Masculinity without men. In *Female Masculinity* Judith Halberstam takes aim at the protected status of male masculinity and shows that female masculinity has offered a distinct alternative to it for well over two hundred years. Providing the first full-length study on this subject, Halberstam catalogs the diversity of gender expressions among masculine women from nineteenth-century pre-lesbian practices to contemporary drag king performances. Through detailed textual readings as well as empirical research, Halberstam uncovers a hidden history of female masculinities while arguing for a more nuanced understanding of gender categories that would incorporate rather than pathologize them. She rereads Anne Lister's diaries and Radclyffe Hall's *The Well of Loneliness* as foundational assertions of female masculine identity. She considers the enigma of the stone butch and the politics surrounding butch/femme roles within lesbian communities. She also explores issues of transsexuality among "transgender dykes"--lesbians who pass as men--and female-to-male transsexuals who may find the label of "lesbian" a temporary refuge. Halberstam also tackles such topics as women and boxing, butches in Hollywood and independent cinema, and the phenomenon of male impersonators. *Female Masculinity* signals a new understanding of masculine behaviors and identities, and a new direction in interdisciplinary queer scholarship. Illustrated with nearly forty photographs, including portraits, film stills, and drag king performance shots, this book provides an extensive record of the wide range of female masculinities. And as Halberstam clearly demonstrates, female masculinity is not some bad imitation of virility, but a lively and dramatic staging of hybrid and minority genders.

While best known as one of the most important playwrights of the twentieth century, Harold Pinter (1930--2008) had an equally successful career writing screenplays. His collaborations with director Joseph Losey garnered great attention and esteem, and two of his screenplays earned Academy Award nominations: *The French Lieutenant's Woman* (1981) and *Betrayal* (1983) . He is also credited for writing an unproduced script to remake Stanley Kubrick's 1962 adaptation of *Lolita*. Much scholarship has been dedicated to the subject of Pinter as playwright, but the rich landscape of his work in film has been left largely undisturbed. In *Sharp Cut: Harold Pinter's Screenplays and the Artistic Process*, Steven H. Gale, the world's foremost Pinter scholar, analyzes Pinter's creative process from initial conception to finished film. Gale makes careful, point-by-point comparisons of each stage in the screenplay's creation -- the source material, the adaptations themselves, and the films made from the scripts -- in order to reveal the meaning behind each film script and to explain the cinematic techniques used to express that meaning. Unlike most Pinter scholars, who focus almost solely on the written word, Gale devotes discussion to the cinematic interpretation of the scripts through camera angles and movement, cutting, and other techniques. Pinter does not merely convert his stage scripts to screenplays; he adapts the works to succeed in the other medium, avoiding elements of the live play that do not work onscreen and using the camera's focusing operations in ways that are not possible on the stage. As Pinter's career progressed and his writing evolved, screenplays became for him an increasingly vital means of creative expression. *Sharp Cut* is the first study to fully explore this important component of the Pinter canon.

Close Up was the first English-language journal of film theory. Published between 1927 and 1933, it billed itself as "the only magazine devoted to film as an art," promising

readers "theory and analysis: no gossip." The journal was edited by the writer and filmmaker Kenneth Macpherson, the novelist Winifred Bryher, and the poet H. D., and it attracted contributions from such major figures as Dorothy Richardson, Sergei Eisenstein, and Man Ray. This anthology presents some of the liveliest and most important articles from the publication's short but influential history. The writing in *Close Up* was theoretically astute, politically incisive, open to emerging ideas from psychoanalysis, passionately committed to "pure cinema," and deeply critical of Hollywood and its European imitators. The articles collected here cover such subjects as women and film, "The Negro in Cinema," Russian and working-class cinema, and developments in film technology, including the much debated addition of sound. The contributors are a cosmopolitan cast, reflecting the journal's commitment to internationalism; *Close Up* was published from Switzerland, printed in England and France, and distributed in Paris, Berlin, London, New York, and Los Angeles. The editors of this volume present a substantial introduction and commentaries on the articles that set *Close Up* in historical and intellectual context. This is crucial reading for anyone interested in the origins of film theory and the relationship between cinema and modernism.

This text provides a readable and clearly articulated introduction to the field of cognitive linguistics. It explores the far-reaching implications of Eleanor Rosch's seminal work on categorization and prototype theory, extending the application of prototype theory from lexical semantics to morphology, syntax and phonology. The third edition is fully revised and updated to include the considerable developments in cognitive linguistics since 1987. It covers contemporary research on polysemy, meaning relatedness and metaphors, as well as expanding the discussion of syntactic categories and the relevance of computer simulations.

Do your dreams seem to have as much in common with real life as a funhouse mirror? Don't be misled. Dreams contain extraordinarily reliable commentaries on the conflicts and events of everyday life. Properly interpreted, they not only illuminate your anxieties but actually show you how to alter the course of your life – and very much for the better. Dreams are so essential to our health and well-being that almost all of us create them in clusters four or five times every night. In this title, originally published in 1989, Dr Robert Langs, a psychoanalyst and dream researcher, goes far beyond standard interpretation in showing how your dreams tap the wisdom of the deep unconscious part of your mind. Through his unique and groundbreaking technique of trigger decoding, you will learn what your dreams are saying about your life, about the events you must deal with, about the problems you are trying to resolve. Dreams can be a kind of emotional camouflage, difficult and often uncomfortable to interpret. Trigger decoding not only exposes our emotional wounds, it also provides the balm for healing those wounds. In the proper decoding of dreams, there is revealed an intelligence, power, and beauty of mind that is unheard of in direct and conscious experience. *Decoding Your Dreams* opens a revolutionary new door to self-understanding and self-improvement.

Despite Freud's enormous influence on twentieth-century interpretations of the humanities, there has never before been in English a complete collection of his writings on art and literature. These fourteen essays cover the entire range of his work on these subjects, in chronological order beginning with his first published analysis of a work of literature, the 1907 "Delusion and Dreams in Jensen's *Gradiva*" and concluding with the 1940 posthumous publication of "Medusa's Head." Many of the essays included in this collection have been crucial in contemporary literary and art criticism and theory. Among the subjects Freud engages are Shakespeare's *Hamlet*, *The Merchant of Venice*, *King Lear*, and *Macbeth*, Goethe's *Dichtung und Wahrheit*, Michelangelo's *Moses*, E. T. A. Hoffman's "The Sand Man," Dostoevsky's *The Brothers Karamazov*, fairy tales, the effect of and the meaning of beauty, mythology, and the games of aestheticization. All texts are drawn from *The Standard Edition of the Complete Psychological Works of Sigmund Freud*, edited by James Strachey. The volume includes the notes prepared for that edition by the editor. In addition to the writings on Jensen's *Gradiva* and *Medusa*, the essays are:

"Psychopathic Characters on the Stage," "The Antithetical Meaning of Primal Words," "The Occurrence in Dreams of Material from Fairy Tales," "The Theme of the Three Caskets," "The Moses of Michelangelo," "Some Character Types Met with in Psycho-analytic Work," "On Transience," "A Mythological Parallel to a Visual Obsession," "A Childhood Recollection from *Dichtung und Wahrheit*," "The Uncanny," "Dostoevsky and Parricide," and "The Goethe Prize."

This study presents a unified, economic account of the intricate relationship between form, meaning and interpretation in the Norwegian nominal system – without reference to polysemy. It covers all kinds of nominal signs, i.e. nouns, adjectives, pronouns and determiners, as well as the conventionalised syntactic combinations between them. Among its central innovations is the introduction of the feature general number into Norwegian morphology.

A notable contribution to our understanding of ourselves. This book explores the realm of human behavior in social situations and the way that we appear to others. Dr. Goffman uses the metaphor of theatrical performance as a framework. Each person in everyday social intercourse presents himself and his activity to others, attempts to guide and cotnrol the impressions they form of him, and employs certain techniques in order to sustain his performance, just as an actor presents a character to an audience. The discussions of these social techniques offered here are based upon detailed research and observation of social customs in many regions.

Drug dealers are commonly presented as 'dealing in death', preying on the young and innocent and spreading addiction with little care or regard for those they entangle. Drug markets are commonly depicted as being hierarchically organized and riddled with unscrupulous practices and chaotic violence. While a strong case has been made in recent years that the powers of particular drugs have often led to an unreasonable demonization of drug users, there has been little by way of understanding drug dealers as part of that same process. Who is a drug dealer? How does the dealer operate in the drug market? What if many common perceptions, both about dealers themselves and drug markets more generally, are either incorrect or unreasonably distorted? Reviewing recent research into the minutiae of drug dealing and drug market operations, Pusher Myths suggests that these overly simplistic characterizations of who the drug dealer is, what drug dealers do, and the context within which they operate serve to perpetuate unhelpful ideas of what the drug problem is and, thus ultimately, how it should be resolved. Focusing on issues such as dangerous drug adulteration, the pushing of street drugs onto the young and innocent, the provision of free drugs to hook new clients, and the legend of the Blue Star LSD Tattoo, this book goes in the direction of recasting our understanding of the drug dealer as one that has been unreasonably demonized and de-humanized. This book also provides a contemporary analysis of how the various myths (untruths) surrounding drug dealers may be understood within the broader conceptual analysis of the place of myth in modern society.
