Published in 1901 in New Orleans, The Picayune's Creole Cook Book is widely credited with preserving the rich tradition of Creole cooking. At the beginning of the twentieth century, the Picayune, a New Orleans newspaper, was determined to save the local cuisine and collected it directly from the cooks and housekeepers who were the first practitioners of the Creole tradition. The book became wildly popular and has had over 15 editions printed throughout the twentieth century. As stated in the introduction, The Picayune's Creole Cook Book was published "to assist housekeepers generally to set a dainty and

appetizing table at a moderate outlay; to give recipes clearly and accurately with simplicity and exactness” and the recipes blend a fantastic array of influences from French style and Spanish spices to African fruits and Indian gumbos. The recipe list includes classics such as seafoods, gumbos, cakes and pastries, jambalayas, and fruit drinks, along with many other delectable dishes. With its fascinating historical origins and delicious authentic recipes, The Picayune’s Creole Cook Book is truly the bible of the rich Louisiana culinary tradition. This edition of The Picayune’s Creole Cook Book was reproduced by permission from the volume in the collection of the American Antiquarian Society, Worcester, Massachusetts. Founded in 1812 by Isaiah Thomas, a Revolutionary War patriot and successful printer and publisher, the society is a research library documenting the lives of Americans from the colonial era through 1876. The society collects, preserves, and makes available as complete a record as possible of the printed materials from the early American experience. The cookbook collection comprises approximately 1,100 volumes.

This book examines China’s contemporary global cultural footprints through its recent development of cultural diplomacy. The volume presents an alternative analytical framework to examine China’s cultural diplomacy, which goes beyond the Western-defined concept of ‘soft power’ that prevails in the current literature. This new approach constructs a three-dimensional framework on Orientalism, cultural hegemony and nationalism to decipher the multiple contexts, which China inhabits historically, internationally and domestically. The book presents multiple case studies of the Confucius Institute, and compares the global programme located around the world with its Western counterparts, and also with other Chinese government-sponsored endeavours and non-government-initiated programmes. The author aims to solve the puzzle of why China’s efforts in cultural diplomacy are perceived differently around the world and helps to outline the distinctive features of China’s cultural diplomacy. This book will be of much interest to students of diplomacy, Chinese politics, foreign policy and International Relations in general.

An argument for, and account of linguistic universals in the morphology of comparison, combining empirical breadth and theoretical rigor. This groundbreaking study of the morphology of comparison yields a surprising result:

that even in suppletion (the wholesale replacement of one stem by a phonologically unrelated stem, as in good-better-best) there emerge strikingly robust patterns, virtually exceptionless generalizations across languages. Jonathan David Bobaljik describes the systematicity in suppletion, and argues that at least five generalizations are solid contenders for the status of linguistic universals. The major topics discussed include suppletion, comparative and superlative formation, deadjectival verbs, and lexical decomposition. Bobaljik's primary focus is on morphological theory, but his argument also aims to integrate evidence from a variety of subfields into a coherent whole. In the course of his analysis, Bobaljik argues that the assumptions needed bear on choices among theoretical frameworks and that the framework of Distributed Morphology has the right architecture to support the account. In addition to the theoretical implications of the generalizations, Bobaljik suggests that the striking patterns of regularity in what otherwise appears to be the most irregular of linguistic domains provide compelling evidence for Universal Grammar. The book strikes a unique balance between empirical breadth and theoretical detail. The phenomenon that is the main focus of the argument, suppletion in adjectival gradation, is rare enough that Bobaljik is able to present an essentially comprehensive description of the facts; at the same time, it is common enough to offer sufficient variation to explore the question of universals over a significant dataset of more than three hundred languages.

This handsome newly designed addition to The Metropolitan Museum of Art's symposia series furthers the study of one of the most influential but less known periods of Greek art and culture. It is based on papers given at a two-day scholarly symposium held in conjunction with the award-winning exhibition "Pergamon and the Hellenistic Kingdoms of the Ancient World," on view at the Metropolitan in 2016. The twenty diverse essays exemplify the international scope of the Hellenistic arts, which cover the three centuries between the death of Alexander the Great in 323 B.C. and the suicide of Cleopatra in 30 B.C. Subjects range from twenty-first century approaches to museum displays of archaeological material to the circulation of artists and works of art throughout the Mediterranean and the influence of Hellenistic art and its legacy in the ancient Roman world. Among the topics discussed are aspects of royal self-presentation and important elements of iconography and style in coins, gems, mosaics, sculpture, vessels, and wall paintings, in mediums including bronze, faience, glass, marble, silver, and terracotta. Authored by a number of internationally renowned scholars, the essays in this volume highlight the holdings of the Metropolitan and markedly demonstrate the artistic innovations and technical mastery of Hellenistic artists, offering new insights into the vitality and complexity of Hellenistic art. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 14.0px Verdana} Presents an introduction to the basic concepts, tools, techniques, and features of Adobe Photoshop CS5, covering such topics as selecting and editing images, working with layers, adjusting color, sharpening, applying masks, using Camera Raw, and printing.
