Armchair Fiction presents classic science fiction double novels. The first novel is "Sons of the Deluge" by Nelson S. Bond. With Mexican security hot on their trail, Duke Callion and Joey Cox sought refuge in an obscure Yucatan peninsula town. There they were rescued by a mysterious man who offered his own abode as their hideout. But Callion and Cox were bewildered by their new friend's fantastic tale. He claimed to be a member of the Atlantean race—a race extinct for thousands of years, wiped out by a titanic flood. Quelchal had been exiled in time, 12,000 years into the future! But it was his grand plan to return to the past and somehow warn his people of the impending disaster; to somehow save them from the wall of water that would destroy the entire Atlantean culture. Using his incredible time ship, and with Callion and Cox by his side, the trio embarked on a daring and deadly adventure, traveling back to the age of Atlantean splendor—to warn a civilization, before it was too late... The second novel is by lauded sci-fi author Raymond Z. Gallun, "Dawn of the Demi-gods." Eons before man set foot into outer space there had been a great war. A war between Mars and Planet X. The conflict came to a bloody end with the destruction of all life on Mars and the obliteration of Planet X, which was reduced to rubble and became the asteroid belt. But centuries later strange things began to happen on Jupiter's moon, Ganymede. There came a report of the discovery of a cache of tools in a chest that was of almost microscopic dimensions. In finding it, several men were afflicted with dizziness. One had died. It soon became clear that the hand of an alien race was responsible—an alien race of almost unfathomable smallness. And soon, as unheralded as ghosts, but as significant as a new dawn of history, there came to Earth from distant Ganymede's glowing crescent—three micro-androids, minuscule beings, carrying the treasure of immortality.

Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

There are more than 1,000 school and community college (K-14) districts in California. To build, repair, or equip their campuses, they must ask voters to approve a general obligation (GO) bond and raise their property taxes rates -- a big ask. While GO bonds have become a multi-billion-dollar market, there has to date been no "how to" guide for district administrators, elected officials, taxpayer organizations, and concerned citizens. There is now. With hard-earned wisdom and wry wit, Dale Scott, California's leading K-14 financial advisor, has written WIN WIN: An Insider's Guide to School Bonds to demystify the complex, often challenging process that goes on "underneath the hood" in developing, structuring, passing, and selling a GO bond. Drawing on three decades of work as an advisor to school districts and community college districts, investment banker on Wall Street, financial advisor, and campaign manager, Dale walks readers through each step of the process, answering the many questions he's been asked over the years. Hard-hitting, detailed, and humorous, WIN WIN explores and explains why some bond elections pass but others fail, how bond deals are put together, tips on selecting the right team of professionals, how to avoid recent scandals surrounding GO bonds, and how to tell if tax rate estimates are accurate or just wishful thinking. Scott's book is an upbeat demystification of the complex processes of California school bonds, showing that when executed correctly, the teamwork of passing a school bond can have a transformative effect on both local schools and people's sense of their role in their community.
