A new collection that captures the austere serenity of the Southwest American desert. Award-winning, Paris-based poet Alice Notley's adventurous new book is inspired by the life of Marie, a woman who resided in the dump outside Notley's hometown in the Southwestern desert of America. In this poetical fantasy, Marie becomes the ultimate artist/poet, composing a codex-calligraphy, writings, paintings, collage-from materials left at the dump. She is a "culture of one." The story is told in long-lined, clear-edged poems deliberately stacked so the reader can keep plunging headlong into the events of the book. Culture of One offers further proof of how Notley "has freed herself from any single notion of what poetry should be so that she can go ahead and write what poetry can be" (The Boston Review).

Covers principles of operation, troubleshooting, maintenance and repair of the modern braking system. Information on tool selection and usage is included, plus a chapter on brake system modifications and high-performance brake parts.

This book discusses the latest advances in research and development, design, operation and analysis of transportation systems and their complementary infrastructures. It reports on both theories and case studies on road and rail, aviation and maritime transportation. The book covers a wealth of topics, from accident analysis, vehicle intelligent control, and human-error and safety issues to next-generation transportation systems, model-based design methods, simulation and training techniques, and many more. A special emphasis is given to smart technologies and automation in transport, as well as to user-centered, ergonomic and sustainable design of transport systems. The book, which is based on the AHFE 2016 International Conference on Human Factors in Transportation, held on July 27-31, 2016, in Walt Disney World®, Florida, USA, mainly addresses transportation system designers, industrial designers, human-computer interaction researchers, civil and control engineers, as well as vehicle system engineers. Moreover, it represents a timely source of information for transportation policy-makers and social scientists dealing with traffic safety, management, and sustainability issues in transport.

The paper investigates the divergence between inflation and monetary expansion in Zimbabwe since late 2003. The substantial decline in velocity and increasing levels of real money balances during 2004 are at odds with a record of inflation closely tracking the growth rates of monetary aggregates in the past. Possible explanations for the divergence include an unstable demand for money, a sudden shift in the underlying demand for real balances due to a sharp change in an explanatory variable, and a structural break or aberration in a normally stable money demand relation reflecting some unexplained factor such as repressed inflation (given administered prices) or measurement errors in the consumer price index. The results of the study point to the last possibility as the most likely explanation.

Relive the first one hundred years of Germany's best two- and four-wheeled rides. Established in 1916, BMW is one of the auto and motorcycle industry's oldest and most-respected car and motorcycle manufacturers. Over the past century, the company went through myriad developments. The BMW Century chronicles this remarkable transportation company through images of the cars and motorcycles it manufactured, from the 1923 R32 motorcycle to sleek electric cars of today. This handsome volume is filled with images, history, and in-depth looks at the incredible machines BMW created year after year. The BMW Century showcases how the company's new visionary team systematically rebuilt BMW in the post-World War II years into the spectacular success we know today - that is, a company with sales projected to be upwards of two million cars annually by 2016, led by its 3-series, the best-selling luxury-performance car in the world. BMW's motorcycle division is no less legendary. It began with the 1923 avant-garde R32, which featured a 180-degree, horizontally opposed twin, the engine configuration that would become BMW's hallmark. Along the way, BMW would use that configuration to power groundbreaking machines like the R90S, R100RS, and R80GS. Beginning in 1983, they would add three- and four-cylinder machines to their offerings, culminating in today's spectacular S1000RR sport bike. From the pre-war motorcycles to the iconic R-series twins of the 1970s and 80s to the mighty M-series cars and superbikes of today, The BMW Century offers a full review of German engineering at its finest. The book is illustrated with hundreds of historic, contemporary, and racing photographs - many sourced from BMW's archives - and detailed text relating the BMW's full history. This is the one volume no BMW aficionado can be without.

A unique, multifaceted look at the meaning (and the specifics) of gay male pornography Open any "gay lifestyle" magazine (even the serious ones) or go to any gay bar, and you're likely to encounter something related to pornography, be it an image of a porn "superstar" or advertisements for pornographic magazines, DVDs, calendars, etc. Eclectic Views on Gay Male Pornography Pornucopia examines this phenomenon with a series of provocative essays, in which experts in history, law, media studies, and psychology, as well as laypeople and gay porn insiders explore the complex world of male pornography and the various ways in which it has permeated gay culture—from the 1970s until today. This first-of-its-kind book examines the phenomenon of self-writing and performance for gay men in the last century, specifically looking at the lives of modern-day performance artist Tim Miller, who has received national recognition for his one-man shows portraying his struggles as a gay man; Wakefield Poole (born 1936), the first producer of gay pornography (Bijou, Boys in the Sand) in the era accompanying the emergence of the gay rights movement; gay adult film icon Scott "Spunk" O'Hara (born 1961); and Aaron Lawrence (born 1971), who worked as a gay escort, actor, and producer/director of his own sexually explicit "amateur" videos. In this groundbreaking analysis of gay men's relationship with pornography, you'll also learn about: gay pornography and the messages it carries about intimacy, body image, and hegemonic masculinity representations of ethnicity in gay pornography gay pornography and safer sex gay pornography and censorship viewers' perceptions of gay pornography gay pornography and internalized homophobia, misogyny, and body fascism changes in the way gay pornography is produced and performed—from the 1970s through the 1990s the meaning of the recurring settings in American gay pornographic videos: prison, the military, and other all-male environments; and recurring themes: leather, S/M, dissatisfaction with heterosexual life, initiation into gay life, etc. In addition, Eclectic Views on Gay Male Pornography presents two fascinating chapters about the case of Little Sisters Book and Art Emporium in Vancouver. In this landmark case, the Canadian Supreme Court was asked to determine whether gay male pornography violated the sex equality protections guaranteed by the Canadian Charter of Rights and Freedoms. The court also examined the way that Canada Customs treats international shipments to gay and lesbian bookstores. In addition, the book provides a revealing insider's perspective on the gay adult video industry that contrasts the workaday reality of making porn with the glamorous mythology of the skin trade.
