Challenging students to question the political and philosophical assumptions underlying the law, Education Law, Policy, and Practice promotes a depth of understanding about the key cases and statutes. The authors integrate the law

with policy and practice, following related political, financial, and practical issues. The law is presented through a teachable mix of key cases and materials on the practice and political aspects of school law, and an effective macro organization helps place topics into an integrated framework. Each of the major issues in education law is discussed at length: the boundaries of public and private, church and state, relations; school governance and the tensions between federal power and local control; the rights and responsibilities of students and teachers; and the educational environment and its liabilities. “Practicums” in each section allow students to apply the law to realistic situations. Features: New cases: *Endrew F. v. Douglas County School District*; *Fisher v. the University of Texas*. A complete description and analysis of the brand new Every Student Succeeds Act of 2015. A series of key questions and answers that follow each major section, and are designed to provide formative and summative assessments of student learning outcomes.

Psychoendocrinology covers the advances in the field of biology and the development of highly refined measurement techniques for hormones. The book discusses the partitioning of neuroendocrine steroids and peptides between

vascular and cerebral compartments; the mechanisms of the female reproductive behavior; and the sensory, hormonal, and neural determinant of maternal behavior. The text describes the effects of sexual behavior on gonadal function in rodents; the hormonal regulation of learning performance; and the hormonal modulation of memory. The psychobiological perspective on the psychoneuroendocrinology of stress and the behavioral effects of the endogenous opioids are also considered. The book further tackles the hormonal interactions on temperature regulation and temperature regulation under modified physiological states. Endocrinologists, psychobiologists, neurologists, neurobiologists, and students taking related courses will find the book useful. This masterly book substantially extends Howard Raiffa's earlier classic, *The Art and Science of Negotiation*. It does so by incorporating three additional supporting strands of inquiry: individual decision analysis, judgmental decision making, and game theory. Each strand is introduced and used in analyzing negotiations. The book starts by considering how analytically minded parties can generate joint gains and distribute them equitably by negotiating with full, open, truthful exchanges. The book then examines models that disengage step by step from that ideal. It also shows how a neutral outsider (intervenor) can help all negotiators by providing joint, neutral analysis of their problem. Although

analytical in its approach—building from simple hypothetical examples—the book can be understood by those with only a high school background in mathematics. It therefore will have a broad relevance for both the theory and practice of negotiation analysis as it is applied to disputes that range from those between family members, business partners, and business competitors to those involving labor and management, environmentalists and developers, and nations. This title was first published in 2000. The law relating to directors' duties has fundamental implications across the business environment and yet few areas of business law have received so little detailed examination. This text provides fresh and incisive insights to the rules applying in ten major economic jurisdictions within Europe, with respect to directors' legal obligations and liabilities. Written by the foremost figures in the field, each contribution outlines the statutory provisions that affect the work of company directors in each jurisdiction, including general legislation and specific laws covering the status of incorporated bodies. Fully illustrated with case-law examples the book provides a guide to the range of measures which national courts may provide for participants in corporate life seeking remedies for unsatisfactory governance of companies. It also features guidance on the specific bases for criminal and civil liabilities and examples of the range of penalties to which directors might be subject. The result is a work of

unprecedented detail which will be welcomed by practitioners in the corporate sector, academics and researchers alike.

Over the past fifty years, many thousands of conflict simulations have been published that bring the dynamics of past and possible future wars to life. In this book, Philip Sabin explores the theory and practice of conflict simulation as a topic in its own right, based on his thirty years of experience in designing wargames and using them in teaching. *Simulating War* sets conflict simulation in its proper context alongside more familiar techniques such as game theory and operational analysis. It explains in detail the analytical and modelling techniques involved, and it teaches you how to design your own simulations of conflicts of your choice. The book provides eight simple illustrative simulations of specific historical conflicts, complete with rules, maps and counters. *Simulating War* is essential reading for all recreational or professional simulation gamers, and for anyone who is interested in modelling war, from teachers and students to military officers.

TOLD. AND IT WASN'T FRANK "THE IRISHMAN" SHEERAN AS HE CLAIMED. This is the shocking and brutal story of Carmine DiBiase—aka Sonny Pinto—the elusive Mafia killer who went from small-time street punk to FBI's Most Wanted list to Death Row—only to be released on the streets to kill and kill again . . . among those who died by his gun was Joey Gallo. "Sober, he was nothing, but drunk he would blow your head off." That's how Pete the Greek described Carmine "Sonny" DiBiase, the Colombo crime family hitman who'd been terrorizing Manhattan's Little Italy since he was a kid. After beating and robbing a local tailor and doing time in reformatory, Sonny set up operations at The Mayfair Boys Civic and Social Club, an illegal poolroom where he shot and killed his best friend on Christmas day . . . A prime suspect of this and other crimes, Sonny went on the lam and off the grid for seven years. He then surrendered himself to police, was tried for murder and sentenced to death. But after a second trial, he walked away a free man—free to kill again. Joey "Crazy Joe" Gallo and his President Street mob waged a deadly Mafia civil war with the Colombo crime family, and in particular, Carmine "the Snake" Persico. A contract was put out for Gallo and his gang. And on that fateful night of April 7, 1972, in a Little Italy restaurant, Gallo was assassinated . . . by Carmine "Sonny" DiBiasi.. This is the true story of who really whacked Crazy Joey Gallo on that fateful night of April 7, 1972.
