John Banville, the Man Booker Prize-winning author of *The Sea* and *Ancient Light*, now gives us a new novel—at once trenchant, witty, and shattering—about the intricacies of artistic creation, about theft, and about the ways in which we learn to possess one another, and to hold on to ourselves. Equally self-aggrandizing and self-deprecating, our narrator, Oliver Otway Orme (“O O O. An absurdity. You could hang me over the door of a pawnshop”), is a painter of some renown and a petty thief who has never before been caught and steals only for pleasure. Both art and the art of thievery have been part of his “endless effort at possession,” but now he’s pushing fifty, feels like a hundred, and things have not been going so well. Having recognized the “man-killing crevasse” that exists between what he sees and any representation he might make of it, he has stopped painting. And his last act of thievery—the last time he felt its “secret shiver of bliss”—has been discovered. The fact that the purloined possession was the wife of the man who was, perhaps, his best friend has compelled him to run away—from his mistress, his home, his wife; from whatever remains of his impulse to paint; and from a tragedy that has long haunted him—and to sequester himself in the house where he was born. Trying to uncover in himself the answer to how and why things have turned out as they have, excavating memories of family, of places he has called home, and of the way he has apprehended the world around him (“one of my eyes is forever turning towards the world beyond”), Olly reveals the very essence of a man who, in some way, has always been waiting to be rescued from himself.

Lonnie Johnson (1894–1970) was a virtuoso guitarist who influenced generations of musicians from Django Reinhardt to Eric Clapton to Bill Wyman and especially B. B. King. Born in New Orleans, he began playing violin and guitar in his father's band at an early age. When most of his family was wiped out by the 1918 flu epidemic, he and his surviving brother moved to St. Louis, where he won a blues contest that included a recording contract. His career was launched. Johnson can be heard on many Duke Ellington and Louis Armstrong records, including the latter's famous "Savoy Blues" with the Hot Five. He is perhaps best known for his 12-string guitar solos and his groundbreaking recordings with the white guitarist Eddie Lang in the late 1920s. After World War II he began playing rhythm and blues and continued to record and tour until his death. This is the first full-length work on Johnson. Dean Alger answers many biographical mysteries, including how many members of Johnson's large family were left after the epidemic. It also places Johnson and his musical contemporaries in the context of American race relations and argues for the importance of music in the fight for civil rights. Finally, Alger analyzes Johnson's

major recordings in terms of technique and style. Distribution of an accompanying music CD will be coordinated with the release of this book. Americans conceive of the process of political representation as operating like a "transmission belt." Elections convey citizens' preferences unchanged into the legislative assembly and thereby allow them to participate, through their representatives, in the political affairs of the nation. This conception stands firmly in the tradition of liberal thought, as does much theory about political representation. In that tradition, government is defined primarily in terms of power, and elections are little more than the means by which that power is transferred from the people to their representatives. In *The Blue Guitar* (the title alludes to a poem by Wallace Stevens), Nancy L. Schwartz offers a radically new understanding of representation. As she sees it, representatives should be—and, in the past, have been—more than mere delegates or trustees of individual desires and interests and the process of representation more than the appropriation of power and control. Ideally, representation should transform both representative and citizen. Representatives should be caretakers of the community, not the watchdogs of special interest groups or individuals. Citizens in turn should feel increased personal responsibility for the whole that membership in the community entails. Moreover, representatives should serve as founders of their constituencies, constituting communities whose members value citizenship as an end in itself. In her analysis, Schwartz canvasses the political experience of ancient, medieval, and Renaissance city-states to discover the communitarian meaning of citizenship, and she draws on classical political theory from Plato to Rousseau and Hegel, on the political sociology of Marx and Weber, and on such contemporary theorists as Arendt and Pitkin. Schwartz also enters the controversy over whether local, state, and national legislators should be selected by district or at-large elections. After examining a set of key Supreme Court cases on voting rights and district elections, she proposes that representatives come from single-member geographic districts.
