

Black Labor White Wealth The Search For Power And Economic Justice

This innovative study re-examines the dynamics of race relations in the post--Civil War South from an altogether fresh perspective: field sports. In the late nineteenth and early twentieth centuries, wealthy white men from Southern cities and the industrial North traveled to the hunting and fishing lodges of the old Confederacy -- escaping from the office to socialize among like-minded peers. These sportsmen depended on local black guides who knew the land and fishing holes and could ensure a successful outing. For whites, the ability to hunt and fish freely and employ black laborers became a conspicuous display of their wealth and social standing. But hunting and fishing had been a way of life for all Southerners -- blacks included -- since colonial times. After the war, African Americans used their mastery of these sports to enter into market activities normally denied people of color, thereby becoming more economically independent from their white employers. Whites came to view black participation in hunting and fishing as a serious threat to the South's labor system. Scott E. Giltner shows how African-American freedom developed in this racially tense environment -- how blacks' sense of competence and authority flourished in a Jim Crow setting. Giltner's thorough research using slave narratives, sportsmen's recollections, records of fish and game clubs, and sporting periodicals offers a unique perspective on the African-American struggle for independence from the end of the Civil War to the 1920s. -- Stephen A. NEW YORK TIMES BESTSELLER • LONGLISTED FOR THE NATIONAL BOOK AWARD • One of today's most insightful and influential thinkers offers a powerful exploration of inequality and the lesson that generations of Americans have failed to learn: Racism has a cost for everyone—not just for people of color. **LONGLISTED FOR THE ANDREW CARNEGIE MEDAL** • “This is the book I’ve been waiting for.”—Ibram X. Kendi, #1 New York Times bestselling author of *How to Be an Antiracist* Heather McGhee’s specialty is the American economy—and the mystery of why it so often fails the American public. From the financial crisis of 2008 to rising student debt to collapsing public infrastructure, she found a root problem: racism in our politics and policymaking. But not just in the most obvious indignities for people of color. Racism has costs for white people, too. It is the common denominator of our most vexing public problems, the core dysfunction of our democracy and constitutive of the spiritual and moral crises that grip us all. But how did this happen? And is there a way out? McGhee embarks on a deeply personal journey across the country from Maine to Mississippi to California, tallying what we lose when we buy into the zero-sum paradigm—the idea that progress for some of us must come at the expense of others. Along the way, she meets white people who confide in her about losing their homes, their dreams, and their shot at better jobs to the toxic mix of American racism and greed. This

is the story of how public goods in this country—from parks and pools to functioning schools—have become private luxuries; of how unions collapsed, wages stagnated, and inequality increased; and of how this country, unique among the world's advanced economies, has thwarted universal healthcare. But in unlikely places of worship and work, McGhee finds proof of what she calls the Solidarity Dividend: the benefits we gain when people come together across race to accomplish what we simply can't do on our own. *The Sum of Us* is not only a brilliant analysis of how we arrived here but also a heartfelt message, delivered with startling empathy, from a black woman to a multiracial America. It leaves us with a new vision for a future in which we finally realize that life can be more than a zero-sum game.

'Man, Know Thyself' is perhaps one of the world's oldest and most important sayings. This adage was originally coined by Imhotep the world's first multi-genius and perhaps the greatest creative mortal individual who ever lived. Imhotep lived over five and a half thousand years ago from our present age. It must be said immediately that Imhotep was an African. He is among our first Notable Ancestors. Considering Imhotep's instruction, it means that as individuals, as a family, collectively as a people, a community, a society or a nation, we should know ourselves; that is, who we are. This includes knowledge of who spawned us, where we have been and where we currently are. Knowing this, as our Notable Ancestor and Grandmaster Teacher (Baba) Dr John Henrik Clarke has said, will tell us who we are and where we must get to. Who we are is dependent on who we were. Who we were should determine who we should be. To emphasise the point, Marcus Garvey, another of our most important Notable Ancestors, frequently reiterated this advice when he reminded us that our first obligation is to know ourselves. He told us that we should make our knowledge about us so complete so as to make it impossible for others to take advantage of us. He told us that in order to know ourselves we must know who our Ancestors were and what they achieved. We would then realize who we are and what we are capable of achieving. This is the meaning of the African adage and Sankofa symbol of 'looking back in order to go forward'. The importance of knowing our ancestors has been summed up in an old Native American saying that 'It is the spirit of our ancestors that should guide our path'. There is a sense however that Africans have forgotten our ancestors. Because of this, there is no 'spirit' to guide us and so Africans are lost and confused. The roots of African spirituality and culture have been made redundant. Yet as Dr Clarke points out, the umbilicord that tied Africans to our spiritual and cultural roots have only been

stretched. It has never been broken. It is for Africans to come to this realization and to rediscover the spirit of our ancestors. This volume lists some of our Notable Ancestors in the hope that knowledge about them and their achievements will aid some of us in understanding where we have been, who we presently are and consequently who we must become. Ultimately, it is hoped that we may use this knowledge to reconnect with the spirit of our Ancestors and let them be our guide. This volume is based on the 'truth' about Africans and therefore correcting what is 'told' about us. This 'corrective knowledge' of us is important because as Imhotep said; 'Know the truth and the truth shall set you free'. This means being free to interpret our own story and to define who we are. This is crucial because although 'history' is a witness to the truths, 'history' has been 'stolen' by others who have hidden the truths about us. 'History' has never been true or kind to Africans and therefore it cannot tell us about us. Yet as Peter Tosh intimated, we cannot come to a consciousness of ourselves, of who we are, if we do not know the truths about us. 'History' has been described as the 'Queen' of the academic subjects. So important is History that it is said that 'whoever controls history, controls the future'. In one sense education in general and history in particular is about teaching us who we are. History teaches who we are so as to help us to know where we belong in our community (or society). Africans cannot know where we belong in society however, because our story has been told by 'others' (those who 'own history'). Africans are therefore unaware of who we are because what is 'known' about us is not the truth about us. The story of Africans, the oldest people on earth, like the history of the world, is taught by 'others'. Yet these others came into the world thousands of years after Africans had already established great civ

Decolonizing Wealth is a provocative analysis of the dysfunctional colonial dynamics at play in philanthropy and finance. Award-winning philanthropy executive Edgar Villanueva draws from the traditions from the Native way to prescribe the medicine for restoring balance and healing our divides. Though it seems counterintuitive, the philanthropic industry has evolved to mirror colonial structures and reproduces hierarchy, ultimately doing more harm than good. After 14 years in philanthropy, Edgar Villanueva has seen past the field's glamorous, altruistic façade, and into its shadows: the old boy networks, the savior complexes, and the internalized oppression among the "house slaves," and those select few people of color who gain access. All these funders reflect and perpetuate the same underlying dynamics that divide Us from Them and the haves from have-nots. In equal measure, he denounces the reproduction of systems of oppression while also advocating for an orientation towards justice to open the floodgates for a rising tide that lifts all boats. In the third and final section, Villanueva offers radical provocations to funders and outlines his Seven Steps for Healing. With great compassion—because the Native way is to bring the oppressor into the circle of healing—Villanueva is able to both diagnose the fatal flaws in philanthropy and provide thoughtful solutions to these systemic

imbalances. Decolonizing Wealth is a timely and critical book that preaches for mutually assured liberation in which we are all inter-connected.

The award-winning Black Wealth / White Wealth offers a powerful portrait of racial inequality based on an analysis of private wealth. Melvin Oliver and Thomas Shapiro's groundbreaking research analyzes wealth - total assets and debts rather than income alone - to uncover deep and persistent racial inequality in America, and they show how public policies have failed to redress the problem. First published in 1995, Black Wealth / White Wealth is considered a classic exploration of race and inequality. It provided, for the first time, systematic empirical evidence that explained the racial inequality gap between blacks and whites. The Tenth Anniversary edition contains two entirely new and substantive chapters. These chapters look at the continuing issues of wealth and inequality in America and the new policies that have been launched in the past ten years. Some have been progressive while others only recreate inequality - for example the proposal to eliminate the estate tax. Compelling and also informative, Black Wealth / White Wealth is not just pioneering research. It is also a powerful counterpoint to arguments against affirmative action and a direct challenge to current social welfare policies that are tilted towards the wealthy.

Racism and discrimination have choked economic opportunity for African Americans at nearly every turn. At several historic moments, the trajectory of racial inequality could have been altered dramatically. Perhaps no moment was more opportune than the early days of Reconstruction, when the U.S. government temporarily implemented a major redistribution of land from former slaveholders to the newly emancipated enslaved. But neither Reconstruction nor the New Deal nor the civil rights struggle led to an economically just and fair nation. Today, systematic inequality persists in the form of housing discrimination, unequal education, police brutality, mass incarceration, employment discrimination, and massive wealth and opportunity gaps. Economic data indicates that for every dollar the average white household holds in wealth the average black household possesses a mere ten cents. In From Here to Equality, William Darity Jr. and A. Kirsten Mullen confront these injustices head-on and make the most comprehensive case to date for economic reparations for U.S. descendants of slavery. After opening the book with a stark assessment of the intergenerational effects of white supremacy on black economic well-being, Darity and Mullen look to both the past and the present to measure the inequalities borne of slavery. Using innovative methods that link monetary values to historical wrongs, they next assess the literal and figurative costs of justice denied in the 155 years since the end of the Civil War. Finally, Darity and Mullen offer a detailed roadmap for an effective reparations program, including a substantial payment to each documented U.S. black descendant of slavery. Taken individually, any one of the three eras of injustice outlined by Darity and Mullen--slavery, Jim Crow, and modern-day discrimination--makes a powerful case for black reparations. Taken collectively, they are impossible to ignore.

Across the realms of multimedia production, information design, web development, and usability, certain truisms are apparent. Like an Art of War for design, this slim volume contains guidance, inspiration, and reassurance for all those who labor with the user in mind. If you work on the web, in print, or in film or video, this book can help. If you know someone working on the creative arena, this makes a great gift. Funny, too.

One of the greatest challenges for the African American community is a severe lack of power. Like caged animals in the zoo, millions of black people in America and across the world often feel that our lives are controlled by other people or that opportunities only enter our lives when they are created by our oppressors. This debilitating mindset can lead to hopelessness, depression and decision-making that is driven by fear rather than desire. Instead of believing that we possess the ability to improve our lives, we simply wait and hope that White Americans will one day have a change of heart. Black American Money is written to kill the victim mentality and help us to see the world for what it really is. There is no power for the victim, the beggar, or the one who simply prays, hopes and waits for their oppressor to give them what they need. According to Finance PhD and noted scholar Dr Boyce Watkins, the world is never going to be nicer to black people and whites are never going to give us enough opportunity to sustain the masses. Instead, they will only volunteer enough crumbs to keep us under control and offer superficial congratulations for meaningless accomplishments within the pre-approved context of white supremacist institutions. It is only through proactive positioning, extensive preparation and institution building that black people can ever have any true power in America and beyond. Through a series of compelling essays and thought-provoking analysis, Dr Watkins hits the nail on the head in ways that only he can do. This book will shape your thinking, rivet your mindset and lead you to a whole new way of seeing racial inequality in America and beyond. This book will make you a champion.

"Rich reveals significant economic moments in history that have helped shape America--slavery, sharecropping, convict leasing, the Little Rock Nine, Black Wall Street, Civil Rights, The Great Recession, Black Lives Matter, and several other milestones. The book highlights important figures--some renowned, and some lesser known; that have made these black historical moments possible through their personal, diligent efforts."--Page [4] of cover.

"Being Black, Living in the Red is an important book. In Conley's persuasive analysis the locus of current racial inequality resides in class and property relations, not in the labor market. This carefully written and meticulous book not only provides a compelling explanation of the black-white wealth differential, it also represents the best contribution to the race-class debate in the past two decades."—William Julius Wilson, author of When Work Disappears: The World of the New Urban Poor "In Being Black, Living in the Red, Dalton Conley has taken the discussion of race and inequality into important new territory. Even as income inequality is shrinking, Conley shows, the wealth gap endures. That gap, he argues lucidly, explains much of the persisting 'two societies' phenomenon—it contributes significantly to inequalities in education, work, even family structure. Those concerned about equity in America will find this book indispensable reading."—David Kirp, author of Our Town: Race, Housing, and the Soul of America "With methodological sophistication Dalton Conley's well written book makes a significant contribution to our understanding of the precarious social and economic

predicament that African Americans continue to experience."—Martin Sanchez-Jankowski, author of *City Bound: Urban Life and Political Attitudes Among Chicano Youth* "Picking up where Oliver and Shapiro (*Black Wealth, White Wealth*) left off, Conley details how and why facets of net worth cascade into long-term inequalities. All sides will be impressed with Conley's thorough scholarship and richly detailed analysis."—Troy Duster, co-editor of *Cultural Perspectives on Biological Knowledge* "Being Black, Living in the Red is the most convincing analysis yet of the importance of wealth for the life chances of African Americans. Thanks to Conley's stunning data and adroit theoretical discussions, social scientists and policymakers can no longer ignore wealth as they attempt to deal with the thorny issue of racial inequality. A must read!"—Melvin L. Oliver, author of *Black Wealth, White Wealth: A New Perspective on Racial Inequality*

Why has the large income gap between blacks and whites persisted for decades after the passage of civil rights legislation? More specifically, why do African Americans remain substantially underrepresented in the highest-paying professions, such as science, engineering, information technology, and finance? A sophisticated study of racial disparity, *Opting Out* examines why some talented black undergraduates pursue lower-paying, lower-status careers despite being amply qualified for more prosperous ones. To explore these issues, Maya A. Beasley conducted in-depth interviews with black and white juniors at two of the nation's most elite universities, one public and one private. Beasley identifies a set of complex factors behind these students' career aspirations, including the anticipation of discrimination in particular fields; the racial composition of classes, student groups, and teaching staff; student values; and the availability of opportunities to network. Ironically, Beasley also discovers, campus policies designed to enhance the academic and career potential of black students often reduce the diversity of their choices. Shedding new light on the root causes of racial inequality, *Opting Out* will be essential reading for parents, educators, students, scholars, and policymakers.

ufus Shaw's Book, "Hustling: The Art of Black financial Survival," is a simple, common sense guide on how black business people can survive and even prosper if they know what they are doing. Show, whose first book was "How to be Rich nigger," has two degrees from Southern Methodist University in Dallas. He said his street sense was learned in the predominantly black section of South Dallas. Using Humor, poetry and a smattering of profanity, Shaw avoids complicated economic formulas. He starts off by defining hustling: .."making something positive happen under difficult circumstances by using a combination of common sense, understanding of human nature, daring and hard work." In his straight forward style, Shaw Discusses such topics as understanding man from a street perspective, business from that same perspective, the educated fool, going broke and investments. The book is quick and easy reading. Shaw Breaks no new ground as he drops numerous jewels on his readers: " Without some form of education you're lost. Racism will you down, but ignorance will knock you out!" or "When money is in hand, pay your bills on time, when money is short, pay in 60 days, when money is shortest, pay something, but never pay nothing." or: "If you're sued, it is not the end of the world. Millions of people have been sued and have judgments pending..but they live everyday, normal lives. There's no "X" marked on their forehead.. Sure, it'll mess up your credit. The minute the bill collectors start calling, your credit was

"Screwed." Shaw also devotes a chapter on crime and how it can be a money maker, but not without risks, for black people. There even is a subheading entitled, "Prison University." He does not preach, but he does touch many bases in a fact filled and entertaining 103 page book. Shaw's greatest success in this to me is pulling together a lot of basic wisdom and putting it down in black and white. "An eloquent and essential correction to contemporary discussions of the American working class."--The Nation From the ongoing issues of poverty, health, housing and employment to the recent upsurge of lethal police-community relations, the black working class stands at the center of perceptions of social and racial conflict today. Journalists and public policy analysts often discuss the black poor as "consumers" rather than "producers," as "takers" rather than "givers," and as "liabilities" instead of "assets." In his engrossing new history, *Workers on Arrival*, Joe William Trotter, Jr. refutes these perceptions by charting the black working class's vast contributions to the making of America. Covering the last four hundred years since Africans were first brought to Virginia in 1619, Trotter traces black workers' complicated journey from the transatlantic slave trade through the American Century to the demise of the industrial order in the 21st century. At the center of this compelling, fast-paced narrative are the actual experiences of these African American men and women. A dynamic and vital history of remarkable contributions despite repeated setbacks, *Workers on Arrival* expands our understanding of America's economic and industrial growth, its cities, ideas, and institutions, and the real challenges confronting black urban communities today.

It's no secret that these hard times have been even harder for the Black community. Approximately 35 percent of African Americans had no measurable assets in 2009, and 24 percent of these same households had only a motor vehicle. Dennis Kimbro, observing how the weight of the continuing housing and credit crises disproportionately impacts the African-American community, takes a sharp look at a carefully cultivated group of individuals who've scaled the heights of success and how others can emulate them. Based on a seven year study of 1,000 of the wealthiest African Americans, *The Wealth Choice* offers a trove of sound and surprising advice about climbing the economic ladder, even when the odds seem stacked against you. Readers will learn about how business leaders, entrepreneurs, and celebrities like Bob Johnson, Spike Lee, L. A. Reid, Herman Cain, T. D. Jakes and Tyrese Gibson found their paths to wealth; what they did or didn't learn about money early on; what they had to sacrifice to get to the top; and the role of discipline in managing their success. Through these stories, which include men and women at every stage of life and in every industry, Dennis Kimbro shows readers how to:

- Develop a wealth-generating mindset and habits
- Commit to lifelong learning

A New York Times Book Review Editors' Choice The fascinating, forgotten story of the 1970s attempt to build a city dedicated to racial equality in the heart of "Klan Country" In 1969, with America's cities in turmoil and racial tensions high, civil rights leader Floyd McKissick announced an audacious plan: he would build a new city in rural North Carolina, open to all but intended primarily to benefit Black people. Named Soul City, the community secured funding from the Nixon administration, planning help from Harvard and the University of North Carolina, and endorsements from the New York Times and the Today show. Before long,

the brand-new settlement – built on a former slave plantation – had roads, houses, a health care center, and an industrial plant. By the year 2000, projections said, Soul City would have fifty thousand residents. But the utopian vision was not to be. The race-baiting Jesse Helms, newly elected as senator from North Carolina, swore to stop government spending on the project. Meanwhile, the liberal Raleigh News & Observer mistakenly claimed fraud and corruption in the construction effort. Battered from the left and the right, Soul City was shut down after just a decade. Today, it is a ghost town – and its industrial plant, erected to promote Black economic freedom, has been converted into a prison. In a gripping, poignant narrative, acclaimed author Thomas Healy resurrects this forgotten saga of race, capitalism, and the struggle for equality. Was it an impossible dream from the beginning? Or a brilliant idea thwarted by prejudice and ignorance? And how might America be different today if Soul City had been allowed to succeed?

Americans have built an empire on the idea of "race," a falsehood that damages us all but falls most heavily on the bodies of black women and men—bodies exploited through slavery and segregation, and, today, threatened, locked up, and murdered out of all proportion. What is it like to inhabit a black body and find a way to live within it? And how can we all honestly reckon with this fraught history and free ourselves from its burden? *Between the World and Me* is Ta-Nehisi Coates's attempt to answer these questions in a letter to his adolescent son. Coates shares with his son—and readers—the story of his awakening to the truth about his place in the world through a series of revelatory experiences, from Howard University to Civil War battlefields, from the South Side of Chicago to Paris, from his childhood home to the living rooms of mothers whose children's lives were taken as American plunder. Beautifully woven from personal narrative, reimagined history, and fresh, emotionally charged reportage, *Between the World and Me* clearly illuminates the past, bravely confronts our present, and offers a transcendent vision for a way forward.

The colorful charts, graphs, and maps presented at the 1900 Paris Exposition by famed sociologist and black rights activist W. E. B. Du Bois offered a view into the lives of black Americans, conveying a literal and figurative representation of "the color line." From advances in education to the lingering effects of slavery, these prophetic infographics —beautiful in design and powerful in content—make visible a wide spectrum of black experience. W. E. B. Du Bois's *Data Portraits* collects the complete set of graphics in full color for the first time, making their insights and innovations available to a contemporary imagination. As Maria Popova wrote, these data portraits shaped how "Du Bois himself thought about sociology, informing the ideas with which he set the world ablaze three years later in *The Souls of Black Folk*."

Ten years later, Black men still fall to police bullets and brutality, Black women still die from preventable diseases, Black children still struggle to get a high quality education ... inequality persist ... lost ground in nearly every leading economic category.

Males look to be served. Men look to be of service. Emmy Award–nominated actor best known for his role on Queen Sugar and transformational speaker Dondré Whitfield challenges us to be real men in this provocative look at the power found in serving others. Too many males abuse the power they have. Often those males grow up without healthy role models and so, while they look like men, they act like boys. Only now there are adult consequences to their actions. And many of us are caught in the shifting cultural ideas about manhood, unsure of how to make sound decisions or truly be a man. Every day we find evidence that the role of men at home, at work, and out in the world is deeply misinterpreted. In Male vs. Man, Dondré Whitfield equips us to become men rather than simply "grown males." Men are healthy and productive servant-leaders who bring positive change to their communities. Males are self-serving and stuck in negative cycles that we hear and read about daily. They create chaos instead of cultivating calm. Male vs. Man is an uplifting playbook for men who want to level up. It will help men and women alike understand what real manhood is, based on biblical wisdom as well as hard-earned lessons from someone who has been there. With practical guidance and a strong spiritual foundation, Dondré shows how to cultivate the life-changing spiritual, emotional, and psychological attributes of servant leadership at home, at work, and in our communities.
