Going beyond the standard workout for boxers, this innovative manual introduces a diverse set of training methods, integrating them into drill sets that build the athletic attributes for which past and present fighters are known. From Leroy Jones sparring with chickens and Ken Norton's 15 combined rounds of shadow boxing, sparring, and bag work to Ricky Hatton's staggering 12-round sparring bouts with a body belt and Kosta Tszu's creative tennis-ball and head-strap punching apparatus, this guide highlights a wide vocabulary of exercises, all incorporating boxing-specific equipment. The drills can be performed solo or with a partner, and each piece of equipment is approached individually with detailed descriptions of routines, including floor exercises and drills with the heavy bag, medicine ball, horizontal rope, and jump rope. With two workout menus for weight training, this guide guarantees a regime to suit any individual need—be it professional or simply a desire to train like some of the best athletes in the world.

Hey! How Much Do You Bench Press? There's a reason why the bench press is the most popular lift in the gym: it lets you lift more weight and activate more muscle in the upper body than any other move. With just this one lift, you can work your deltoids, your pecs, your triceps, forearms, abdominals, and even your hand muscles. What you didn't know is bench press is also good for punching ... Wow! But what if I told you there is an exercise many trainers and experts including myself consider the "King" of exercises, would you be interested in learning? Add two more moves and you've got a complete body workout. Squat and deadlift. That's it. If you didn't know, squats target your glutes (butt), while working your quads and hamstrings and calves and doubling up on your abs. Which is good for kicking. You can never get enough work on your abs, especially when you are being kicked and punched in them for competition or in a self-defense situation, right? Now round out and wrap up your workout (and your backside) with the deadlift. Everything from your neck down to your calves, your whole spine and back, gets strengthened with the deadlift. With all those muscle groups being affected, you need to
