"Dr. Allison McWilliams has hit the nail right on the head and provides focused, effective and actionable ideas for recent college grads who are getting too much inspiration and too little useable help addressing the substantial challenge of building their lives after college. Much of the literature for this audience patronizingly over-compliments them ("You are amazing and can do anything ") or over-criticizes them ("Today's young adults are so entitled - they're impossible "). Neither of these categorizations is accurate or helpful - quite the opposite. Dr. McWilliams distills her substantial experience in working in some of the most advanced career-preparatory institutions in the country well by picking five key areas for grads to focus their efforts in building a life they own and can love. Her assessments of what's needed directly complements our decade-plus of work in the Stanford Life Design Lab. Her counsel spans the wide swath of necessary critical skills ranging from forming deep habits of personal reflection to navigating the tactical constraints of that tough first job out of college many grads will get. She tells it like it is without making assumptions or judgments about her reader and balances artfully conversing with her reader and challenging them via exercises to do the work. Like Dr. McWilliams, our team believes that successfully journeying those first five years after graduation (and defining what success is wisely ) is terrifically important. If you love anyone who is currently or about to be in those five years, do them the kindness of giving them this book." Dave Evans, Co-Author, New York Times #1 Bestseller *Designing Your Life*, and Co-Founder, Stanford Life Design Lab \*\*\* Young adults making their way from college to life-after-college face a multitude of decisions, challenges, and opportunities. How do you build skills and experiences that will benefit you in the future, when you are on the lowest rung of the professional ladder, or in a job that doesn't seem to be going anywhere? How do you balance creating a life with professional demands when your time is not your own? How do you ensure you are practicing self-care - physically, mentally, financially, and emotionally - when you don't know what the resources are to do that? How do you build community and find friends? How do you build your network and find mentors? And, how do you take ownership for what comes next? These and many others are the questions that all young professionals should be asking themselves, especially in the critical first five years out of college. This is the time when you will discover more about yourself than at any other point in your life. You will discover strengths, interests, and beliefs that will guide your future career and life decisions. You will learn professional and life skills and habits that will be the foundation for your future professional selves. You will begin to discern what matters to you, and begin to define what a meaningful life looks like, for you. And, you largely will be expected to do all of this work on your own. Where do you begin? *FIVE FOR YOUR FIRST FIVE* is based on twenty years of experience working with college students and young adults as they make this sometimes challenging and overwhelming transition from college to life-after-college. It combines real-life stories and experiences, from young adults who have already navigated through these waters, with tools, strategies, discussion, and reflection questions. The reader is encouraged to do real, intentional work while exploring the five key areas: Do the Work, Build a Life, Create Community, Practice Reflection, and Own What's Next. Part workbook, part wise counselor and mentor, *FIVE FOR YOUR FIRST FIVE* provides meaningful insight into what can happen when you truly take ownership for your career and life. \*\*\*

In 1871 Mississippi Governor James L. Alcorn recommended that the state legislature support the formation of Alcorn University. The campus of Oakland College, a school founded by the Presbyterian Church in 1830, had been abandoned after the Civil War and was purchased for forty thousand dollars and designated for the education of black youth. The school became Alcorn Agricultural and Mechanical College in 1878, and Alcorn State University in 1974. In this unique pictorial retrospective, over one hundred years of growth and change at Alcorn are

explored and celebrated. Included within these pages are vintage photographs of the students and faculty that have shaped the school's history. From early classes and sporting events to distinguished alumni and prominent leaders, the images depict a university continually striving to educate, train, and inspire young African Americans. Alcorn's picturesque campus, with moss-draped trees and scenic lakes, provides a setting where, for over a century, students have been given a multitude of opportunities to grow. The first land-grant institution for blacks in the United States, Alcorn is a public university committed to academic excellence. The challenges faced by its students and faculty in its earliest days brought forth an unyielding determination to succeed, which is still evident today among its diverse student body.

"Joe Feldman shows us how we can use grading to help students become the leaders of their own learning and lift the veil on how to succeed. . . . This must-have book will help teachers learn to implement improved, equity-focused grading for impact." --Zaretta Hammond, Author of Culturally Responsive Teaching & The Brain Crack open the grading conversation Here at last—and none too soon—is a resource that delivers the research base, tools, and courage to tackle one of the most challenging and emotionally charged conversations in today's schools: our inconsistent grading practices and the ways they can inadvertently perpetuate the achievement and opportunity gaps among our students. With *Grading for Equity*, Joe Feldman cuts to the core of the conversation, revealing how grading practices that are accurate, bias-resistant, and motivational will improve learning, minimize grade inflation, reduce failure rates, and become a lever for creating stronger teacher-student relationships and more caring classrooms. Essential reading for schoolwide and individual book study or for student advocates, *Grading for Equity* provides A critical historical backdrop, describing how our inherited system of grading was originally set up as a sorting mechanism to provide or deny opportunity, control students, and endorse a "fixed mindset" about students' academic potential—practices that are still in place a century later A summary of the research on motivation and equitable teaching and learning, establishing a rock-solid foundation and a "true north" orientation toward equitable grading practices Specific grading practices that are more equitable, along with teacher examples, strategies to solve common hiccups and concerns, and evidence of effectiveness Reflection tools for facilitating individual or group engagement and understanding As Joe writes, "Grading practices are a mirror not just for

students, but for us as their teachers.” Each one of us should start by asking, “What do my grading practices say about who I am and what I believe?” Then, let’s make the choice to do things differently . . . with Grading for Equity as a dog-eared reference.

A job-search manual that gives career seekers a systematic, tech-savvy formula to efficiently and effectively target potential employers and secure the essential first interview. The 2-Hour Job Search shows job-seekers how to work smarter (and faster) to secure first interviews. Through a prescriptive approach, Dalton explains how to wade through the Internet's sea of information and create a job-search system that relies on mainstream technology such as Excel, Google, LinkedIn, and alumni databases to create a list of target employers, contact them, and then secure an interview—with only two hours of effort. Avoiding vague tips like "leverage your contacts," Dalton tells job-hunters exactly what to do and how to do it. This empowering book focuses on the critical middle phase of the job search and helps readers bring organization to what is all too often an ineffectual and frustrating process.

The University of Central Florida has stood at the edges of Orlando for 40 years, a major institution of research, culture, education, and professional development stitched into the fabric of one of the nation's most dynamic and influential metropolitan areas. Conceived in 1963, at the height of America's fascination

with the space program and less than an hour from Florida's Space Coast, the school began as Florida Technological University, a vast and remote tract of wild palmettos and swampland that held the promise of a cutting-edge "Space University." But 1963 was the same year that Walt Disney made his fateful fly over Central Florida and chose the location for Walt Disney World, a decision that would ultimately transform the entire region. Florida Tech found itself growing along with the surrounding community in size, prominence, and power into a diverse institution that no one in those early years could have envisioned. Renamed the University of Central Florida in 1979 to better reflect its broad curriculum and its strong marriage with the region, the school has blossomed into the prototype for the modern metropolitan university.

How to teach big understandings and the ideas that matter most Everyone has an opinion about education, and teachers face pressures from Common Core content standards, high-stakes testing, and countless other directions. But how do we know what today's learners will really need to know in the future? *Future Wise: Educating Our Children for a Changing World* is a toolkit for approaching that question with new insight. There is no one answer to the question of what's worth teaching, but with the tools in this book, you'll be one step closer to constructing a curriculum that prepares students for whatever situations they might face in the future. K-12 teachers and administrators play a crucial role in building a thriving society. David Perkins, founding member and co-director of Project Zero at Harvard's Graduate School of Education, argues that curriculum is one of the most important elements of making students ready for the world of tomorrow. In *Future Wise*, you'll learn concepts, curriculum criteria, and techniques for prioritizing content so you can guide students toward the big understandings that matter. Understand how learners use knowledge in life after graduation Learn strategies for teaching critical thinking and addressing big questions Identify top priorities when it comes to disciplines and content areas Gain curriculum design skills that make the most of learning across the years of education *Future Wise* presents a brand new framework for thinking about education. Curriculum can be one of the hardest things for teachers and administrators to change, but David Perkins shows that only by reimagining what we teach can we lead students down the road to functional knowledge. *Future Wise* is the practical guidebook you need to embark on this important quest.

"We cannot change the cards we are dealt, just how we play the hand."---Randy Pausch A lot of professors give talks titled "The Last Lecture." Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave--"Really Achieving Your Childhood Dreams"--wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because "time is all you have...and you may find one day that you have less than you think"). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

With nearly thirty years of experience as both a public relations teacher and practitioner, Barbara Diggs-Brown has written a text based on her unwavering belief that to practice effective public relations today requires strategic thinking and audience focus, which can only

be accomplished by listening and hearing audiences through formative, process, and evaluative research. In addition to highlighting audience-focused principles and techniques of audience research and recurring assessment, **STRATEGIC PUBLIC RELATIONS: AN AUDIENCE-FOCUSED APPROACH** is based on the premise that public relations is a management function, one coordinated with an organization's other management divisions. Intended for undergraduate courses in PR, serving both majors in the field and nonmajors, this text provides a comprehensive survey of PR's foundations, processes, tactics, and contexts. **A Message to Black College Students** is a book that addresses Black college students' role in overall black progression, as well as some of our habits that hinder it. Habits such as individualism, a distorted view of success, and a flawed definition of Black Excellence...to name a few. Using historical context, personal experience, and data/statistics I've painted a picture of how we got to this point and what we can do to move forward. Dissatisfaction breeds improvement, while satisfaction inhibits complacency.??

The New York Times Bestselling guide for managers and executives. Introducing the new, realistic loyalty pact between employer and employee. The employer-employee relationship is broken, and managers face a seemingly impossible dilemma: the old model of guaranteed long-term employment no longer works in a business environment defined by continuous change, but neither does a system in which every employee acts like a free agent. The solution? Stop thinking of employees as either family or as free agents. Think of them instead as allies. As a manager you want your employees to help transform the company for the future. And your employees want the company to help transform their careers for the long term. But this win-win scenario will happen only if both sides trust each other enough to commit to mutual investment and mutual benefit. Sadly, trust in the business world is hovering at an all-time low. We can rebuild that lost trust with straight talk that recognizes the realities of the modern economy. So, paradoxically, the alliance begins with managers acknowledging that great employees might leave the company, and with employees being honest about their own career aspirations. By putting this new alliance at the heart of your talent management strategy, you'll not only bring back trust, you'll be able to recruit and retain the

entrepreneurial individuals you need to adapt to a fast-changing world. These individuals, flexible, creative, and with a bias toward action, thrive when they're on a specific "tour of duty"—when they have a mission that's mutually beneficial to employee and company that can be completed in a realistic period of time. Coauthored by the founder of LinkedIn, this bold but practical guide for managers and executives will give you the tools you need to recruit, manage, and retain the kind of employees who will make your company thrive in today's world of constant innovation and fast-paced change.
