

Birthing From Within

"Designed as an informational resource for patients, Your Pregnancy and Childbirth: Month to Month Seventh Edition sets forth current information and clinical opinions on subjects related to women's health and reproduction. Your pregnancy and Childbirth: Month to Month is a resource for informational purposes. Topics include getting ready for pregnancy choosing an obstetric care provider what to expect during each month of pregnancy exercise during pregnancy work and travel during pregnancy pain relief during childbirth labor and delivery cesarean delivery postpartum care and taking care of the baby after birth, birth control after pregnancy"--

The most remarkable natural childbirth technique to have been developed in decades. Marie Mongan takes the pregnant woman through the techniques and philosophy of a new form of gentle birthing. Drawing on self-hypnosis, guided imagery and special breathing techniques the Hypnobirthing Method can bring about a shorter, easier, more enjoyable birth, free of the drugs that can harm the mother and the baby. It also allows the mother to fully control her own birthing experience as the mother remains awake, aware and alert.

Birthing from Within An Extra-ordinary Guide to Childbirth Preparation

While finishing her doctorate, Rebecca gave birth to her firstborn. But hospital practices and policies that were more than 20 years out of date left her with preventable complications. Join Rebecca as she exposes the stark realities of institutional care during childbirth and reveals inspirational solutions for parents and professionals alike.

In No Perfect Birth: Trauma and Obstetric Care in the Rural United States, Kristin Haltinner examines the institutional and ideological forces that cause harm to women in childbirth in the rural United States. Interweaving the poignant and tragic stories of mothers with existing research on obstetric care and social theories, Haltinner points to how medical staff's lack of time, mother's need to navigate and traverse complex spaces, and practitioner's reliance on well-trodden obstetric routines cause unnecessary and lasting harm for women in childbirth. Additionally, Haltinner offers suggestions towards improving current practices, incorporating case models from other countries as well as mothers' embodied knowledge.

Book discusses VBAC (vaginal birth after caesarean).

More than eighty designs--iconic, archaic, quotidian, and taboo--that have defined the arc of human reproduction. While birth often brings great joy, making babies is a knotty enterprise. The designed objects that surround us when it comes to menstruation, birth control, conception, pregnancy, childbirth, and early motherhood vary as oddly, messily, and dramatically as the stereotypes suggest. This smart, image-rich, fashion-forward, and design-driven book explores more than eighty designs--iconic, conceptual, archaic, titillating, emotionally charged, or just plain strange--that have defined the relationships between people and babies during the past century. Each object tells a story. In striking images and engaging text, Designing Motherhood unfolds the compelling design histories and real-world uses of the objects that shape our reproductive experiences. The authors investigate the baby carrier, from the Snuggly to BabyBjörn, and the (re)discovery of the varied traditions of baby wearing; the tie-waist skirt, famously worn by a pregnant Lucille Ball on I Love Lucy, and essential for camouflaging and slowly normalizing a public pregnancy; the home pregnancy kit, and its threat to the authority of male gynecologists; and more.

Memorable images--including historical ads, found photos, and drawings--illustrate the crucial role design and material culture plays throughout the arc of human reproduction. The book features a prologue by Erica Chidi and a foreword by Alexandra Lange. Contributors Luz Argueta-Vogel, Zara Arshad, Nefertiti Austin, Juliana Rowen Barton, Lindsey Beal, Thomas Beatie, Caitlin Beach, Maricela Becerra, Joan E. Biren, Megan Brandow-Faller, Khiara M. Bridges, Heather DeWolf Bowser, Sophie Cavoulacos, Meegan Daigler, Anna Dhody, Christine Dodson, Henrike Dreier, Adam Dubrowski, Michelle Millar Fisher, Claire Dion Fletcher, Tekara Gainey, Lucy Gallun, Angela Garbes, Judy S. Gelles, Shoshana Batya Greenwald, Robert D. Hicks, Porsche Holland, Andrea Homer-Macdonald, Alexis Hope, Malika Kashyap, Karen Kleiman, Natalie Lira, Devorah L Marrus, Jessica Martucci, Sascha Mayer, Betsy Joslyn Mitchell, Ginger Mitchell, Mark Mitchell, Aidan O'Connor, Lauren Downing Peters, Nicole Pihema, Alice Rawsthorn, Helen Barchilon Redman, Airyka Rockefeller, Julie Rodelli, Raphaela Rosella, Loretta J. Ross, Ofelia Pérez Ruiz, Hannah Ryan, Karin Satrom, Tae Smith, Orkan Telhan, Stephanie Tillman, Sandra Oyarzo Torres, Malika Verma, Erin Weisbart, Deb Willis, Carmen Winant, Brendan Winick, Flaura Koplín Winston

Many newly pregnant women believe mothering begins after the baby is born. As a result, their pregnancy is spent preparing the baby's room, buying a crib, and even attending childbirth classes. All of these activities are valuable and help to prepare for this new life, but what about before the baby is born? The Wonder Within You takes you on a journey that weaves scientific studies, dozens of interviews with mothers, and storytelling into a fascinating account of life inside the womb. An obstetrician loads each chapter with advice. A sonographer gives incredible 3 and 4-D snapshots (available online) and stories from her 25 years of watching babies grow in utero. Each chapter includes week-by-week developmental information, findings from recent neonatal studies, and even nutritional advice all designed to nurture a healthy baby. The Wonder Within You also serves as a weekly journal for expectant mothers to chronicle her own baby's journey to life outside the womb. It's a keepsake baby book that begins before birth. The Wonder Within You will help moms meet the real needs of the growing pre-born baby. Sonograms, dietary and medical advice, and stories from experienced moms are combined to encourage 40 weeks of prenatal parenting designed with a joy for the journey in mind.

There is a global crisis in maternal health care for black women. In the United States, black women are over three times more likely to perish from pregnancy-related complications than white women; their babies are half as likely to survive the first year. Many black women experience policing, coercion, and disempowerment during pregnancy and childbirth and are disconnected from alternative birthing traditions. This book places black women's voices at the center of the debate on what should be done to fix the broken maternity system and foregrounds black women's agency in the emerging birth justice movement. Mixing scholarly, activist, and personal perspectives, the book shows readers how they too can change lives, one birth at a time.

Gives expectant parents an overview of the options available, offering up-to-the-minute advice on such matters as physical and emotional preparation, the father's role, avoiding a cesarean birth, and other information

This stunning sequel to Brigitte Jordan's landmark Birth in Four Cultures brings together the work of fifteen reproductive anthropologists to address core cultural values and knowledge systems as revealed in contemporary birth practices in Brazil, Greece, Japan, Mexico, the Netherlands, New Zealand, Tanzania, and the United States. Six ethnographic chapters form the heart of the book, three of which are set up as dyads that compare two countries; each demonstrates the power of anthropology's cross-cultural comparative method. An additional chapter with ethnographic vignettes gives readers a feel for what fieldwork is really like on the ground. The eminently readable, theoretically rich chapters are enhanced by absorbing stories, photos, quotes, thought questions, and film suggestions that nudge the reader toward eureka flashes of understanding and render the book suitable for undergraduate and graduate audiences alike.

Children delight in reading about their own births and other family stories; they love looking at old family photos and are especially entertained by drawings made by their own parents. That's why every parent will find the KEEPSAKE JOURNAL irresistible - 278 pages to instruct, inspire, and record your innermost thoughts and dreams. There are pages to journal what you are learning in your childbirth classes and

highlights from your prenatal appointments. There is a section just for dads. There are pages that correspond to favorite exercises from the BIRTHING FROM WITHIN book, pages for drawing, and pages to record your birth story and postpartum anecdotes.

These days, many mothers-to-be find themselves torn between the desire for a natural childbirth with minimal medical intervention and the peace of mind offered by instant access to life-saving technology that only a hospital can provide. In *Natural Hospital Birth*, doula Cynthia Gabriel asserts that there is no good reason that women in North America should not be able to have both. She shows expectant mothers what they can do to avoid unnecessary medical interventions and how to take initiative and consciously prepare for the kind of birth they want to have. Also included are inspiring stories from other women who know firsthand that natural birth in the hospital is possible. With this book, mothers-to-be will be equipped with the knowledge they need to ensure a satisfying hospital birth that they will look back on with peace and joy.

What you need to know to have the best birth experience for you. Drawing upon her thirty-plus years of experience, Ina May Gaskin, the nation's leading midwife, shares the benefits and joys of natural childbirth by showing women how to trust in the ancient wisdom of their bodies for a healthy and fulfilling birthing experience. Based on the female-centered Midwifery Model of Care, Ina May's *Guide to Natural Childbirth* gives expectant mothers comprehensive information on everything from the all-important mind-body connection to how to give birth without technological intervention. Filled with inspiring birth stories and practical advice, this invaluable resource includes:

- Reducing the pain of labor without drugs--and the miraculous roles touch and massage play
- What really happens during labor
- Orgasmic birth--making birth pleasurable
- Episiotomy--is it really necessary?
- Common methods of inducing labor--and which to avoid at all costs
- Tips for maximizing your chances of an unmedicated labor and birth
- How to avoid postpartum bleeding--and depression
- The risks of anesthesia and cesareans--what your doctor doesn't necessarily tell you
- The best ways to work with doctors and/or birth care providers
- How to create a safe, comfortable environment for birth in any setting, including a hospital
- And much more

Ina May's *Guide to Natural Childbirth* takes the fear out of childbirth by restoring women's faith in their own natural power to give birth with more ease, less pain, and less medical intervention.

"What a gift to new and expecting moms. You have no idea the mountain and rollercoaster you're about to embark on, but *Nurture* somehow gives you a peek in and gives you essential information to help ground you." --Catherine McCord, founder of Weelicious and One Potato A comprehensive and judgement-free pregnancy companion: *Nurture* is the only all-in-one pregnancy and birthing book for modern mothers-to-be and their partners who want a more integrative approach. Author Erica Chidi Cohen has assisted countless births and helped hundreds of families ease into their new roles through her work as a doula. *Nurture* covers everything from the beginning months of pregnancy to the baby's first weeks. This empowering book includes:

- Supportive self-care and mindfulness exercises, trimester-specific holistic remedies, nourishing foods and recipes for every month of pregnancy, and expert tips for every birth environment.
- More than 40 charming and helpful illustrations, charts, and lists can be found throughout.
- Dozens of important topics that every modern mom needs to know including fetal development, making choices for a hospital, home or birth center birth, the basics of breastfeeding, tips on what to expect postpartum, and more.

Nurture is an all-inclusive pregnancy and birthing guide book that gives soon-to-be mothers and their partners the information they need to make decisions, feel confident, and enjoy the beauty of creating new life. *Nurture* is a thoughtful and helpful gift for expecting mothers and their partners. Erica Chidi is co-founder and CEO of Loom in Los Angeles, CA. She began her work in San Francisco, volunteering as a doula within the prison system, working with pregnant inmates. She went on to build a successful doula and health education practice in Los Angeles and has been featured in *Women's Health*, *Vogue*, *Goop*, *The Cut* and *Marie Claire*.

The national C-section rate is at an all-time high of 31 percent. Are all these C-sections necessary, or are some of them done simply for the sake of convenience? Inductions seem to be the norm, but are they always needed? Today, expectant mothers are often left feeling powerless, as their instincts are replaced by drugs and routine medical procedures. What you are about to discover is that you have a choice, and you have the power to plan the kind of birth that's right for you--whether it is at a birth center, a hospital, or at home. In *YOUR BEST BIRTH*, internationally known advocates of informed choice Ricki Lake and Abby Epstein inspire women to take back the birth experience, with essential advice on:

- Positive and negative effects of epidurals, Pitocin, and other drugs and interventions
- Inducing vs. allowing your labor to progress naturally
- The truth behind our country's staggering C-section rate
- Assembling your birth team and creating your birth plan.

With chapters such as "Obstetricians: Finding Dr. Right," "Epidurals: You Haven't Got Time for the Pain," and "Electronic Monitors: Reading between the Lines," Lake and Epstein will encourage you to consider whatever your doctor, mother, and best friend may suggest in a new light. The book also includes inspiring birth stories, including those from well-known personalities, such as Laila Ali and Cindy Crawford. Packed with crucial advice from childbirth professionals, and delivered in a down-to-earth, engaging voice, *YOUR BEST BIRTH* is sure to renew your confidence and put the control back where it belongs: with parents-to-be! "Abby Epstein and Ricki Lake have taken a wonderful and constructive approach to ensuring an optimal birthing experience. Their language creates a 'climate of confidence' for pregnant women and their families, who must make key decisions about where, how and with whom to give birth in a health care system often unresponsive to our needs. This book is like a good friend giving wise counsel." --Judy Norsigian, co-editor of *Our Bodies, Ourselves: Pregnancy and Birth* and Executive Director, *Our Bodies Ourselves*

Written by two birth doulas and intuitive healers, this book tells the metaphorical story of a fictional goddess who must walk through 7 Gates of Transformation in order to become a Mother. At the final gate, she must surrender to the ultimate sacrifice--spiritual death--so she can be reborn into motherhood. Each gate perfectly illustrates the 7 emotional, psychological, and often subconscious sacrifices that every laboring woman experiences, whether willingly or not. This book is a guide to help pregnant women understand birth as a divine journey and master how to walk through each gate with empowered sacrifice, purpose, and zeal through tools, rituals, and integrative practices.

"Mama Natural's Week to Week Guide to Pregnancy is the modern (and yet ancient) approach to pregnancy and childbirth. "Natural" recognizes that pregnancy and birth are normal, and that having a baby is a wondrous biological process and rite of passage--not a medical condition. This book draws upon the latest research showing how beneficial and life-changing natural birth is for both babies and moms. Full of weekly advice and tips for a healthy pregnancy, Grace details vital nutrition to take, natural remedies for common and troublesome symptoms, as well as the appropriate (and inappropriate) use of interventions. Pregnancy, childbirth, health, health and wellness, parenting, family"--

Praise for the previous edition: "...An outstanding handbook. It will be a familiar volume on most midwifery bookshelves, providing an excellent guide to midwifery focused care of both woman and child in the birthing setting." - Nursing Times Online

Providing a practical and comprehensive guide to midwifery care, *The Midwife's Labour and Birth Handbook* continues to promote best practice and a safe, satisfying birthing experience with a focus on women-centred care. Covering all aspects of care during labour and birth, from obstetric emergencies to the practicalities of perineal repair (including left-hand suturing), the fourth edition has been fully revised and updated to include: Full colour

photographs of kneeling extended breech and footling breech births New water birth and breech water birth photographs Female genital mutilation Sepsis Group B streptococcus Care of the woman with diabetes /Neonatal hypoglycaemia Mental health Seeding/microbirthing It also addresses important issues such as: Why are the numbers of UK women giving birth in stirrups RISING rather than falling? Why are so few preterm babies given bedside resuscitation with the cord intact? Would the creation of midwife breech practitioners/specialists enable more women to choose vaginal breech birth and is breech water birth safe? What is the legal position for women who choose to free birth – and their birth partners? Why are midwives challenging the OASI care bundle? Incorporating research, evidence and anecdotal observations, *The Midwife's Labour and Birth Handbook* remains an essential resource for both student midwives and experienced practising midwives.

A candid, feminist, and personal deep dive into the science and culture of pregnancy and motherhood Like most first-time mothers, Angela Garbes was filled with questions when she became pregnant. What exactly is a placenta and how does it function? How does a body go into labor? Why is breast best? Is wine totally off-limits? But as she soon discovered, it's not easy to find satisfying answers. Your obstetrician will cautiously quote statistics; online sources will scare you with conflicting and often inaccurate data; and even the most trusted books will offer information with a heavy dose of judgment. To educate herself, the food and culture writer embarked on an intensive journey of exploration, diving into the scientific mysteries and cultural attitudes that surround motherhood to find answers to questions that had only previously been given in the form of advice about what women ought to do—rather than allowing them the freedom to choose the right path for themselves. In *Like a Mother*, Garbes offers a rigorously researched and compelling look at the physiology, biology, and psychology of pregnancy and motherhood, informed by in-depth reportage and personal experience. With the curiosity of a journalist, the perspective of a feminist, and the intimacy and urgency of a mother, she explores the emerging science behind the pressing questions women have about everything from miscarriage to complicated labors to postpartum changes. The result is a visceral, full-frontal look at what's really happening during those nine life-altering months, and why women deserve access to better care, support, and information. Infused with humor and born out of awe, appreciation, and understanding of the female body and its strength, *Like a Mother* debunks common myths and dated assumptions, offering guidance and camaraderie to women navigating one of the biggest and most profound changes in their lives.

For thousands of years women have given birth among people they know in a place they know well. Knowledge is shared between the participants and birth is a social event. In this new, revised edition of her classic book, Sheila Kitzinger explores the universal experience of pregnancy and birth. She looks closely at the place of birth, what is done to help women in childbirth and examines the bond traditionally formed between mothers and midwives.

"Britta, you are a master at what you do." —P!NK, Grammy-winning singer-songwriter As expecting parents, you're bombarded with more information—and opinions—than ever about the "right" approach to pregnancy and childbirth. How do you navigate this ocean of information—not only to find the best practical solutions for you personally, but also to embrace this incredible opportunity for emotional and spiritual transformation that comes from bringing a child into this world? With *Transformed by Birth*, Dr. Britta Bushnell has created the transformative, intelligent, and empowering pregnancy and childbirth guide you've been waiting for. This book embraces birth as a metamorphic experience—a rite of passage in which you are initiated by opening to the unbidden, embodying your own wisdom, and gaining freedom from limiting beliefs. Our culture has inundated us with limiting ideals that prevent us from fully engaging in the journey of pregnancy and childbirth—including a need for control and certainty, vilification of pain, and reverence for technology and intellectual knowledge, among others. Dr. Bushnell helps you clear away unwanted beliefs and behaviors so you can open to the meaning and power of this uniquely life-changing experience. Here she offers daily practices, rituals, exercises, and more to help you cultivate resilience, power, and connection during this transformative time.

Childbirth is more than just having a baby. *Transformed by Birth* invites you to discover childbirth as a transformational experience that alters your knowing of who you are and lasts long after pregnancy and birth are over.

A troubling study of the role that medical racism plays in the lives of black women who have given birth to premature and low birth weight infants Black women have higher rates of premature birth than other women in America. This cannot be simply explained by economic factors, with poorer women lacking resources or access to care. Even professional, middle-class black women are at a much higher risk of premature birth than low-income white women in the United States. Dána-Ain Davis looks into this phenomenon, placing racial differences in birth outcomes into a historical context, revealing that ideas about reproduction and race today have been influenced by the legacy of ideas which developed during the era of slavery. While poor and low-income black women are often the "mascots" of premature birth outcomes, this book focuses on professional black women, who are just as likely to give birth prematurely. Drawing on an impressive array of interviews with nearly fifty mothers, fathers, neonatologists, nurses, midwives, and reproductive justice advocates, Dána-Ain Davis argues that events leading up to an infant's arrival in a neonatal intensive care unit (NICU), and the parents' experiences while they are in the NICU, reveal subtle but pernicious forms of racism that confound the perceived class dynamics that are frequently understood to be a central factor of premature birth. The book argues not only that medical racism persists and must be considered when examining adverse outcomes—as well as upsetting experiences for parents—but also that NICUs and life-saving technologies should not be the only strategies for improving the outcomes for black pregnant women and their babies. Davis makes the case for other avenues, such as community-based birthing projects, doulas, and midwives, that support women during pregnancy and labor are just as important and effective in avoiding premature births and mortality.

Why does the right dominate debates on crime, family values, and economic freedom? Why does the left defend such arbitrary and divisive aspects of affirmative action, while equivocating on questions of ecology and political empowerment for young people? The answer, Cummings believes, is that too many progressives have avoided politically sensitive issues, condemning themselves to intellectual atrophy and political ineffectiveness. Cummings clearly is not an advocate for the "self-serving, hypocritical right." But he contends that the left handicaps itself with political correctness, and that frank analysis of taboo topics requires us to move beyond the traditional dichotomy of left and right. With passion and rigor, he argues for a transformation of U.S. culture and institutions that will enable individuals to pursue their vital interests without impinging on the rights of others and undermining the public good.

Designed to transform the experience of childbirth, this manual calls upon the use of the timeless and powerful symbol of the labyrinth in 12 simple meditations and ceremonies. Ideal as a tool for centering the self and calming the body and mind, this guide ushers readers through the inner journey of the childbearing year—from pregnancy and labor through the postpartum stage. A variety of labyrinths—including four childbirth-related labyrinths from the Hopi and Papago cultures in the American Southwest and two others from India—are presented in this handbook and cover topics that include helping mothers focus on their emotional and spiritual state preparation for birth, aid in calming the mind and steadying breathing during birth, and allowing parents to fully process their experiences. Instructions for drawing a classic labyrinth, ideas for personalizing the design, and labyrinth "seeds"—start-up patterns for six variations of labyrinth—are also included. The timeless and powerful symbol of the labyrinth forms the core of this collection of 12 simple meditations and ceremonies designed to transform the experience of childbirth. The inner journey through the childbearing year—from pregnancy through labor and postpartum stages—is enhanced through the use of labyrinths as a tool for meditation and centering. Studies show that walking or finger-tracing a labyrinth slows down and balances brain waves, calms the body and mind, and helps access intuitive knowing. During pregnancy, labyrinth meditations help the mother focus on her emotional and spiritual preparation for birth and mothering. In labor, the labyrinth helps to calm the mind, steady the breath, and ease pain. Postpartum, the Birth Story Labyrinth helps parents process and integrate their experience in labor. A variety of labyrinths—including four childbirth-related labyrinths from the Hopi and Papago cultures in the American Southwest and two others from India—are presented in this handbook. Instructions for drawing a classic labyrinth, ideas for personalizing the design, and labyrinth "seeds"—start-up patterns for six variations of labyrinth—are also included. The labyrinth meditations and rituals may be practiced privately or may be used to enrich mother blessing ceremonies and baby showers.

The Waterbirth Book is the comprehensive guide to all aspects of waterbirth and the use of water throughout pregnancy and during infancy.

Here is a holistic approach to childbirth that examines this profound rite-of-passage not as a medical event but as an act of self-discovery. Exercises and activities such as journal writing, meditation, and painting will help mothers analyze their thoughts and face their fears during pregnancy. For use during birth, the book offers proven techniques for coping with labor pain without drugs, a discussion of the doctor or midwife's role, and a look at the father's responsibilities. Childbirth education should also include what to expect after the baby is born. Here are baby basics, such as how to bathe a newborn, how to get the little one to sleep, and tips for getting nursing off to a good start. Pregnancy, birth, and postpartum is a process of continuous learning and adjustment; Birthing From Within provides the necessary support and education to make each phase of birthing a rewarding experience.

The delivery of high quality and equitable care for both mothers and newborns is complex and requires efforts across many sectors. The United States spends more on childbirth than any other country in the world, yet outcomes are worse than other high-resource countries, and even worse for Black and Native American women. There are a variety of factors that influence childbirth, including social determinants such as income, educational levels, access to care, financing, transportation, structural racism and geographic variability in birth settings. It is important to reevaluate the United States' approach to maternal and newborn care through the lens of these factors across multiple disciplines. Birth Settings in America: Outcomes, Quality, Access, and Choice reviews and evaluates maternal and newborn care in the United States, the epidemiology of social and clinical risks in pregnancy and childbirth, birth settings research, and access to and choice of birth settings.

This text examines the research and evidence connecting birth practices to breastfeeding outcomes. It takes an in-depth look at the post-birth experiences of the mother and baby, using the baby's health as the vehicle and the intact mother-baby dyad as the model to address birth practices that affect breastfeeding. The Second Edition has been completely revised to include new information on infant outcomes, including epidural anesthesia and Cesarean surgery, clinical strategies for helping the mother and baby recover from birth injuries, medications and complications, and information on Baby-Friendly Hospital Initiatives with a Mother-Friendly Module."

With Mindful Birthing, Nancy Bardacke, nurse-midwife and mindfulness teacher, lays out her innovative program for pregnancy, childbirth, and beyond. Drawing on groundbreaking research in neuroscience, mindfulness meditation, and mind/body medicine, Bardacke offers practices that will help you find calm and ease during this life-changing time, providing lifelong skills for healthy living and wise parenting. **SOME OF THE BENEFITS OF MINDFUL BIRTHING:** Increases confidence and decreases fear of childbirth Taps into deep inner resources for working with pain Improves couple communication, connection, and cooperation Provides stress-reducing skills for greater joy and wellbeing

An inclusive, non-judgmental, and empowering guide to pregnancy, childbirth, and postpartum life that puts mothers first, offering straightforward guidance on all the options and issues that matter most to them (and their partners) when preparing for a baby. In Birth Without Fear, January Harshe--founder of the global online community Birth Without Fear--delivers an honest, positive, and passionate message of empowerment surrounding everything that involves having a baby. It's a guide that fills in the considerable cracks in the information available to women and families when they're preparing to welcome a child--covering care provider choices, medical freedom, birth options, breastfeeding, intimacy, postpartum depression, and much more. Birth Without Fear shows moms, dads, partners, and families how to choose the best provider for them, how to trust in themselves and the birth process, and how to seek the necessary help after the baby has arrived. In addition, it will educate them about their rights--and how to use their voice to exercise them--as well as how to cope with the messy postpartum feelings many people aren't willing to talk about. Unlike other pregnancy books, Birth Without Fear will also help partners understand what mothers are going through, as well as discuss the challenges that they, too, will face--and how they can navigate them. Shattering long-held myths and beliefs surrounding pregnancy, birth, and the postpartum experience, Birth Without Fear is an accessible, reassuring, and ultimately inspiring guide to taking charge of pregnancy, childbirth, and beyond.

"Giving birth is the pivotal moment of a woman's life but it is often treated as a medical procedure, and not as a rite of passage. Birthing from Within offers parents engaging and memorable ways for pregnant women, and their partners, to activate personal, social and spiritual resources that will guide them through labour and afterwards. Many birth classes teach from the 'outside', from the perspective of the professional. Yet, knowledge of anatomy and the stages of labour can often seem irrelevant in the intensity of contraction. The pregnant woman needs to know about labour and birth from her own perspective, she needs to be prepared for birthing from within. Pam England offers a method that allows a woman to fully understand her own strengths and resources. The self-discoveries made during

pregnancy makes birth life-enhancing and empowers the future of the family. It is a multi-sensory and holistic approach that aims to make parents feel positively informed about what they are about to experience, confident about the birth of their child. Pain is an inevitable part of childbirth but Birthing from Within provides resources for building pain-coping confidence in parents. It gives detailed instructions on dealing with normal labour pain and when the humane use of drugs may be called for."--Cover.

Despite the amazing amount of knowledge, training, and learning materials available to pregnant people, parents frequently emerge from the birth experience feeling lost - like they were lacking a map to navigate the transformation, uncertainty, and soul opening that would accompany childbirth, as well as a map for processing and integrating their experience afterward. This book will take you on a hunting expedition - a journey through your psyche, your mind, and the many experiences you have lived up until this moment. It will help you access a deep well of knowledge that you couldn't find in a whole library full of books, and open doors to new ways of being and doing. It will help you navigate your birth experience, and come out the other side more emotionally intact, regardless of the specific events of your birth. Regardless of where or how you're hoping to give birth, this book will take you beyond the external noise, advice, stories, and dogma around childbirth to help you build a pain coping mindset, cultivate self-love, connect with your partner and community, engage in ritual and ceremony, find your voice, foster resilience, develop psychological flexibility, gain clarity on your internal and external resources, access inner wisdom, identify limiting beliefs, grow your Parent Archetype, and heal your mind and body after birth. Every parent deserves compassionate guidance and mentoring as they prepare to be initiated by birth. Your courage, efforts, and reflections in your journal will help you navigate the unknown and come through this rite of passage with resolve and self-compassion, no matter how your birth unfolds.

Childbirth is a quintessential family event that simultaneously holds great promise and runs the risk of danger. By the late nineteenth century, the birthing room had become a place where the goals of the new scientific professional could be demonstrated, but where traditional female knowledge was in conflict with the new ways. Here the choice of attendants and their practices defined gender, ethnicity, class, and the role of the professional. Using the methodology of social science theory, particularly quantitative statistical analysis and historical demography, Charlotte Borst examines the effect of gender, culture, and class on the transition to physician-attended childbirth. Earlier studies have focused on physician opposition to midwifery, devoting little attention to the training for and actual practice of midwifery. As a result, until now we knew little about the actual conditions of the midwife's education and practice. *Catching Babies* is the first study to examine the move to physician-attended birth within the context of a particular community. It focuses on four representative counties in Wisconsin to study both midwives and physicians within the context of their community. Borst finds that midwives were not pushed out of practice by elitist or misogynist obstetricians. Instead, their traditional, artisanal skills ceased to be valued by a society that had come to embrace the model of disinterested, professional science. The community that had previously hired midwives turned to physicians who shared ethnic and cultural values with the very midwives they replaced.

At last—everything expecting moms need to know about giving birth Childbirth is one of the most significant events of any woman's life—and for many, also a source of enormous anxiety and fear. In *The Big Book of Birth* renowned childbirth educator and Realbirth Center founder Erica Lyon offers an antidote to that fear with a comprehensive and up-to-date guide to childbirth. Drawing from more than a decade of teaching expecting parents what really to expect, Lyon fills the void that currently exists in childbirth literature, offering clear, current, objective advice on everything from choosing your doctor or midwife, to the realities of assisted and cesarean births, to the many different pain-coping options you can use during delivery and proven techniques that can help you relax and often speed along your labor. *The Big Book of Birth* guides women through the four stages of labor, dispelling misconceptions and providing a wealth of objective information in a warm, welcoming, and well-organized format. A long-overdue resource, *The Big Book of Birth* gives expectant mothers the knowledge they need to approach childbirth with confidence and joy.

The integrative model of childbirth described in this book will provide women with the information needed to prepare for birth, how to think and feel about labor, and how to tell their story. During their childbearing year, women traverse two paths at once: an inner path of psychological and spiritual awareness and an outer path of practical approaches to birth in modern-day culture. The book combines scientific research with meditation, ceremony, art, and mythic stories, which not only prepares childbearing women to go beyond their edge into uncharted territory but to find their way home again. The underlying message throughout is not to strive for a perfect birth but to be mindful of the mythic journey, of all the mothers who have come before an awareness that leads not only to the birth of a child but to the birth of a new self."

More and more parents-to-be all over the world are choosing the comfort and reassuring support of birth with a trained labor companion called a "doula." This warm, authoritative, and irreplaceable guide completely updates the authors' earlier book, *Mothering the Mother*, and adds much new and important research. In addition to basic advice on finding and working with a doula, the authors show how a doula reduces the need for cesarean section, shortens the length of labor, decreases the pain medication required, and enhances bonding and breast feeding. The authors, world-renowned authorities on childbirth with combined experience of over 100 years working with laboring women, have made their book indispensable to every woman who wants the healthiest, safest, and most joyful possible birth experience.

The classic guide to an unmedicated childbirth, fully revised for the twenty-first century—with updated information and attractive new illustrations and photos throughout. For women birthing vaginally, 90% of Bradley births are drug-free! The Bradley Method®, used and praised by women for almost seventy years, prepares you for drug and surgery-free childbirth and puts you in control by providing the tools to navigate evidence-based care. Certified childbirth educator Susan McCutcheon, one of Dr. Bradley's first students, now makes this natural approach to childbirth more accessible than ever. You will learn: • Exercises and nutrition to get your body ready for birthing • To defuse fear by understanding all aspects of laboring • How to involve your partner as a birth coach and a fully engaged participant • What's driving the induction epidemic and how to avoid an unnecessary induction • What's driving the cesarean surgery epidemic and how to reduce your risk • How to get the information you need to make informed decisions about your birth "The Bradley Method's simple objective, through relaxation, breathing, and visualization, is a birth free of the interventions frequently offered to women in the different stages of childbirth: fetal monitors, drug-induced labor, anesthesia, episiotomy, and Caesarean section. (Its) other defining feature, the husband's active participation in the delivery, is critical to this overall goal of an intervention-free birth."—*Mothering*

This is a unique book of Noongar and Yaatji mothers' accounts of their birthing experiences. These Elder and Senior women have generously shared their stories as a legacy for their families and communities, and as an educational tool for midwives.
