From "The Eight Rhetorical Mode" Later he asked, "Would you like to go for a hike sometime?" and two trains of thought left the station: He means to get to know me and we might leave the city together and it's been a long time since I climbed a mountain. That train chugged into a wider brighter country all the time. The other train went by another route through the panicked interior. He's a lunatic, it whistled. He's been in and out of hospitals. choo! Post-divorce dating is one more cause for celebration (or a quick call in to the police) in Beth Bosworth's revelatory new book, *The Source of Life and Other Stories*. The spine of this collection is a series of linked stories about Ruth Stein, a Brooklyn author whose first book has exposed her father's abuses; while the voice here, speaking across a lifetime, ranges from bittersweet to humorous to lethal. In other stories Bosworth's narrators—a mother left to care for her son's suicidal dog, an editor haunted by a dog-eared manuscript—seem to grab hold of the reins and run off with their fates. Meanwhile Bosworth explores the extended family, the bonds of friendship, an apocalyptic Vermont, the rank yet redeemable Gowanus Canal; also rites of passage, race relations, divorce, middle-aged romance, dementia, funerals, alcoholism, and the Jewish religion. Reality is just another stumbling block for Bosworth's characters, who might help themselves but don't always choose to. There are leaps of faith here, nonetheless, as the collection dispenses a kind of narrative psychotropic for survival and redemption, with a chaser of humor mixed in.

Octavia Butler (1947-2006) spent the majority of her prolific career as the only major black female author of science fiction. Winner of both the Nebula and Hugo Awards as well as a MacArthur "genius" grant, the first for a science fiction writer, Butler created worlds that challenged notions of race, sex, gender, and humanity. Whether in the postapocalyptic future of the *Parable* stories, in the human inability to assimilate change and difference in the *Xenogenesis* books, or in the destructive sense of superiority in the *Patternist* series, Butler held up a mirror, reflecting what is beautiful, corrupt, worthwhile, and damning about the world we inhabit. In interviews ranging from 1980 until just before her sudden death in 2006, *Conversations with Octavia Butler* reveals a writer very much aware of herself as the "rare bird" of science

fiction even as she shows frustration with the constant question, "How does it feel to be the only one?" Whether discussing humanity's biological imperatives or the difference between science fiction and fantasy or the plight of the working poor in America, Butler emerges in these interviews as funny, intelligent, complicated, and intensely original. The complete Patternist series—the acclaimed science fiction epic of a world transformed by a secret race of telepaths and their devastating rise to power. The other is Doro, a malevolent despot who has mastered the power of stealing the bodies of others when his wears out. Together they will change the world. Over the next three centuries, Doro mounts a colossal selective breeding project, attempting to create a master race of telepaths. A Patternist Novel: a story of love and hate, in which two immortals chase each other across continents and centuries, binding their fates together - and changing the destiny of the human race. Doro knows no higher authority than himself. An ancient spirit with boundless powers, he possesses humans, killing without remorse as he jumps from body to body to sustain his own life. With a lonely eternity ahead of him, Doro breeds supernaturally gifted humans into empires that obey his every desire. He fears no one - until he meets Anyanwu. Anyanwu is an entity like Doro and yet different. She can heal with a bite and transform her own body, mending injuries and reversing ageing. She uses her powers to cure her neighbours and birth entire tribes, surrounding herself with kindred who both fear and respect her. No one poses a true threat to Anyanwu - until she meets Doro. The moment Doro meets Anyanwu, he covets her; and from the villages of 17th-century Nigeria to 19th-century United States, their courtship becomes a power struggle that echoes through generations, irrevocably changing what it means to be human.

and to ask what it means to be human. Butler addresses social justice issues such as poverty, racism, and violence against women and connects the history of slavery in the United States with speculation on a biologically altered future world. The first section of this volume, "Materials," lists secondary sources and interviews with Butler and suggests texts that instructors might pair with her works. Essays in the second section, "Approaches," situate Butler in science fiction, modernism, and Afrofuturism and provide interdisciplinary approaches from political science, philosophy, art, and digital humanities. The contributors present strategies for teaching Butler in literature courses as well as courses designed for adult learners, preservice teachers, and students at historically black colleges and universities.

Though set in other worlds populated by alien beings, science fiction is a site where humans can critique and re-imagine the paradigms that shape this world, from fundamentals such as the sex and gender of the body to global power relations among sexes, races, and nations. Feminist thinkers and writers are increasingly recognizing science fiction's potential to shatter patriarchal and heterosexual norms, while the creators of science fiction are bringing new depth and complexity to the genre by engaging with feminist theories and politics. This book maps the intersection of feminism and science fiction through close readings of science fiction literature by Octavia E. Butler, Richard Calder, and Melissa Scott and the movies *The Matrix* and the *Alien* series. Patricia Melzer analyzes how these authors and films represent debates and concepts in three areas of feminist thought: identity and

difference, feminist critiques of science and technology, and the relationship among gender identity, body, and desire, including the new gender politics of queer desires, transgender, and intersexed bodies and identities. She demonstrates that key political elements shape these debates, including global capitalism and exploitative class relations within a growing international system; the impact of computer, industrial, and medical technologies on women's lives and reproductive rights; and posthuman embodiment as expressed through biotechnologies, the body/machine interface, and the commodification of desire. Melzer's investigation makes it clear that feminist writings and readings of science fiction are part of a feminist critique of existing power relations—and that the alien constructions (cyborgs, clones, androids, aliens, and hybrids) that populate postmodern science fiction are as potentially empowering as they are threatening. Afro-Future Females: Black Writers Chart Science Fiction's Newest New-Wave Trajectory, edited by Marleen S. Barr, is the first combined science fiction critical anthology and short story collection to focus upon black women via written and visual texts. The volume creates a dialogue with existing theories of Afro-Futurism in order to generate fresh ideas about how to apply race to science fiction studies in terms of gender. The contributors, including Hortense Spillers, Samuel R. Delany, Octavia E. Butler, and Steven Barnes, formulate a woman-centered Afro-Futurism by repositioning previously excluded fiction to redefine science fiction as a broader fantastic

endeavor. They articulate a platform for scholars to mount a vigorous argument in favor of redefining science fiction to encompass varieties of fantastic writing and, therefore, to include a range of black women's writing that would otherwise be excluded. *Afro-Future Females* builds upon Barr's previous work in black science fiction and fills a gap in the literature. It is the first critical anthology to address the "blackness" of outer space fiction in terms of feminism, emphasizing that it is necessary to revise the very nature of a genre that has been constructed in such a way as to exclude its new black participants. Black science fiction writers alter genre conventions to change how we read and define science fiction itself. The work's main point: black science fiction is the most exciting literature of the nascent twenty-first century.

I began writing about power because I had so little, Octavia E. Butler once said. Butler's life as an African American woman--an alien in American society and among science fiction writers--informed the powerful works that earned her an ardent readership and acclaim both inside and outside science fiction. Gerry Canavan offers a critical and holistic consideration of Butler's career. Drawing on Butler's personal papers, Canavan tracks the false starts, abandoned drafts, tireless rewrites, and real-life obstacles that fed Butler's frustrations and launched her triumphs. The Oankali survive by genetically merging with primitive civilizations—whether their new hosts like it or not. For the first time since the nuclear holocaust, Earth will be inhabited. A multiple Hugo and Nebula Award winner's powerful saga of survival and destiny in a near-future dystopian America. One of the world's most respected authors of science fiction imagines an apocalyptic near-future Earth where a remarkable young woman discovers that her destiny calls her to try and change the world around her. Octavia E. Butler's brilliant two-volume Earthseed saga offers a startling vision of an all-too-possible tomorrow, in which walls offer no protection from a civilization gone mad. *Parable of the Sower*: In the aftermath of worldwide ecological and economic apocalypse, minister's daughter Lauren Oya Olamina escapes the slaughter that claims the lives of her family and nearly every other member of their gated California community. Heading north with two young companions through an American wasteland, the courageous young woman faces dangers at every turn while spreading the word of a remarkable new religion that embraces survival and change. *Parable of the Talents*: Called to the new, hard truth of Earthseed, the small community of the dispossessed that now surrounds Lauren Olamina looks to her—their leader—for guidance. But when the evil that has grown out of the ashes of human society destroys all she has built, the prophet is forced to choose between preserving her faith or her family. the finest voices in fiction—period” (TheWashington Post Book World). Stunningly prescient and breathtakingly relevant to our times, this dark vision of a future America is a masterwork of powerful speculation that ushers us into a broken, dangerously divided world of bigotry, social inequality, mob violence, and ultimately hope.

A woman’s feminist awakening drives a hypocritical village to madness in rural Uruguay in this "wild, brutal paean to freedom" (NPR.org). Shortlisted for the National Translation Award "Somers' feminism is profound, and complicated."

In this searing critique of Enlightenment values, fantastic themes are juxtaposed with brutal depictions of misogyny and violence, and frantically build to a fiery conclusion. Finally available to an English-speaking audience, *Armonía Somers* will resonate with readers of Clarice Lispector, Djuna Barnes, and Leonora Carrington.

Everfair is a wonderful Neo-Victorian alternate history novel that explores the question of what might have come of Belgium's disastrous colonization of the Congo if the native populations had learned about steam technology a bit earlier. Fabian Socialists from Great Britain join forces with African-American missionaries to purchase land from the Belgian Congo's "owner," King Leopold II. This land, named *Everfair*, is set aside as a safe haven, an imaginary Utopia for native populations of the Congo as well as escaped slaves returning from America and other places where African natives were being mistreated. record into a marvelous and exciting exploration of the possibilities inherent in a turn of history. *Everfair* is told from a multiplicity of voices: Africans, Europeans, East Asians, and African Americans in complex relationships with one another, in a compelling range of voices that have historically been silenced. *Everfair* is not only a beautiful book but an educational and inspiring one that will give the reader new insight into an often ignored period of history.

The futures of both mankind and an alien species rest in the hands of one hybrid son in the award-winning science fiction author's masterful sequel to *Dawn*. Nuclear war had nearly destroyed mankind when the Oankali came to the rescue, saving humanity—but at a price. The Oankali survive by mixing their DNA with that of other species, and now on Earth they have permitted no child to be born without an Oankali parent. The first true hybrid is a boy named Akin—son of Lilith Iyapo— and to the naked eye he looks human, for now. He is born with extraordinary sensory powers, understanding speech at birth, speaking in sentences at two months old, and soon developing the ability to see at the molecular level. More powerful than any human or Oankali, he will be the architect of both races' intergalactic future. But before he can carry this new species into the stars, Akin must decide which unlucky souls will stay behind. At once a coming-of-age story, science fiction adventure, and philosophical exploration, Butler's ambitious and breathtaking novel ultimately raises the question of what it means to be human. Octavia E. Butler's bestselling literary science-fiction masterpiece, *Kindred*, now in graphic novel format. More than 35 years after its release, *Kindred* continues to draw in new readers with its deep exploration of the violence and loss of humanity caused by slavery in the United States, and its complex and lasting impact on the present day. Adapted by celebrated academics and comics artists Damian Duffy and John Jennings, this graphic novel powerfully renders Butler's mysterious and moving story, which spans racial and gender divides in the antebellum South through the 20th century.

Butler's most celebrated, critically acclaimed work tells the story of Dana, a young black woman who is suddenly and inexplicably transported from her home in 1970s California to the pre-Civil War South. As she time-travels between worlds, one in which she is a free woman and one where she is part of her own complicated familial history on a southern plantation, she becomes frighteningly entangled in the lives of Rufus, a conflicted white slaveholder and one of Dana's own ancestors, and the many people who are enslaved by him. apparently young, amnesiac girl whose alarmingly un-human needs and abilities lead her to a startling conclusion: she is in fact a genetically modified, 53-year-old vampire. Forced to discover what she can about her stolen former life, she must at the same time learn who wanted—and still wants—to destroy her and those she cares for, and how she can save herself. *Fledgling* is a captivating novel that tests the limits of "otherness" and questions what it means to be truly human.
