strycker] thinks like a biologist but writes like a poet." -- Wall Street Journal An entertaining and profound look at the lives of birds, illuminating their surprising world—and deep connection with humanity. Birds are highly intelligent animals, yet their

intelligence is dramatically different from our own and has been little understood. As we learn more about the secrets of bird life, we are unlocking fascinating insights into memory, relationships, game theory, and the nature of intelligence itself. *The Thing with Feathers* explores the astonishing homing abilities of pigeons, the good deeds of fairy-wrens, the influential flocking abilities of starlings, the deft artistry of bowerbirds, the extraordinary memories of nutcrackers, the lifelong loves of albatrosses, and other mysteries—revealing why birds do what they do, and offering a glimpse into our own nature. Drawing deep from personal experience, cutting-edge science, and colorful history, Noah Strycker spins captivating stories about the birds in our midst and shares the startlingly intimate coexistence of birds and humans. With humor, style, and grace, he shows how our view of the world is often, and remarkably, through the experience of birds. You've never read a book about birds like this one.

One makes colorful paper collages; the other, intricate environments out of found objects. And yet Susan L. Roth and the remarkable bowerbird are truly birds of a feather. Now in paperback. Sibert Medalist Susan L. Roth is like a bowerbird, a small black bird found in Australia and New Guinea that builds elaborate structures from various materials they find near their habitats. Though Susan creates books to attract readers and bowerbirds build bowers to attract a mate, both get their ideas from the world around them and the materials they find. Both love colors. No two of their respective creations are alike. And most importantly, both Susan and the bowerbirds aspire for their finished works to be greater than the sum of their parts. Complete with engaging backmatter and dazzling artwork crammed full of so much to look at, this visually delightful picture book from award-winning author and artist Susan L. Roth is a fascinating comparison of art we create and art we find in nature.

With beautiful illustrations by Jennifer Morillo that help to capture the essence of the book, this is a read-aloud story that imparts wisdom through the innocent eyes of a baby bird. This endearing story of identification and values shows the rewards in looking closely and thinking imaginatively. Lali finds a little feather in the field. Is it lost? The idea that communication constitutes organization (CCO) provides a unique perspective to organization studies by highlighting the fundamental and formative role of communication for organizational phenomena of various kinds. The book features original works that address the idea of organization as communication in the light of other theories, related concepts, as well as the tension between strategy and emergence. The first set of chapters discusses the idea of organization communication in the light of critical works of European scholars (Habermas, Honneth, and Günther). The second set of chapters reflects on a range of concepts such as institutions, routines, and leadership from a CCO perspective. The final set of chapters examines the tension between strategic and emergent communication by drawing on new methodology and empirical evidence. The chapters are set into dialogue with some of the most prominent proponents of CCO scholarship. The book offers an important contribution to CCO thinking by adding European perspectives on organization as communication. It connects the primarily North American approach and European traditions of theoretical thought to existing debates in communication and organization studies.

A philosophical picture book from one of China's most celebrated children's authors and 2016 Hans Christian Andersen Award-winner Cao Wenxuan. A feather is blown across the sky, meeting various birds along the way, and asking each one, "Do I belong to you?". Cao Wenxuan tells the story of a single feather who is swept away on a journey of discovery and belonging. Encountering a variety of birds, from a kingfisher to a magpie, Feather is hopeful of meeting the bird she belongs to. Again and again, she is dismissed or ignored. Only when she sees that there is also beauty in being close to the earth does fate offer a reunion... Feather is sure to charm young children with a plot at once compelling, meditative, and quietly moving. Roger Mello's stunningly beautiful, dynamic illustrations will delight readers of all ages.

Feathers are an evolutionary marvel: aerodynamic, insulating, beguiling. They date back more than 100 million years. Yet their story has never been fully told. In *Feathers*, biologist Thor Hanson details a sweeping natural history, as feathers have been used to fly, protect, attract, and adorn through time and place. Applying the research of paleontologists, ornithologists, biologists, engineers, and even art historians, Hanson asks: What are feathers? How did they evolve? What do they mean to us? Engineers call feathers the most efficient insulating material ever discovered, and they are at the root of biology's most enduring debate. They silence the flight of owls and keep penguins dry below the ice. They have decorated queens, jesters, and priests. And they have inked documents from the Constitution to the novels of Jane Austen. *Feathers* is a captivating and beautiful exploration of this most enchanting object.

the birds we see most often. This special, large-format volume is geared as much to nonbirders as it is to the out-and-out obsessed, covering more than two hundred species and including more than 330 new illustrations by the author. While its focus is on familiar backyard birds—blue jays, nuthatches, chickadees—it also examines certain species that can be fairly easily observed, such as the seashore-dwelling Atlantic puffin. David Sibley's exacting artwork and wide-ranging expertise bring observed behaviors vividly to life. (For most species, the primary illustration is reproduced life-sized.) And while the text is aimed at adults—including fascinating new scientific research on the myriad ways birds have adapted to environmental changes—it is nontechnical, making it the perfect occasion for parents and grandparents to share their love of birds with young children, who will delight in the big, full-color illustrations of birds in action. Unlike any other book he has written, *What It's Like to Be a Bird* is poised to bring a whole new audience to David Sibley's world of birds.

Here he is, husband and father, scruffy romantic, a shambolic scholar--a man adrift in the wake of his wife's sudden, accidental death. And there are his two sons who like him struggle in their London apartment to face the unbearable sadness that has engulfed them. The father imagines a future of well-meaning visitors and emptiness, while the boys wander, savage and unsupervised. In this moment of violent despair they are visited by Crow--antagonist, trickster, goad, protector, therapist, and babysitter. This self-described "sentimental bird," at once wild and tender, who "finds humans dull except in grief," threatens to stay with the wounded family until they no longer need him. As weeks turn to months and the pain of loss lessens with the balm of memories, Crow's efforts are rewarded and the little unit of three begins to recover: Dad resumes his book about the poet Ted Hughes; the boys get on with it, grow up. Part novella, part polyphonic fable, part essay on grief, Max Porter's extraordinary debut combines compassion and bravura style to dazzling effect. Full of angular wit and profound truths, *Grief Is the Thing with Feathers* is a startlingly original and haunting debut by a significant new talent.
