An exclusive look at one of the world's most successful and controversial companies, and the mysterious family behind it. BMW is arguably the most admired carmaker in the world. It's financial performance is the envy of its competitors, and BMW products inspire near-fanatical loyalty. While many carmakers struggle with falling sales, profits and market share, demand for BMWs continues to grow, frequently outpacing production. Now, David Kiley-Detroit Bureau Chief at USA

Today and author of *Getting the Bugs Out*, which covered Volkswagen's demise and rebirth, goes inside the fabled German automaker to see how it does what it does so well. With unprecedented access to BMW executives, Kiley goes behind the walls of BMW's famed "Four Cylinders" headquarters in Munich at a time when the company is in its most aggressive, and some say riskiest, expansion in its history and when some of the company's new products, like the 7 Series sedan and Z4 roadster, are for the first time drawing as many barbs from critics as bouquets. Kiley covers intimate details of the boardroom drama surrounding the company's nearly disastrous acquisition and subsequent sale of the British Rover Group and its expansion into selling MINI and Rolls Royce cars. Besides being a world-class carmaker, BMW is also considered one of the smartest consumer marketing companies and Kiley explores the extraordinary value and management of the BMW brand mystique. He also takes a revealing look at the mysterious and ultra-private Quandt family of Bad Homburg Germany, which owns a controlling stake in BMW: Johanna and Susanne Quandt, two of the wealthiest women in Europe and Stefan Quandt, one of the wealthiest bachelors on the continent. David Kiley (Ann Arbor, MI) is the Detroit Bureau Chief at USA Today who has covered the auto industry for 17 years. He has been featured on Nightline, CNBC, CNN, MSNBC, NPR and the Today show. He is also the author of *Getting the Bugs Out: The Rise, Fall, and Comeback of Volkswagen in America* (0-471-26304-4), also available from Wiley.

Few cars in recent years have inspired such devotion among enthusiasts as the BMW M3. Now entering its fifth generation, BMW's compact performance car is recognized worldwide as the benchmark of its type. BMW M3 - The Complete Story looks in detail at the first four generations of the M3, which arrived in the mid-1980s as an E30 'homologation special', intended to keep BMW ahead of rivals Mercedes-Benz on the racetracks. But the M3 soon became very much more than that. Before long, buyers latched onto its exclusivity and turned it into a status symbol - and BMW was only too happy to exploit that. For all fans of the BMW M3, this book provides the essential background. It is packed with facts and details that make the M3 legend come alive. With over 250 photographs, the book covers: the original E30 M3 of 1986 - from a 'homologation special' to a status symbol; design and development of the E36 M3, including a new 6-cylinder engine and more body choices; the E46 M3 of 2000, with the developed 6-cylinder S54 engine and gearshift advances; racing success for the E90-series M3s, introduced in 2007 with V8 engines; driving, buying and special editions of all the models.

Nationalism, ethnicity and citizenship lie at the heart of many of the societal changes that are currently transforming countries across the world. Global migration has undermined old certainties provided by the established framework of nation-states, with inward migration, cultural diversity and transnational affiliations having become established facts of life in many countries. These phenomena raise significant challenges for traditional conceptions of citizenship. This book provides a detailed examination, from a variety of disciplinary perspectives, of contemporary issues relating to nationalism, ethnicity and citizenship. The book aims to take stock of current understandings in this area, and to establish whether there are connections between the understandings that are being articulated within different social science disciplines. The contributors, who are all senior international figures in their respective fields, are drawn from a range of disciplines, including Politics, Sociology, Communication/Media, Geography, Psychology and Education. Collectively, they address the following specific questions: • To what extent do multiculturalism and transnationalism undermine nationalism or, on the contrary, provoke its reassertion? • How do the multiple identities and multiple levels of belonging experienced today interact with traditional nationalist ideology? • Within multicultural societies, how far do representations of 'cultural others' still play a role in nationalist constructions of 'the nation'? • How successfully have the welfare systems of nation-states responded to the influx of migrants? • How have national politicians responded to the cultural diversity of their own countries and have they moved beyond the traditional logic of nationalism within their thinking? • Why are extreme right-wing parties gaining increased levels of support? • What social and psychological resources do citizens require in order to function effectively at the political level within multicultural democratic societies? • How can the educational systems of states, which have traditionally been used for nationalist purposes, be harnessed to enhance the competences needed by their citizens for successful living in multicultural societies? • What changes need to be made to educational policies in order to ensure the effective integration of minority citizens? Despite the fact that they have been written from different disciplinary perspectives,

the various chapters in this book paint a consistent picture. They offer a view of a world in which nationalism is still very much a dominant ideology which configures the discourse and thinking of citizens and politicians alike about nation-states, ethnic diversity, multiculturalism and citizenship. The crucial role of education is also highlighted, with school systems being uniquely positioned to equip citizens with the psychological resources and intercultural competences that are needed to function effectively within multicultural societies.
