Following in the footsteps of author Thomas Bulkowski's bestselling Encyclopedia of Chart Patterns—and structured in the same way—this easy-to-read and -use resource takes an in-depth look at 103 candlestick formations, from identification guidelines and statistical analysis of their behavior to detailed trading tactics. Encyclopedia of Candlestick Charts also includes chapters that contain important discoveries and statistical summaries, as well as a glossary of relevant terms and a visual index to make candlestick identification easy.

It's strange to observe that in an age where information is so abundant and easy to access, a very small number of investors understand how to use stock charts. Many believe that the up-and-down level of a share is strongly connected to a company's profitability. Either because of doubt or a lack of understanding, most traders and investors trust their friends, colleagues or pseudo-specialist gurus to help them make good trading and investment choices. This book has been written to help the new traders who trust blindly in those close to them, their colleagues or financial gurus, and want to understand chart patterns before investing in stocks. –Nancy Arsi Stock Market Investing for Beginners  
Technical Analysis for Beginners Part One is easy to understand, and it addresses the people who want to use tools that allow detection of buy-and-sell signals. This book includes more than 100 examples, figures and tables that will help understand investments visually. Several stock market charts show entry points, exit points and even false signals. Learning How to Be an Intelligent Investor The best way to foresee the future is to analyze the past. This book is a guide to avoiding many traps in the financial markets. I will show you how to use the stock market charts and how to enrich them with indicators, which will allow you to enter and exit the market at the right time. “Loads of great information!! There is lot of information contained in this book!!! I plan on this being my bible for the next several weeks.” -BC Hanson Know How to Spot the Market’s Trend Numerous examples show you how to highlight the trend, the support, the resistance and the trend channel, as well as the positive and negative divergences and the candlestick patterns. Identify Breakout and Breakdown on the Financial Markets The term “breakout” is associated with multiple upward figures and marks the debut of a new rising trend. Learn to detect and use breakout to make good selections of stocks. Identify Bullish and Bearish Patterns Some patterns allow anticipating a configuration or a trend reversal. The examples are improved with comments and symbols that facilitate comprehension. “Beginners will benefit the

most of this book.” -J. Olea Know How to Use the  
Different Types of Indicators There are a great number of  
technical indicators. New ones are created each year.  
However, you should limit their use and make a choice  
among the four families of indicators that follow: Trend  
indicators Momentum indicators Volatility  
indicators Volume indicators Trading in the Zone and  
Avoid Traps Technical analysis cannot guarantee 100  
percent success. The traps can be detected on a graph,  
but they can also come from the ones that make  
purchase recommendations to you, such as people that  
provide pump-and-dump scenarios or stock promoters  
from the web. Graphic analysis of the shares is essential  
before any investment. Trading Psychology It’s difficult  
to leave your emotions aside when your portfolio has lost  
10 percent in just one day. Don’t put yourself in  
vulnerable situations. Keep your emotions balanced by  
investing at the appropriate moment.

The aim of this book is to explain point-and-figure  
charting to European investors and traders, and to show  
why it is the most reliable technical tool for timing entry  
and exit points in stocks, indices and other securities.  
The book is written for all levels of trader, from the  
novice to the experienced. It starts by explaining the  
basics of point-and-figure, and by showing its  
advantages over other types of chart. Readers are then  
given step-by-step instructions on how to start a point-  
and-figure chart from simple price data, and how to add  
to it day-by-day using simple rules based on end of day  
highs and lows. The emphasis is on simplicity and clarity.  
The section on chart interpretation introduces the basic

buy and sell signals, and goes on to explain the more complex signals, in each case illustrating the pattern, and the precise entry and exit points, with colour charts from FTSE stocks and indices. It also shows how trend lines are incorporated into a chart. The latest point-and-figure trading techniques are covered in depth. The authors show how to: use horizontal and vertical counts to estimate the size of price moves, use stop-orders to protect positions, use pyramiding to maximise profitable trends, and use swing trading in combination with p&f. They also show how to adapt your trading style to the amount of capital you have available and to your risk tolerance. In the later sections of the book, the authors concentrate on optimisation of p&f trading and the avoidance of the most common trap - 'over-fitting' - and on analysis of the profitability of p&f trading. They demonstrate conclusively that point and figure, correctly applied, produces consistent and reliable profits across a variety of markets. In summary, Heinrich Weber & Kermit Zieg's book is the definitive guide to the theory and application of point-and-figure charting. It is especially welcome for UK and European traders, since it uses recent charts of FTSE and European securities as examples, and includes hitherto unpublished research on p&f's applicability to European securities.

An in-depth look at the trading system that anyone can use The Logical Trader presents a highly effective, yet simple trading methodology that any trader anywhere can use to trade almost anything. The "ACD Method" developed and refined by Mark Fisher after many years of successful trading, provides price points at which to

buy and sell as determined by the opening range of virtually any stock or commodity. This comprehensive guide details a widely used system that is profitably implemented by many computer and floor traders at major New York exchanges. The author's highly accessible teaching style provides readers of *The Logical Trader* with a full examination of the theory behind the ACD Method and the examples and real-world trading stories involving it. Mark B. Fisher (New York, NY), an independent trader, is founder of MBF Clearing Corp., the largest clearing firm on the NYMEX. Founded in 1988, MBF Clearing has grown from handling under one percent of the volume on the NYMEX to nearly twenty percent of the trades today. A 1982 summa cum laude graduate from the Wharton School of Business, University of Pennsylvania, Fisher also received his master's degree in finance and accounting from Wharton. New technology and the advent of around the clock trading have opened the floodgates to both foreign and domestic markets. Traders need the wisdom of industry veterans and the vision of innovators in today's volatile financial marketplace. The Wiley Trading series features books by traders who have survived the market's ever changing temperament and have prospered—some by reinventing systems, others by getting back to basics. Whether a novice trader, professional or somewhere in-between, these books will provide the advice and strategies needed to prosper today and well into the future. understand price and market movements that can only be learned from Technical Analysis. You should NEVER attempt Trading or Investing without it! My 25 years experience has taught me that 'Every book on the market' regarding Charting and Technical Analysis are seemingly worthless! All seem to find yet another creative way to tell you to "Buy Low and Sell High!" And they offer NO in-depth understanding or analysis about WHO is buying and WHO is selling, and when. Point is, anyone, experienced or not, can show you a picture of a Chart and tell you to buy at the bottom and sell at the top. That is simple 'hindsight', and is always 20/20! This book is different! It is IN-DEPTH – EXPLAINED and you WILL learn price movements and technical analysis from this information! You will understand and recognize tops and bottoms in the market and in particular stocks, AS they are forming. This is highly valuable information, and you should NEVER attempt to trade or invest without this knowledge! Mutual Funds? Most people think they do not need this information because they have a Mutual Fund. That could not be farther from the truth. Investing your hard-earned money should be done with your own knowledge of market direction, when to buy, and when to move your money to safety. Without this knowledge you are at the mercy of a salesperson hungry to earn a commission. Thus, invariably entering the market at the wrong time and in the wrong investment. No one else has your best interest in mind, either learn to protect your money or keep it in the bank. It's that simple. The next move is yours.

Comprehensive coverage of the four major trading styles Evolution of a Trader explores the four trading styles that people use when learning to trade or invest in the stock market. Often, beginners enter the stock market by: Buying and holding onto a stock (value investing). That works well until the trend ends or a bear market begins. Then they try Position trading. This is the same as buy-and-hold, except the technique sells positions before a significant trend change occurs. Swing trading follows when traders increase their frequency of trading, trying to catch the short-term up and down swings. Finally, people try Day trading by completing their trades in a single day. This series provides comprehensive coverage of the four trading styles by offering numerous tips, sharing discoveries, and discussing specific trading setups to help you become a successful trader or investor as you journey through each style. Trading Basics takes an in-depth look at money management, stops, support and resistance, and offers dozens of tips every trader should know. Fundamental Analysis and Position Trading discusses when to sell a buy-and-hold position, uncovers which fundamentals work best, and uses them to find stocks that become 10-baggers—stocks that climb by 10

arsenal. REVIEWS FOR THE BOOK "Educative addition to the technical trader's shelf." — The Hindu Business Line "Clearly explains and reinforces the message of each candlestick pattern, pointing out other details that can help determine success or failure at each occurrence. The real life examples are manifold, well chosen and amplify the lessons being taught. Highly recommended reading for traders in all markets to discover ways of profiting from candlestick trading." — Alan Northcott "Sadekar's book not only manages to live upto the expectations but probably excels them. Sadekar attempts to keep things simple, and targets the beginner to intermediate level technician as his target audience. Each type of reversal, consolidation and continuation pattern is tackled in individual chapters and illustrated liberally with charts of Indian stocks. The author leaves ample strategies for the not so active trader, also combining Dow theory tools like trend lines, oscillators and moving averages with the oriental techniques. This gives the reader an immediate advantage of getting the best of both the worlds. While all chapters are interesting read, chapters 11 & 12 are the highlights of the book as they lay out a simple but actionable game plan for a trader and investor. As if the overall package was not sweet enough, Sadekar has compiled a tear-away candlestick ready-reckoner at the end of the book to identify emerging patterns in real time. At its price, the book is a value buy. All in all, a must read book for every freshman candle sticks trader." — Vijay L. Bhambwani, Technical Analyst, CEO - BSPLIndia.com

A lot has been said when it comes to trading. A lot has also been taught concerning the same. The science of trading has been the central point of discussion for successful trading. Even so, the insight I have gotten in my many years of analysis & trading has shown me that there is more to trading than just science. Other than science, trading is also an art that depends on your psychological state of mind.

strategies The Art and Science of Technical Analysis is a groundbreaking work that bridges the gaps between the academic view of markets, technical analysis, and profitable trading. The book explores why randomness prevails in markets most, but not all, of the time and how technical analysis can be used to capture statistically validated patterns in certain types of market conditions. The belief of the book is that buying and selling pressure causes patterns in prices, but that these technical patterns are only effective in the presence of true buying/selling imbalance. The Art and Science of Technical Analysis is supported by extensive statistical analysis of the markets, which will debunk some tools and patterns such as Fibonacci analysis, and endorse other tools and trade setups. In addition, this reliable resource discusses trader psychology and trader learning curves based on the author's extensive experience as a trader and trainer of traders. Offers serious traders a way to think about market problems, understand their own performance, and help find a more productive path forward Includes extensive research to validate specific money-making patterns and strategies Written by an experienced market practitioner who has trained and worked with many top traders Filled with in-depth insights and practical advice, The Art and Science of Technical Analysis will give you a realistic sense of how markets behave, when and

Investors and traders seek methods to identify reversal and continuation to better time their trades. This applies for virtually everyone, whether employing a swing trading strategy, engaging in options trading, or timing entry and exit to spot bull and bear reversals. Key signals are found in the dozens of candlesticks, combined with technical signals such as gaps and moves outside of the trading range; size of wicks (shadows) and size of real bodies. The science of candlestick analysis has a proven track record not only from its inception in 17th century Japan, but today as well. This book explains and demonstrates candlestick signals, including both the appearance of each but in context on an actual stock chart. It further takes the reader

through the rationale of reversal and continuation signals and demonstrates the crucial importance of confirmation (in the form of other candlesticks, traditional technical signals, volume, momentum and moving averages). Michael C. Thomsett is a market expert, author, speaker and coach. His many books include Mathematics of Options, Real Estate Investor's Pocket Calculator, and A Technical Approach to Trend Analysis. Praise for Trading Price Action Trading Ranges "Al Brooks has written a book every day trader should read. On all levels, he has kept trading simple, straightforward, and approachable. By teaching traders that there are no rules, just guidelines, he has allowed basic common sense to once again rule how real traders should approach the market. This is a must-read for any trader that wants to learn his own path to success." —Noble DraKolin, founder, SpeculatorAcademy.com, and author of Trade Like a Pro and Winning the Trading Game "A great trader once told me that success was a function of focused energy. This mantra is proven by Al Brooks, who left a thriving ophthalmology practice to become a day trader. Al's intense focus on daily price action has made him a successful trader. A born educator, Al also is generous with his time, providing detailed

explanations on how he views daily price action and how other traders can implement his ideas with similar focus and dedication. Al's book is no quick read, but an in-depth roadmap on how he trades today's volatile markets, complete with detailed strategies, real-life examples, and hard-knocks advice." —Ginger Szala, Publisher and Editorial Director, Futures magazine

Over the course of his career, author Al Brooks, a technical analysis contributor to Futures magazine and an independent trader for twenty-five years, has found a way to capture consistent profits regardless of market direction or economic climate. And now, with his new three-book series—which focuses on how to use price action to trade the markets—Brooks takes you step by step through the entire process. In order to put his methodology in perspective, Brooks examined an essential array of price action basics and trends in the first book of this series, *Trading Price Action TRENDS*. Now, in this second book, *Trading Price Action TRADING RANGES*, he provides important insights on trading ranges, breakouts, order management, and the mathematics of trading. Page by page, Brooks skillfully addresses how to spot and profit from trading ranges—which most markets are in, most of the time—using the technical analysis of price action. Along the way, he touches on some of the most important aspects of this approach, including trading breakouts,

understanding support and resistance, and making the most informed entry and exit decisions possible. Throughout the book, Brooks focuses primarily on 5 minute candle charts—all of which are created with TradeStation—to illustrate basic principles, but also discusses daily and weekly charts. And since he trades more than just E-mini S&P 500 futures, Brooks also details how price action can be used as the basis for trading stocks, forex, Treasury Note futures, and options.

Profitable Trading with Renko Charts One of the oldest and most popular Japanese charting methods, Renko can be used to profitably trade all types of financial markets and instruments — and over any time frame. Renko charts offer traders many unique and unmatched advantages over other charting methods:

- Renko charts are simple to use
- Trends are easier to identify in Renko charts since the price is always either clearly bullish or bearish
- Due to their uncluttered appearance, significant tradeable patterns are much easier to spot in Renko charts
- Being objective in nature, entry and exit signals are clearly defined in Renko charts, making it easier to trade profitably
- By eliminating insignificant price action, Renko charts help traders control overtrading — one of the biggest sources of trading losses. This comprehensive book provides step-by-step guidance, from the basics of Renko charts to advanced methods of analysis and trading, keeping in mind Indian market characteristics:
- What a Renko chart is — and how to plot it
- How to use the traditional tools of technical analysis on Renko charts
- Thorough description and analysis of

charts and derivative markets Candlestick charts are an effective way of visualizing price movements and, due to the increased interest in the complex derivatives market, they are being used more and more widely. A combination of a line-chart and a bar-chart, where each bar represents the range of price movement over a given time interval, candlestick charts are most often used in technical analysis of equity and currency price patterns. A guide to the most used charts, *The Bloomberg Visual Guide to Candlestick Charting* is arranged in an easy-to-use manner, providing a quick reference for those new to the field. Candlestick charts are formed with the help of the opening, high, low, and closing price of the day?if the opening price is above the closing price then a filled candlestick is drawn, and these charts are visual aids for decision making in forex, stock, commodities, and options trading. coverage of tested sentiment, momentum indicators, seasonal affects, flow of funds, testing systems, risk mitigation strategies, and many other topics. This edition thoroughly covers the latest advances in pattern recognition, market analysis, and systems management. The authors introduce new confidence tests; cover increasingly popular methods such as Kagi, Renko, Kase, Ichimoku, Clouds, and DeMark indicators; present innovations in exit stops, portfolio selection, and testing; and discuss the implications of behavioral bias for technical analysis. They also reassess old formulas and methods, such as intermarket relationships, identifying pitfalls that emerged during the recent market decline. For traders, researchers, and serious investors alike, this is the definitive book on technical analysis.

effective approach to trading today's markets—whether you're involved in stocks, futures, or options. It allows you to focus on the process of trading without being overwhelmed by a complicated collection of trading techniques. And while this method may appear elementary, it can significantly enhance returns as well as minimize downside risk. One way to apply price action analysis to your trading endeavors is with chart patterns. Nobody understands this better than author Al Brooks, a technical analyst for *Futures* magazine and an independent trader for more than twenty years. Brooks discovered ten years ago that reading price charts without indicators proved to be the most simple, reliable, and profitable way for him to trade. Mastering that discipline is what made him consistently successful in trading. Now, with *Reading Price Charts Bar by Bar*, Brooks shares his extensive experience on how to read price action. At the end of the day, anyone can look at a chart, whether it is a candle chart for E-mini S&P 500 futures trading or a bar chart for stock trading, and see very clear entry and exit points. But doing this in real time is much more difficult. *Reading Price Charts Bar by Bar* will help you become proficient in the practice of reading price action—through the use of trendlines and trend channel lines, prior highs and lows, breakouts and failed breakouts, and other tools—and show you how this approach can improve the overall risk-reward ratio of your trades. Written with the serious trader in mind, this reliable resource addresses the essential elements of this discipline, including the importance of understanding every bar on a price chart, why particular patterns are

reliable setups for trades, and how to locate entry and exit points as markets are trading in real time. Brooks focuses on five-minute candle charts to illustrate basic principles, but discusses daily and weekly charts as well. Along the way, he also explores intraday swing trades on several stocks and details option purchases based on daily charts—revealing how using price action alone can be the basis for this type of trading. There's no easy way to trade, but if you learn to read price charts, find reliable patterns, and get a feel for the market and time frame that suits your situation, you can make money. While price action trading doesn't require sophisticated software or an abundance of indicators, this straightforward approach can still put you in a better position to profit in almost any market. Reading Price Charts Bar by Bar will show you how.
