Brain Games for Clever KidsBuster Books

Workbooks for kids have been the same for such a long time. Books titled "for kids ages 6-8 or 8-10 or 8-12" can be found anywhere and even become best sellers. Nevertheless, it is scientifically proven that every child grows significantly every year and kids of different ages are not alike. A high-quality book cannot fit second graders and fourth graders at the same time. Forced to learn with an unsuitable book, kids may start to get bored, waste their time and lose their interest in studying. As educators and parents, we care about your kids and understand their characteristics, needs and thinking skills. Unlike other books for a wide age range, this book is tailored for 8-year-olds. Our book "Brain games for 8 year old: Word search, Crossword & Sudoku" is published to foster a positive approach to education for this particular stage of growth. But why not 1, but 3 contents? This book aims at providing your kids with interesting learning experiences and promoting balanced brain development: Word Search and Crossword puzzles: There are 15 topics in each type. These word games help to enhance kids' spelling and word recognition skills. Also, children can improve their vocabulary, as well as strengthen their attention, which can positively influence their future. Sudoku: 60 puzzles of 6x6 and 9x9 grids can level up kid's brain power by developing analytical and logical thinking, and promote healthy pleasure. If you think your beloved children deserve the opportunity to learn with an age-appropriate book, you have come to the right place! This book is a part of our series, "Brain Games for Clever Kids", each of which suits a particular age, highly recommended by teachers and researchers for comprehensive intellectual development.

A comprehensive, upbeat guide to help you survive the moving process from start to finish, filled with fresh strategies and checklists for timing and supplies, choosing which items to toss and which to keep, determining the best place to live, saying farewell and looking forward to hello. Moving is a major life change—time consuming, expensive, often overwhelming, and sometimes scary. But it doesn't have to be! Instead of looking it as a burdensome chore, consider it a new adventure. Ali Wenzke and her husband moved ten times in eleven years, living in seven states across the U.S. She created her popular blog, The Art of Happy Moving, to help others build a happier life before, during, and after a move. Infused with her infectious optimistic spirit, The Art of Happy Moving builds on her blog, offering step-by-step guidance, much-needed comfort, practical information, and welcome advice on every step of the process, including: How to stage your home for prospective buyers How to choose your next neighborhood How to discard your belongings and organize your packing How to say goodbye to your friends How to make the transition easier for your kids How to decorate

your new home How to build a new community And so much more. Ali shares invaluable personal anecdotes from her many moves, and packs each chapter with a wealth of information and ingenious tips (Did you know that if you have an extra-large welcome mat at the entrance of your home, it's more likely to sell?). Ali also includes checklists for packing and staging, and agendas for the big moving day. Whether you're a relocating professional, newly married, a family with kids and pets, or a retiree looking to downsize, *The Art of Happy Moving* will help you discover ways to help make your transition an easier one—and be even happier than you were before.
