The car - once everybody's dream and a key status symbol in most countries and cultures - has been extensively questioned in the last decades and in the last few years particularly. Urbanisation, traffic congestion, pollution problems, heavy reliance on scarce oil supplies, safety issues and ever-growing competition, have all provided significant business challenges for the automotive industry. Many car manufacturers have had to fundamentally rethink their design, brand and marketing strategies to thrive in a savvy, consumer-led culture, and markets that are becoming increasingly restrictive in size and opportunity. Auto Brand provides a roadmap to branding and marketing success in the automotive industry from a leading industry expert and features:

- Case studies on major car brands personally conducted by the author including: Audi, BMW, Holden, Mercedes-Benz, Opel, Porsche, Saab, Seat, Skoda, Vauxhall, Volkswagen, and Volvo
- The findings from 100 interviews conducted with CEOs, marketing managers, sales managers, sales people, after sales managers at all levels from the manufacturer level to small rural dealers, as well as industry experts, policy makers, free-standing repair shops and professional organizations
- The results of a new international study on car buyer behaviour based on 4,700 survey answers

Auto Brand is essential reading for marketing managers, sales managers, CEOs, development managers and dealers in all types of companies in the car industry including: manufacturers, national sales companies/importers, dealers, finance companies, insurance companies, free-standing repair shop channels and more. The first book to specifically address how to deal with the challenges facing the automotive industry it illustrates how companies can take advantage of new technologies, adapt to emerging trends in consumer behaviour, improve profitability and build even more successful brands in the future.

What really happened at British Leyland (BL)? Was it 'just' the cars, or were other factors vital to the story? Who really was to blame for BL and MG Rover's death? The 'truth' about BL is deeper than its cars – were ultra- Left-wing plots to topple BL and British society real? Did secret deals and political intrigue really exist? Was it Labour or Conservative powers who 'killed' BL, or was it BL itself? How was it that BL's design genius was hobbled? Author Lance Cole lifts the bonnet on BL and presents a forensic yet easy to read new analysis in a story of BL, its cars, and the era of their motoring as powers on the political Left and Right waged war, sometimes even with themselves. Here is a book about cars and more, a conversation on all things BL: this is a new account of a classic British story told across a trail of evidence in a British industrial and political drama. Many mistakes made BL, but some of the cars were superb, the designs of genius, the engineering excellent; it is just that we have either forgotten, or been brainwashed into believing the worst. In a BL book like no other, written by a classic car fanatic with a background in industrial design, automotive, and wider journalism, this story lifts the lid on BL's cars and more. The author also adds inside knowledge from time working in the motor industry. Lance Cole tells the deeper BL story across the era of its greatest successes and its biggest failures.
