Dr Elson Haas,Dr Sondra Barrett

Boostez votre système immunitaire Dr Elson Haas,Dr Sondra Barrett,2016-03-02 Notre système immunitaire est bien plus complexe et protecteur qu'il n'y paraît. Il ne se limite pas à lutter contre le rhume ou la grippe saisonnière, ou encore la gastroentérite. C'est notre équilibre général qui est en jeu dans son bon fonctionnement, car il résulte de l'interaction entre les organes, les cellules et les substances composant notre corps. Un grand nombre de facteurs âge, antécédents familiaux, pathologies antérieures, traitements médicaux, environnement - peuvent altérer son efficacité. Allergies et autres maladies chroniques sont alors le signe d'une faiblesse et d'un déséquilibre. Les épidémiologistes ont noté que la quantité de cellules immunitaires n'était pas une garantie de bonne résistance. Notre hygiène de vie influence très sensiblement le bon fonctionnement de nos défenses naturelles : alimentation, sommeil, gestion du stress, respiration, activités physiques, relations humaines harmonieuses. Cet ouvrage réunit les méthodes alternatives les plus pertinentes pour préserver ou rééquilibrer son système immunitaire. Il propose : Cinq programmes de rééquilibrage reposant sur la diététique, les changements à apporter à son mode de vie, des exercices pour réconcilier corps et esprit : maladies inflammatoires, maladies chroniques, terrains infectieux, allergies, maladies auto-immunes. Un programme global sur le long terme pour réduire le stress, retrouver le plaisir de bouger et de bien s'alimenter au quotidien. Des recettes utilisant des ingrédients réputés pour leur action favorable sur le système immunitaire.

Scientific Babel Michael D. Gordin,2015-04-13 English is the language of science today. No matter which languages you know, if you want your work seen, studied, and cited, you need to publish in English. But that hasn't always been the case. Though there was a time when Latin dominated the field, for centuries science has been a polyglot enterprise, conducted in a number of languages whose importance waxed and waned over time—until the rise of English in the twentieth century. So how did we get from there to here? How did French, German, Latin, Russian, and even Esperanto give way to English? And what can we reconstruct of the experience of doing science in the polyglot past? With *Scientific Babel*, Michael D. Gordin resurrects that lost world, in part through an ingenious mechanism: the pages of his highly readable narrative account teem with footnotes—not offering background information, but presenting quoted material in its original language. The result is stunning: as we read about the rise and fall of languages, driven by politics, war, economics, and institutions, we actually see it happen in the ever-changing web of multilingual examples. The history of science, and of English as its dominant language, comes to life, and brings with it a new understanding not only of the frictions generated by a scientific community that spoke in many often mutually unintelligible voices, but also of the possibilities of the polyglot, and the losses that the dominance of English entails. Few historians of science write as well as Gordin, and *Scientific Babel* reveals his incredible command of the literature, language, and intellectual essence of science past and present. No reader who takes this linguistic journey with him will be disappointed.

Le Faussaire des cœurs Margaux Marchal,2021-11-02T00:00:00Z Tout est parti d'une blague, d'un jeu, comme cette

fameuse citation : « Le premier qui tombe amoureux a perdu. » Sauf que mon amoureux voulait juste me faire perdre la raison, le goût de vivre, et moi je ne comprenais pas. Amoureuse et aveugle, j'ai pris ses mensonges pour des vérités et je suis tombée dans le piège d'un pervers narcissique manipulateur. Il me faudra un an et demi pour comprendre et une chute sans fin vers les ténèbres pendant laquelle je perdrai presque tout. Moi qui vivais dans l'optimisme et la vérité, je vais presque mourir d'avoir aimé.

Storytelling Christian Salmon,2017-01-31 The narrative spell cast over politics and society Politics is no longer the art of the possible, but of the fictive. Its aim is not to change the world as it exists, but to affect the way that it is perceived. In *Storytelling* Christian Salmon looks at the twenty-first-century hijacking of creative imagination, anatomizing the timeless human desire for narrative form, and how this desire is abused by the marketing mechanisms that bolster politicians and their products: luxury brands trade on embellished histories, managers tell stories to motivate employees, soldiers in Iraq train on Hollywood-conceived computer games, and spin doctors construct political lives as if they were a folk epic. This “storytelling machine” is masterfully unveiled by Salmon, and is shown to be more effective and insidious as a means of oppression than anything dreamed up by Orwell.

A History of the French in London Debra Kelly,Martyn Cornick,2013 This book examines, for the first time, the history of the social, cultural, political and economic presence of the French in London, and explores the multiple ways in which this presence has contributed to the life of the city. The capital has often provided a place of refuge, from the Huguenots in the 17th century, through the period of the French Revolution, to various exile communities during the 19th century, and on to

the Free French in the Second World War. It also considers the generation of French citizens who settled in post-war London, and goes on to provide insights into the contemporary French presence by assessing the motives and lives of French people seeking new opportunities in the late 20th and early 21st centuries. It analyses the impact that the French have had historically, and continue to have, on London life in the arts, gastronomy, business, industry and education, manifest in diverse places and institutions from the religious to the political via the educational, to the commercial and creative industries.
