A guidebook for participation in Lincoln-Douglas Debate for interscholastic debate competition

Gore Vidal is one of the most significant American writers of the second half of the twentieth century, having produced a large number of best selling novels, essays, plays and pamphlets which have impacted on major political and social debates for fifty years. He is both a serious writer and a television and movie celebrity, whose increasingly acerbic picture of the United States guarantees he is both revered and reviled. Gore Vidal's America examines the ways in which Vidal's writings on history, politics, sex and religion throw into focus our understandings of the United States, but also recognizes his versatility and inventiveness as a creative writer, some of whose novels – Julian; Myra Breckinridge; Lincoln; Duluth – are among the important literary works of their time. Ranging from Vidal's early defence of homosexuality in *The City and the Pillar* (1948) to his most recent writings on the war in Iraq, this book provides a unique perspective on the evolution of post-World War II American society, politics and literature. As Altman writes: "Difficult not to see in the results of the 2004

elections, where the Republican right gained in both the White House and the Senate, proof of Vidal's worse fears, namely that the impact of imperial adventure, big money and religious moralism would increasingly imperil the American Republic."

Sex is cheap. Coupled sexual activity has become more widely available than ever. Cheap sex has been made possible by two technologies that have little to do with each other - the Pill and high-quality pornography - and its distribution made more efficient by a third technological innovation, online dating. Together, they drive down the cost of real sex, and in turn slow the development of love, make fidelity more challenging, sexual malleability more common, and have even taken a toll on men's marriageability. Cheap Sex takes readers on an extended tour inside the American mating market, and highlights key patterns that characterize young adults' experience today, including the timing of first sex in relationships, overlapping partners, frustrating returns on their relational investments, and a failure to link future goals like marriage with how they navigate their current relationships. Drawing upon several large nationally-representative surveys, in-person interviews with 100 men and women, and the assertions of scholars ranging from evolutionary psychologists to gender theorists, what emerges is a story about social change, technological breakthroughs, and unintended consequences. Men and women have not fundamentally changed, but their unions have. No longer playing a supporting role in relationships, sex has emerged as

a central priority in relationship development and continuation. But unravel the layers, and it is obvious that the emergence of "industrial sex" is far more a reflection of men's interests than women's.

The Gay Archipelago is the first book-length exploration of the lives of gay men in Indonesia, the world's fourth most populous nation and home to more Muslims than any other country. Based on a range of field methods, it explores how Indonesian gay and lesbian identities are shaped by nationalism and globalization. Yet the case of gay and lesbian Indonesians also compels us to ask more fundamental questions about how we decide when two things are "the same" or "different." The book thus examines the possibilities

of an "archipelagic" perspective on sameness and difference. Tom Boellstorff examines the history of homosexuality in Indonesia, and then turns to how gay and lesbian identities are lived in everyday Indonesian life, from questions of love, desire, and romance to the places where gay men and lesbian women meet. He also explores the roles of mass media, the state, and marriage in gay and lesbian identities. *The Gay Archipelago* is unusual in taking the whole nation-state of Indonesia as its subject, rather than the ethnic groups usually studied by anthropologists. It is by looking at the nation in cultural terms, not just political terms, that identities like those of gay and lesbian Indonesians become visible and understandable. In doing so, this book addresses questions of sexuality, mass media, nationalism, and modernity with implications throughout Southeast Asia and beyond.

A chapter in the chronicle of the Cuban Revolution, as told by those on the front lines of that ongoing epic. Armando Choy, Gustavo Chui, and Moisés Sío Wong—three young rebels of Chinese-Cuban ancestry—threw themselves into the great proletarian battle that defined their generation. They became combatants in the clandestine struggle and 1956-58 revolutionary war that brought down a U.S.-backed dictatorship and opened the door to the socialist revolution in the Americas. Each became a general in Cuba's Revolutionary Armed Forces. Here they talk about the historic place of Chinese immigration to Cuba, as well as more than five decades of revolutionary action and internationalism, from Cuba

to Angola, Nicaragua, and Venezuela. Fidel Castro and Nelson Mandela).

The perfect tongue-in-cheek gift for Valentine's, Weddings and Birthdays, THE POP-UP BOOK OF SEX is a clever and informative tour of the ten best ways to have sex, plus the reasons and tips behind them. The problem with most sex books is they're too long, or they list too many things a partner needs to do and learn. Now, readers will get that in just 10 quick pops, from the ever-reliable "Missionary" and the Kama Sutra's "Lotus" as well as contemporary favorites conceived for specific effects such as G-spot simulation and problem-solving advantages of each position (for example: big penis, small woman, or small penis, big woman). Adding to the fun are at least 2-3 alternate position-illustrations for each 'pop', special tips, and specifically selected backdrops (which span the world and a variety of sexual settings). The tour de force cover illustration depicts an intricate, fantastical world densely populated with interlinked, ecstatic, and, of course, tastefully rendered people in the throes of delight (with apologies to Heironymous Bosch): SAMPLE POP: The Mile-High Club

Millions of people around the world today spend portions of their lives in online virtual worlds. Second Life is one of the largest of these virtual worlds. The residents of Second Life create communities, buy property and build homes, go to concerts, meet in bars, attend weddings and religious services, buy and sell virtual goods and services, find friendship, fall in love--the possibilities are endless, and all encountered through a computer screen. At the time of its initial publication in 2008, *Coming of Age in Second Life* was the first book of anthropology to examine this thriving alternate universe. Tom Boellstorff conducted more than two years of fieldwork in Second Life, living among and observing its residents in exactly the same way anthropologists traditionally have done to learn about cultures and social groups in the so-called real world. He conducted his research as the avatar "Tom Bukowski," and applied the rigorous methods of anthropology to study many facets of this new frontier of human life, including issues of gender, race, sex, money, conflict and antisocial behavior, the construction of place and time, and the interplay of self and group. *Coming of*

Age in Second Life shows how virtual worlds can change ideas about identity and society. Bringing anthropology into territory never before studied, this book demonstrates that in some ways humans have always been virtual, and that virtual worlds in all their rich complexity build upon a human capacity for culture that is as old as humanity itself. Now with a new preface in which the author places his book in light of the most recent transformations in online culture, *Coming of Age in Second Life* remains the classic ethnography of virtual worlds.

This book first published in 1973 offers a broad survey of the study of symbolic ideas and behaviour. The study of symbolism is popular nowadays and anthropologists have made substantial contributions to it. Raymond Firth has long been internationally known for his field research in the Solomons and Malaysia, and for his theoretical work on kinship, economics and religion. Here from a new angle, he has produced a broad survey of the study of symbolic ideas and behaviour. Professor Firth examines definitions of symbol. He traces the history of

scientific inquiry into the symbolism of religious cults, mythology and dreams back into the eighteenth century. He compares some modern approaches to symbolism in art, literature and philosophy with those in social anthropology. He then cites examples in anthropological treatment of symbolic material from cultures of varying sophistication. Finally he offers dispassionate analyses of symbols used in contemporary Western situations - from hair-styles to the use and abuse of national flags; from cults of Black Jesus to the Eucharistic rite. In all this Professor Firth combines social and political topicality with a scholarly and provocative theoretical inquiry.

In *The Ritual Process: Structure and Anti-Structure*, Victor Turner examines rituals of the Ndembu in Zambia and develops his now-famous concept of "Communitas." He characterizes it as an absolute inter-human relation beyond any form of structure. *The Ritual Process* has acquired the status of a small classic since these lectures were first published in 1969. Turner demonstrates how the analysis of ritual behavior and symbolism may be used as a key to understanding social structure and processes. He extends Van Gennep's notion of the "liminal phase" of rites of passage to a more general level, and applies it to gain understanding of a wide range of social phenomena. Once thought to be the "vestigial" organs of social conservatism, rituals are now seen as arenas in which social change may emerge and be absorbed into social practice. As Roger Abrahams writes in his foreword to the revised edition: "Turner

argued from specific field data. His special eloquence resided in his ability to lay open a sub-Saharan African system of belief and practice in terms that took the reader beyond the exotic features of the group among whom he carried out his fieldwork, translating his experience into the terms of contemporary Western perceptions. Reflecting Turner's range of intellectual interests, the book emerged as exceptional and eccentric in many ways: yet it achieved its place within the intellectual world because it so successfully synthesized continental theory with the practices of ethnographic reports."
