

Bon Voyage Level 2 Teacher Tools For Chapter 9

Electricity can be easy to understand! A fruitful model of simple electric circuits is developed and applied in these pages. The approach is highly pictorial: electric potential (Volts) and electric current (Amps) are represented by simple diagrams. The student is expected to use these diagrams as the principal mode of analyzing circuits. When algebra and equations are introduced, the student already has an understanding of V, I, R and P from the diagrams. As in all of the Ross Lattner IntuitivScience series, diagrams are an important mode of expression. Parents and teachers, you get one half of the book! We provide solid pedagogical supports, recipes, and methods of presentation. The unit itself is further subdivided into four sections, approximating four weeks of 70-minute classes. 1. Static electricity and the electrical structure of matter 2. Characteristics of electric current, and development of a model of current, potential, resistance and power 3. Mathematical treatment of series and parallel circuits 4. Projects that are either an application of the model or an extensions of the model. At the end of sections 1 - 3 is a thorough quiz, in the same pictorial style. Because this unit involves fundamental forces and concepts, we recommend that it be placed first in the series of the four Ross Lattner Grade Nine Academic IntuitivScience books. In particular, this book should be placed before chemistry.

Includes music.

From the Preface: Most Americans who have studied Latin, with our priests and seminarians included, have employed this method, which they thought was 'traditional'. But as something fully developed, this tradition scarcely goes farther back than 1880; and even in its beginnings it hardly antedates the seventeenth century. In contrast to this method of grammatical analysis, Father Most's textbooks reproduce much of the "natural method" by which children learn their native language. Hence, the significance of Father Most's books is manifestly great for the Latin classes in any Catholic high schools or colleges. So much of our Catholic doctrine and culture have been deposited in Latin that we want many of our educated Catholics to be able to use Latin with ease. But the special significance of Father Most's texts is for the Latin classes in our seminaries. Here the students still have much the same cogent motives to master the art of using Latin with ease as the pupils of the thirteenth or sixteenth century. They need it as an indispensable means of communicating thought in their higher studies, and afterwards throughout life. The objectives (knowledge about Latin and training of mind) and corresponding methods (grammatical analysis and translation) "traditional" since 1880 have taken over in our seminaries; and there too the students have been experiencing an ever growing inability to use Latin. Father Most's textbooks can contribute much towards revolutionizing the teaching of Latin by bringing back, as the chief objective, the art of reading, writing, and (when desired) speaking Latin with ease." Fr. Most's textbooks can be classed in categories of similar texts, such as Hans Ørberg's *Lingua Latina*, as well as *Ecce Romani* which is a simplification of Ørberg or others which aim to teach Latin not even so much as a modern language, as to teach it by a method more natural to the philosophy of learning Languages. Fr. Most's text follows the view that Latin of the later period is actually more advanced in communicating ideas and is easier to learn than Latin of the classical period, and thus this Second Volume begins the transition with readings and vocabulary from the Vulgate, continuing with the more ancient collects of the 1962 *Missale Romanum*, St. Cyprian and culminating with a reading from the Roman Historian Sallust. This is an excellent text applying the "natural method" with English language instruction to help the student read and understand Latin natively, with numerous vehicles for simplifying the necessary memorization as well as aiding in truly understanding Latin without constant need to look in a dictionary for rudimentary sentences. This is reprinted from the 1960 edition, and follows the presentation of the text found in that edition.

Teachers, especially those in nursery and pre-primary schools, know that it takes specialized learning aids to help children learn how to identify objects, develop eye-hand and fine motor coordination, improve attention span, and learn to focus on the activity in which they are participating. The aim of BEE CLEVER Activity Books Keeping these important learning factors in mind, a pre-school educator and counsellor has created a series of simple and stimulating activity books. These help develop the skills a child needs, plus contribute to the further development of the child's 'writing readiness'. Pallavi Dalal - the creator of BEE CLEVER Activity Books - has spent over 25 years working with pre-school children. She says, "There has been much thought, care, understanding, laughter and joy that has gone into creating these books. I can only hope that they will bring children many 'magical moments' of learning, and spending time with each other in a happy and relaxed frame of mind." Two Important Factors While planning any activity for children, two

important principles of learning are always uppermost in her mind: 1. "I see and I remember." 2. "I do and I understand." She has designed these books to develop differentiating and logical thinking skills in children and evaluate their interests in certain areas, without making them feel like they are being 'tested'! How BEE CLEVER books are DIFFERENT - Objects illustrated are those a child is generally familiar with. - Instructions can be read to a child without having to simplify them. - Illustrations are bold and clear for the child to see and work comfortably. - Accurate use of grammar, punctuation and spelling. - Each book in the series explains the value of doing that specific activity. - Simple 'Do's and Don'ts' create a 'win-win' situation for the child. BEE CLEVER SERIES: - Colouring 1 - Colouring 2 - Join the Dots 1 - Join the Dots 2 Matching - Mazes 1 - Mazes 2 - Numbers 1 - Numbers 2 - Odd One Out - Opposites 1 - Opposites 2 - Pattern & Letter Writing 1 - Pattern & Letter Writing 2 - Phonics 1 - Phonics 2 - Shapes 1 - Shapes 2 - Story Sequence - What's Different? - What's Next? - What's Wrong?
