Building Higher Education Cooperation with the EU: Challenges and Opportunities from Four Continents offers a detailed study of higher education cooperation between the EU and four continents with an examination of the challenges and opportunities. ‘This extraordinary collection is a game-changer. Featuring the cutting-edge work of over forty scholars from across the globe, The Routledge Handbook of the Global Sixties is breathtaking in its range, incisive in analyses, and revolutionary in method and evidence. Here, fifty years after that iconic "1968," Western Europe and North America are finally de-centered, if not provincialized, and we have the basis for a complete remapping, a thorough reinterpretation of the "Sixties.” —Jean Allman, J.H. Hexter Professor in the Humanities; Director, Center for the Humanities, Washington University in St. Louis

‘This is a landmark achievement. It represents the most comprehensive effort to date to map out the myriad constitutive elements of the "Global Sixties" as a field of knowledge and inquiry. Richly illustrated and meticulously curated, this collection purposefully "provincializes" the United States and Western Europe while shifting the loci of interpretation to Africa, the Middle East, Asia, and Latin America. It will become both a benchmark reference text for instructors and a gateway to future historical research.’ —Eric Zolov, Associate Professor of History; Director, Latin American & Caribbean Studies, Stony Brook University

‘This important and wide-ranging volume de-centers West-focused histories of the 1960s. It opens up fresh and vital ground for research and teaching on Third, Second, and First World transnationalism(s), and the many complex connections, tensions, and histories involved.’ —John Chalcraft, Professor of Middle East History and Politics, Department of Government, London School of Economics and Political Science

‘This book globalizes the study of the 1960s better than any other publication. The authors stretch the standard narrative to include regions and actors long neglected. This new geography of the 1960s changes how we understand the broader transformations surrounding protest, war, race, feminism, and other themes. The global 1960s described by the authors is more inclusive and relevant for our current day. This book will influence all future research and teaching about the postwar world.’ —Jeremi Suri, Mack Brown Distinguished Chair for Leadership in Global Affairs; Professor of Public Affairs and History, The University of Texas at Austin

As the fiftieth anniversary of 1968 approaches, this book reassesses the global causes, themes, forms, and legacies of that tumultuous period. While existing scholarship

continues to largely concentrate on the US and Western Europe, this volume will focus on Asia, Africa, the Middle East, and Eastern Europe. International scholars from diverse disciplinary backgrounds explore the global sixties through the prism of topics that range from the economy, decolonization, and higher education, to forms of protest, transnational relations, and the politics of memory.

This is the first complete modern survey of the institution of slavery in Brazil and how it affected the lives of enslaved Africans. It is based on major new research on the institution of slavery and the role of Africans and their descendants in Brazil. This book aims to introduce the reader to this latest research, both to elucidate the Brazilian experience and to provide a basis for comparisons with all other American slave systems.

No other national stereotype in the world is so closely tied with a sport, as Brazil is with football. The five-time world champions have constructed their national identity around this sport. Perhaps for this reason it's no wonder that there are many Brazilian social scientists doing research on this theme. The first part of this volume is dedicated to the history of Brazilian football. The main question is how did football become so popular in the country? It also looks at other interesting historical developments in Brazilian football history up to this day. The second part considers current phenomena, especially the place of Brazilian football in a globalized world: What are the consequences of an extremely commercialized and mediatized sport on a developing country? How does Brazil figure as the main supplying country of football talents? How does the population feel about seeing their players in Europe instead of their own country? Finally, the book will conclude with a critique of a documentary film about a Brazilian national team game in Haiti which was part of the Brazilian army's blue helmet mission. The game was used as a political instrument, revealing the importance of this sport in attaining a political position for Brazil in the world. This book was previously published as a special issue of Soccer and Society.

Spanish speakers can learn Brazilian Portuguese much more rapidly than any other language, and thousands of students have used Antônio Simões's text/workbook *Com licença: Brazilian Portuguese for Spanish Speakers* to make the transition between the two languages. Recognizing the need for a text that incorporates current cultural references and the latest language pedagogy, Simões now offers *Pois não: Brazilian Portuguese Course for Spanish Speakers, with Basic Reference Grammar*. *Pois não* contrasts Portuguese and Spanish, which accomplishes two main goals. It teaches the equivalent of one year of college Portuguese in one semester, three times a week, to Spanish speakers who also have a solid understanding of English. Additionally, the book serves as a basic reference guide to Brazilian Portuguese for the same audience. *Pois não* can be used by students in the classroom or by independent learners. Users of the book may focus on the drills alone, concentrate on both the explanations and drills, or use the book as a reference for consultation only. Answers to all of the exercises are included in the book. A CD containing recordings by native Brazilian speakers of dialogues that appear in the book is included.

There is a Brazilian version and European Portuguese version of the Student Activities Manual. The organization of the Student Activities Manual follows that of the main text, providing further practice of each chapter's vocabulary and grammatical structures through sentence-building and completion exercises, fill-ins, and art- and realia-cued activities. Reading and writing activities include strategies for improving reading and writing skills. The audio recorded passages are followed by comprehension-check activities. The video based activities test students' comprehension of the video and invite them to react to the experiences and opinions expressed by the speakers. A substantial appendix to both SAMs provides additional targeted practice for Spanish-speaking learners of Portuguese.

This book sheds light on the integration processes and identity patterns of Angolan, Brazilian and Eastern European communities in Portugal. It examines the privileged position that immigrant organisations hold as interlocutors between the communities they represent and various social service mechanisms operating at national and local levels. Through the collection of ethnographic data and the realisation of 110 interviews with community insiders and middlemen, culled over a year's time, Joo Sardinha provides insight into how the three groups are perceived by their respective associations and representatives. Following up on the rich data is a discussion of strategies of coping with integration and identity in the host society and reflections on Portuguese social and community services and institutions.

An innovative study of student activism during Brazil's military dictatorship (1964–85) and an examination of the very notion of student activism, which changed dramatically in response to the student protests of 1968.

Global 1968 is a unique study of the similarities and differences in the 1968 cultural revolutions in Europe and Latin America. The late 1960s was a time of revolutionary ferment throughout the world. Yet so much was in flux during these years that it is often difficult to make sense of the period. In this volume, distinguished historians, filmmakers, musicologists, literary scholars, and novelists address this challenge by exploring a specific issue—the extent to which the period that we associate with the year 1968 constituted a cultural revolution. They approach this topic by comparing the different manifestations of this transformational era in Europe and Latin America. The contributors show in vivid detail how new social mores, innovative forms of artistic expression, and cultural, religious, and political resistance were debated and tested on both sides of the Atlantic. In some cases, the desire to confront traditional beliefs and conventions had been percolating under the surface for years. Yet they also find that the impulse to overturn the status quo was fueled by the interplay of a host of factors that converged at the end of the 1960s and accelerated the transition from one generation to the next. These factors included new thinking about education and work, dramatic changes in the self-presentation of the Roman Catholic Church, government repression in both the Soviet Bloc and Latin America, and universal disillusionment with the United States. The contributors demonstrate that the short- and long-term effects of the cultural revolution of 1968 varied from country to country, but the period's defining legacy was a lasting shift in values, beliefs, lifestyles, and artistic sensibilities. Contributors: A. James McAdams, Volker Schlöndorff, Massimo De Giuseppe, Eric Drott, Eric Zolov, William Collins Donahue, Valeria Manzano, Timothy W. Ryback, Vania Markarian, Belinda Davis, J. Patrice McSherry, Michael Seidman, Willem Melching, Jaime M. Pensado, Patrick Barr-Melej, Carmen-Helena Téllez, Alonso Cueto, and Ignacio Walker.

"Spans the period from World War II to the present during which Rutgers grew from two small, liberal arts colleges, an agricultural school, and an engineering school into a major public research university. We chronicle the remarkable story of Rutgers's rise as a research university, but also the way the school has been experienced by generations of students and residents of the state. The Cold War, the student protests of the 1960s and the 1970s, the rise of identity politics on campus, big-time athletics, and the various ways students have shaped and been affected by popular culture all play a part in this story. Three chapters cover chronologically the major changes that occurred at the university between 1945 and the present, bringing up to date the work done in Richard P. McCormick's, *Rutgers, A Bicentennial History* (1966). The remaining chapters provide snapshots of some of the key themes in the contemporary history of the school --

Physical inactivity is a key determinant of health across the lifespan. A lack of activity increases the risk of heart disease, colon and breast cancer, diabetes mellitus, hypertension, osteoporosis, anxiety and depression and others diseases. Emerging literature has suggested that in terms of mortality, the global population health burden of physical inactivity approaches that of cigarette smoking. The prevalence and substantial disease risk associated with physical inactivity has been described as a pandemic. The prevalence, health impact, and evidence of changeability all have resulted in calls for action to increase physical activity across the lifespan. In response to the need to find ways to make physical activity a health priority for youth, the Institute of Medicine's Committee on Physical Activity and Physical Education in the School Environment was formed. Its purpose was to review the current status of physical activity and physical education in the school environment, including before, during, and after school, and examine the influences of physical activity and physical education on the short and long term physical, cognitive and brain, and psychosocial health and development of children and adolescents. Educating the Student Body makes recommendations about approaches for strengthening and improving programs and policies for physical activity and physical education in the school environment. This report lays out a set of guiding principles to guide its work on these tasks. These included: recognizing the benefits of instilling life-long physical activity habits in children; the value of using systems thinking in improving physical activity and physical education in the school environment; the recognition of current disparities in opportunities and the need to achieve equity in physical activity and physical education; the importance of considering all types of school environments; the need to take into consideration the diversity of students as recommendations are developed. This report will be of interest to local and national policymakers, school officials, teachers, and the education community, researchers, professional organizations, and parents interested in physical activity, physical education, and health for school-aged children and adolescents.

Focus: Music of Northeast Brazil examines the historical and contemporary manifestations of the music of Brazil, a country with a musical landscape that is layered with complexity and diversity. Based on the author's field research during the past twenty years, the book describes and analyzes the social/historical contexts and contemporary musical practices of Afro-Brazilian religion, selected Carnival traditions, Bahia's black cultural renaissance, the traditions of rural migrants, and currents in new popular music. Part One, Understanding Music in Brazil, presents important issues and topics that encompass all of Brazil, and provides a general survey of Brazil's diverse musical landscape. Part Two, Creating Music in Brazil, presents historical trajectories and contemporary examples of Afro-Brazilian traditions, Carnival music, and northeastern popular music. Part Three, Focusing In, presents two case studies that explore the ground-level activities of contemporary musicians in Northeast Brazil and the ways in which they move between local, national, and international realms. The accompanying CD offers vivid musical examples that are discussed in the text

This monograph analyses and describes successful educational actions with a specific focus on vulnerable groups (i.e. youth, migrants, cultural groups e.g. Roma, women, and people with disabilities). Concrete data that shows success in school performance in subject matters such as math or language will be provided, as well as children, teachers and families accounts of the impact of this success. Alongside, there is an analysis of the relationship between these children's educational performance with their inclusion or exclusion from different areas of society (i.e. housing, health, employment, and social and political participation). Many studies have already diagnosed and described the causes of educational and social exclusion of these

vulnerable groups. This monograph, however, provides solutions, that is, actions for success identified through the INCLUD-ED project, thus providing both, contrasted data and solid theoretical background and development. Some examples of these actions are interactive groups (or heterogeneous grouping in the classroom with reorganisation of human resources), extension of the learning time, homework clubs, tutored libraries, family and community educative participation, family education, or dialogic literary gatherings. All these actions have been defined as successful educational actions, which mean that they lead to both efficiency and equity. Finally, recommendations for policy and practice are included and discussed.
