Nineteen years ago, while still in his twenties, Erwin James was sentenced to life imprisonment. Over the past three years, he has written about prison life for the Guardian. This book brings together these pieces. In *A Life Inside*, James writes about learning the who, what, why and when of the prison world. He describes the struggle to keep sane; the dynamics of paranoia and solidarity between men forced into years of co-existence; and the commitment that it takes to prepare for life outside. Along the way, James introduces us to other prisoners. There is Rinty, the big Dundonian and enthusiastic fan of Antiques Roadshow; Cody, the elderly former sergeant who still protests his innocence after twenty-four years; and Felix the Gambler - serial schemer and sometime Buddhist. It is through their stories, told with humour and warmth, the James reveals the reality of prison life.

Grounded in the best practices of effective writing instruction, *Joining the Conversation's* rhetorical approach builds an awareness of writing purposes and genres as it teaches students to read critically, research effectively, and respond thoughtfully to the conversations around them. Comprehensive assignment chapters span reflective, informative, analytical and persuasive writing, following real students throughout their writing processes. Supportive apparatus guides writers from finding a conversation to join all the way through documenting their essays. Throughout the text, with techno-literate practice at the fore, multimodality is always an option and the conversation metaphor empowers students to make their voices heard--with their peers, in academic communities, and in the world. Based on reviewer feedback, the third edition of *Joining the Conversation* offers a new opening chapter on understanding yourself as a writer, more substantial academic readings on compelling subjects that matter to students, and an expanded digital option in *Launchpad for Joining the Conversation*. With theory put into practice, *Joining the Conversation* exemplifies the best of what writing instruction should be.

Wonderfully written and masterfully plotted, *Moo* gives us a wickedly funny slice of life.

Book Excerpt: ...Review, as I have said, had taken a condescending notice of Bentham in 1804. Mill tried to introduce a better tone into an article upon Bexon's Code de la Législation pénale, which he was permitted to publish in the number for October 1809. Knowing Jeffrey's 'dislike of praise, ' he tried to be on his guard, and to insinuate his master's doctrine without openly expressing his enthusiasm. Jeffrey, however, sadly mangled the review, struck out every mention but one of Bentham, and there substituted words of his own for Mill's. Even as it was, Brougham pronounced the praise of Bentham to be excessive.[7] Mill continued to write for a time, partly, no doubt, with a view to Jeffrey's cheques. Almost his last article (in January 1813) was devoted to the Lancasterian controversy, in which Mill, as we shall directly see, was in alliance with the Whigs. But the Edinburgh Reviewers were too distinctly of the Whig persuasion to be congenial company for a determined Radical....

From long-standing worries regarding the use of lead and asbestos to recent research into carcinogenic issues related to the use of plastics in construction, there is growing concern regarding the potential toxic effects of building materials on health. Toxicity of building materials provides an essential guide to this important problem and its solutions. Beginning with an overview of the material types and potential health hazards presented by building materials, the book goes on to consider key plastic materials. Materials responsible for formaldehyde and volatile organic compound emissions, as well as semi-volatile organic compounds, are then explored in depth, before a review of wood preservatives and mineral fibre-based building materials. Learning how to use critical self-reflection creatively when practising therapy is an important component of training. This level of self-awareness is, however, often neglected in research, despite the centrality of the researcher to their work. Doing Practice-based Research in Therapy: A Reflexive Approach makes the vital link between practical research skills and self-awareness, critical reflection and personal development in practice-based research. Starting with a clear introduction to the theory, practice and debates surrounding this type of research, the book then guides the reader step-by-step through the practicalities of the research process, encouraging them to reflect upon and evaluate their practice at each stage. The book: - incorporates case studies throughout to illustrate different methodological approaches - uses real life examples from students conducting practice-based psychotherapy research - includes exercises, chapter objectives, end-of-chapter questions and suggestions for further

reading to help consolidate learning - encourages ongoing personal development by introducing personal development planning (PDP) and lifelong learning in the field of research. By demystifying the reflexive approach, this highly practical guide ensures that trainees and qualified therapists get the most, both professionally and personally, from their practice-based research.
