

## Brew Your Own British Real Ale

A home brew revolution is underway. No longer the preserve of 70s throwbacks, a new wave of booze-makers are brewing, fermenting and infusing in their home kitchens, making an exciting array of alcoholic drinks. Brew it Yourself is a collection of more than 75 homegrown brewing recipes, sure to put a fizz back into this popular pastime by adding a modern twist to some old favourites and introducing whole new range of drinks to tantalise the taste buds. Combining two of their passions alcohol and gardening authors Richard Hood and Nick Moyle (the Two Thirsty Gardeners) take special care to explain the importance of the ingredients in each of their recipes whether grown in the garden, foraged in the wild or bought from their local supermarket. With drinks ranging from a classic elderflower sparkle to homemade absinthe, Richard and Nick bring the art of brewing back to earth. They'll tell you how to turn surplus fruit harvests into amazing wines and liqueurs; introduce you to the ancient arts of mead and cider making; guide you through some easy beer recipes, from hop packed IPAs to a striking Viking ale; use surprising ingredients such as lavender and nettles for some fun sparkling drinks; and take you on a world booze cruise that includes a Mexican pineapple tepache, Scandinavian mulled glogg and Finnish lemon sima. Brew it Yourself also debunks myths, celebrates experimentation and takes the fear out of the science of fermentation. It proves that creating your own tasty alcoholic drinks doesn't need to be complicated, doesn't need to be costly and, most importantly, can be a whole lot of fun.

Ever wondered whether you could make a beer just like your favourite brew from the bar? With this book the answer is – "Yes, you can!" . . . and in just under two weeks, from start to first sip! Brewing your own beer at home means not only that you get to brew to your own taste, strength and colour desires, but you can also explore and create to an almost infinite level. Brewing your own beer will be fun and it will save you money. Many people think that home brewing is complicated and messy – but this book shows you that neither need be the case. Expert authors Mark Murphy and Jordan St. John, aided by consultants Jon Downing (who has helped set up over 100 brewpub startups) and Graham Lees (co-founder of the British real-ale campaigning organisations, CAMRA), take the reader through every stage of the brewing process, starting with which hop (or hops) to use, and concluding with instructions for bottling your finished project. How to Brew Your Own Beer is both a detailed description of different types of beer and a fail-safe home brewer's recipe book. With step-by-step instructions and some 200 supporting colour illustrations, the book is perfect for beer lovers of all levels – novices and home brewers who want to try a new style.

Trial. Error. Better Beer. When most brewers think of an experimental beer, odd creations come to mind. And sure, in this book you can learn how to brew with ingredients like bacon, chanterelle mushrooms, defatted cacao nibs, and peanut butter powder. However, experimental homebrewing is more than that. It's about making good beer--the best beer, in fact. It's about tweaking process, designing solid recipes, and blind evaluations. So put on your goggles, step inside the lab, and learn from two of the craziest scientists around: Drew Beechum and Denny Conn. Get your hands dirty and tackle a money-saving project or try your hand at an off-the-wall technique. Freeze yourself an Eisbeer, make a batch of canned starter wort, fake a cask ale, extract

flavors with distillation, or sit down at the microscope and do some yeast cell counting. More than 30 recipes and a full chapter of open-ended experiments will complete your transformation. Before you realize it, you'll be donning a white lab coat and sharing your own delicious results!

Encompassing brewery locations throughout the UK, this is a guide to all the commercially produced real ales from small rural breweries to city-based concerns. Brews as quirky as Skullsplitter from Orkney, Blunderbuss from Warrington, Devil's Water from Hexham and Monkey Wrench from Harrogate line up alongside giants such as Burton Festival Ale, Marston's Bitter and Boddingtons. Ingredients are given where available, along with details of reception facilities at each brewery and tasting notes to help the beginner understand the nuances and flavours of the various ales.

DIVTaste the history: brew your own vintage beers, from porters to ales to table beer./div

Packed with recipes, expert advice, step-by-step photos, and more, this official guide from Brew Your Own is a necessity for anyone who's into homebrew. For more than two decades, America's homebrewers have turned to Brew Your Own magazine for the best information on making incredible beer at home. From well-tested recipes to expert advice, Brew Your Own sets the standard for quality. Now, for the first time, the magazine's best homebrew guides, recipes, troubleshooting, and tips are brought together in one book. The Brew Your Own Big Book of Homebrewing is the ultimate all-in-one homebrew book. It's a first-time homebrewer's best friend, explaining the entire brewing process from start to finish with step-by-step photography. Yet it has plenty for the experienced homebrewer as well, including: - Fully-illustrated guides for making the jump to all-grain brewing and for setting up your first keggling system - More than 50 sought-after recipes to craft your favorite breweries' beers - A deep dive on brewing ingredients - The most useful troubleshooting features and tips from the pros from two decades of the magazine Whether you're looking to get into brewing, up your game, or find inspiration for your next brew day, this book has what you need.

"A fresh, appealing guide to brewing hard cider that makes everything from sourcing fruits and juices to bottling the finished cider accessible and fun, with recipes for basic ciders, traditional ciders from around the world, cider cousins like Perry, and innovative recipes that take ciders to the next level with beer-brewing techniques and alternative fruits"--

Fully revised and expanded, How to Brew is the definitive guide to making quality beers at home. Whether you want simple, sure-fire instructions for making your first beer, or you're a seasoned homebrewer working with all-grain batches, this book has something for you. Palmer adeptly covers the full range of brewing possibilities—accurately, clearly and simply. From ingredients and methods to recipes and equipment, this book is loaded with valuable information for any stage brewer.

Winner of 2014 U.S. Gourmand Drinks Award • Taste 5,000 years of brewing history as a time-traveling homebrewer rediscovers and re-creates the great beers of the past. The Brewer's Tale is a beer-filled journey into the past: the story of brewers gone by and one brave writer's quest to bring them—and their ancient, forgotten beers—back to life, one taste at a time. This is the story of the

world according to beer, a toast to flavors born of necessity and place—in Belgian monasteries, rundown farmhouses, and the basement nanobrewery next door. So pull up a barstool and raise a glass to 5,000 years of fermented magic. Fueled by date-and-honey gruel, sour pediococcus-laced lambics, and all manner of beers between, William Bostwick's rollicking quest for the drink's origins takes him into the redwood forests of Sonoma County, to bullet-riddled South Boston brewpubs, and across the Atlantic, from Mesopotamian sands to medieval monasteries to British brewing factories. Bostwick compares notes with the Mt. Vernon historian in charge of preserving George Washington's molasses-based home brew, and he finds the ancestor of today's macrobrewed lagers in a nineteenth-century spy's hollowed-out walking stick. Wrapped around this modern reportage are deeply informed tales of history's archetypal brewers: Babylonian temple workers, Nordic shamans, patriots, rebels, and monks. The Brewer's Tale unfurls from the ancient goddess Ninkasi, ruler of intoxication, to the cryptic beer hymns of the Rig Veda and down into the clove-scented treasure holds of India-bound sailing ships. With each discovery comes Bostwick's own turn at the brew pot, an exercise that honors the audacity and experimentation of the craft. A sticky English porter, a pricelessly rare Belgian, and a sacred, shamanic wormwood-tinged gruit each offer humble communion with the brewers of yore. From sickly sweet Nordic grogs to industrially fine-tuned fizzy lager, Bostwick's journey into brewing history ultimately arrives at the head of the modern craft beer movement and gazes eagerly if a bit blurry-eyed toward the future of beer.

Radical Brewing takes a hip and creative look at beer brewing, presented with a graphically appealing two-color layout.

What do you get when you cross a journalist and a banker? A brewery, of course. "A great city should have great beer. New York finally has, thanks to Brooklyn. Steve Hindy and Tom Potter provided it. Beer School explains how they did it: their mistakes as well as their triumphs. Steve writes with a journalist's skepticism—as though he has forgotten that he is reporting on himself. Tom is even less forgiving—he's a banker, after all. The inside story reads at times like a cautionary tale, but it is an account of a great and welcome achievement." —Michael Jackson, *The Beer Hunter*(r) "An accessible and insightful case study with terrific insight for aspiring entrepreneurs. And if that's not enough, it is all about beer!" —Professor Murray Low, Executive Director, Lang Center for Entrepreneurship, Columbia Business School "Great lessons on what every first-time entrepreneur will experience. Being down the block from the Brooklyn Brewery, I had firsthand witness to their positive impact on our community. I give Steve and Tom's book an A++!" —Norm Brodsky, Senior Contributing Editor, Inc. magazine "Beer School is a useful and entertaining book. In essence, this is the story of starting a beer business from scratch in New York City. The product is one readers can relate to, and the market is as tough as they get. What a fun challenge! The book can help not only those entrepreneurs who are starting a business but also those trying to

grow one once it is established. Steve and Tom write with enthusiasm and insight about building their business. It is clear that they learned a lot along the way. Readers can learn from these lessons too." —Michael Preston, Adjunct Professor, Lang Center for Entrepreneurship, Columbia Business School, and coauthor, *The Road to Success: How to Manage Growth* "Although we (thankfully!) never had to deal with the Mob, being held up at gunpoint, or having our beer and equipment ripped off, we definitely identified with the challenges faced in those early days of cobbling a brewery together. The revealing story Steve and Tom tell about two partners entering a business out of passion, in an industry they knew little about, being seriously undercapitalized, with an overly naive business plan, and their ultimate success, is an inspiring tale." —Ken Grossman, founder, Sierra Nevada Brewing Co.

This book is a must-have for both beginners and experienced brewers looking for great new recipes.

How punter power pulled the humble pint back from the brink, this is the surprising story of a very British consumer revolt! Following a cast of bloody-minded City bankers, hippie microbrewers, style gurus, a Python, and a lot of men in pubs, *Brew Britannia* tells the story of the campaign to revitalise the nation's beer which became the most successful consumer revolt in British history! Fifty years ago the future of British beer looked as bleak as the weak, sweet, bland and fizzy pints being poured, as colossal combines took over the industry, closing local breweries and putting profit before palate. Yet today the number of breweries is at a post-war high, with over a thousand in operation, membership of The Campaign for Real Ale organisation (CAMRA) exploding in recent years with over 150,000 active members and exciting new developments brewing. In a barn in Somerset, plans are afoot to ferment a beer-cider hybrid with wild yeast that blows on the wind, while in Yorkshire an almost extinct style of 'salt 'n' sour' wheat beer is being resurrected for the 21st century. Whether you drink traditional, CAMRA-approved 'real ale' or prefer a super-strong, fruit-infused, barrel-aged Belgian-style 'saison', this astonishing story from the authors of popular beer blog Boak and Bailey will have you thirsty for more! Join award-winning beer writer Mark Dredge on his search for the world's best beer adventures and experiences. This collection of over 150 unmissable beer experiences features the world's greatest beers, bars, breweries and events: it's the ultimate bucket list for every beer lover. Combining travel, city guides, food and history, *The Beer Bucket List* takes you around the globe, via traditional old British pubs, quirky Belgian bars, brilliant Bavarian brauhauses, spots to enjoy delicious food and beer, the hop gardens of New Zealand, Southeast Asia's buzzing streets, amazing beer festivals, unique beer styles, pioneering breweries and the best new craft brewers. This is any beer lover's must-read book about the most essential beer experiences on the planet.

*Yeast: The Practical Guide to Beer Fermentation* is a resource for brewers of all experience levels. The authors adeptly cover yeast selection, storage and handling of yeast cultures, how

to culture yeast and the art of rinsing/washing yeast cultures. Sections on how to set up a yeast lab, the basics of fermentation science and how it affects your beer, plus step by step procedures, equipment lists and a guide to troubleshooting are included.

A brewing veteran and renowned expert on British beers, Terry Foster has written the only in-depth book on brewing this classic style with modern ingredients and equipment. Porter reviews the history of George Washington's favorite beer and teaches you how to create this rich, full-bodied ale for your own enjoyment. The Classic Beer Style Series from Brewers Publications examines individual world-class beer styles, covering origins, history, sensory profiles, brewing techniques and commercial examples.

This is a book for any really enthusiastic and ambitious home brewer - the person who wants to brew high quality, 'true' beers using real hops and grains, rather than by using more easily-handled kits and powdered or liquid malt extracts.

Everything needed to brew beer right the first time. Presented in a light-hearted style without frivolous interruptions, this authoritative text introduces brewing in a easy step-by-step review. Making good beer at home is easy, and oh so cheap. Brew takes the novice beer-enthusiast by the hand and talks you through every last step of the process. The craft beer revolution is upon us. All over the world we're enjoying bottles of American craft, old Belgian, real British ale and exquisite German lager, and you can make it all for yourself. You don't need to go out and buy loads of kit. With a plastic bucket or two, you can make beer as good as any beer in the entire world and customise it to your own tastes. With beautiful step-by-step photographs and comprehensive sections on how and what you need to get started, bottling and storing, a glossary of key ingredient types, troubleshooting tips and proven beer recipes that result in complex flavours, every taste and skill level is catered for. Brew isn't like other brewing books. It is for those who have never brewed and want to understand more, for those who have a basic grasp and a few beers under their belt, and it is for those with experience who want inspiration to continue to grow.

For more than two decades, homebrewers around the world have turned to Brew Your Own magazine for the best information on making incredible beer at home. Now, for the first time, 300 of BYO's best clone recipes for recreating favorite commercial beers are coming together in one book. Inside you'll find dozens of IPAs, stouts, and lagers, easily searchable by style. The collection includes both classics and newer recipes from top award-winning American craft breweries including Brooklyn Brewery, Deschutes, Firestone Walker, Hill Farmstead, Jolly Pumpkin, Modern Times, Maine Beer Company, Stone Brewing Co., Surly, Three Floyds, Tröegs, and many more. Classic clone recipes from across Europe are also included. Whether you're looking to brew an exact replica of one of your favorites or get some inspiration from the greats, this book is your new brewday planner.

How to brew, ferment and enjoy world-class beers at home. Making beer at home is as easy as making soup! George Hummel smoothly guides the reader through the process of creating a base to which the homebrewer can apply a myriad of intriguing flavorings, such as fruits, spices and even smoke. There are also outstanding and easy recipes for delicious meads, tasty ciders and great sodas -- all of which can be made in a home kitchen and with minimal equipment. Using Hummel's easy-to-follow instructions and thorough analysis of the flavor components of beer, a novice homebrewer can design recipes and make beers to suit any taste or craving. Knowing exactly what's in a beer has additional benefits -- homebrewers can easily avoid the chemical additives traditionally found in mass-produced commercial beers. As an added bonus, the recipes are categorized according to their degree of difficulty, so new brewers can find the recipes that match their comfort level and then easily progress onto new skills. These 200 tantalizing beer recipes draw their inspiration from the Americas and around the world. They include: Irish amber American/Texas brown California blonde Bavarian hefeweizen Multi-grain stout Imperial pilsner Pre-Prohibition lager Golden ale Scottish 60

shilling Belgium dubble German bock Raspberry weizen Vanilla cream stout Flemish red & brown Standard dry sparkling mead There is also a comprehensive glossary that virtually guarantees readers will find answers to every question about ingredients and equipment. Packed with practical advice and effectively designed, The Complete Homebrew Beer Book is like having a personal brewmaster overseeing and guiding each creation.

Britain's best-selling and fully independent beer & pub guide is back with updated listings for 2012.

Frustrated by a dead end job, fed up with renting in London and the loathsome daily commute and, to cap it all, failing to make it as a stand-up comedian, Tommy Barnes was at breaking point. But he didn't break - instead he made himself redundant and took off to France with girlfriend Rose to pursue his dream of brewing beer

Amber, Gold and Black is the most comprehensive history of British beer in all its variety ever written. Learn all there is to know about the history of the beers Britons have brewed and enjoyed down the centuries: Bitter, Porter, Mild and Stout, IPA, Brown Ale, Burton Ale and Old Ale, Barley Wine and Stingo, Golden Ale, Gale Ale, Honey Ale, White Beer, Heather Ale and Mum. This is a celebration of the depth of our beery heritage, a look at the roots of the styles we enjoy today, as well as those ales and beers we have lost, and a study of how the liquids that fill our beer glasses, amber, gold and black, developed over the years. Whatever your knowledge of beer, from beginner to buff, Amber, Gold and Black will tell you things you never knew before about Britain's favourite drink. Experimentation, mystery, resourcefulness, and above all, fun--these are the hallmarks of brewing beer like a Yeti. Since the craft beer and homebrewing boom of the late twentieth and early twenty-first centuries, beer lovers have enjoyed drinking and brewing a vast array of beer styles. However, most are brewed to accentuate a single ingredient--hops--and few contain the myriad herbs and spices that were standard in beer and gruit recipes from medieval times back to ancient people's discovery that grain could be malted and fermented into beer. Like his first book, *Make Mead Like a Viking*, Jereme Zimmerman's *Brew Beer Like a Yeti* returns to ancient practices and ingredients and brings storytelling, mysticism, and folklore back to the brewing process, including a broad range of ales, gruits, bragots, and other styles that have undeservingly taken a backseat to the IPA. Recipes inspired by traditions around the globe include sahti, gotlandsdricka, oak bark and mushroom ale, wassail, pawpaw wheat, chicha de muko, and even Neolithic "stone" beers. More importantly, under the guidance of "the world's only peace-loving, green-living Appalachian Yeti Viking," readers will learn about the many ways to go beyond the pale ale, utilizing alternatives to standard grains, hops, and commercial yeasts to defy the strictures of style and design their own brews.

All of the authoritative advice and instructions of the previous edition in a new hard-wearing, lavishly illustrated format to better show methods and equipment Written by a home-brewing authority, this guide includes detailed instructions for

both novice and more advanced home brewers, as well as comprehensive recipes for recreating some of Britain's best-loved beers at home. Recipes are grouped by beer style, allowing home brewers to recreate popular and classic milds, pale ales, bitters, stouts, porters, old ales, and barley wines. Full instructions are included for both malt extract and full-grain brewing while section on brewing methods and equipment helps readers to choose the right brewing method for them and the right equipment to brew successfully. Includes dual measurements.

Complete instructions to brew 107 beers from around the world. With expert info provided by the breweries themselves. Illus.

This is not a recipe book. It is a database of ingredient information that should assist the home or craft brewer in creating their own recipes in order to attempt the replication of commercial beers. Instructions on how to convert the supplied ingredient information into recipes customised to the brewer's own equipment and technique are provided. This book also provides inspiration to brewers wishing to experiment with different ingredients since it gives an interesting insight into how professional brewers have used them in their own brews. Finally, this book should also be of interest to the discerning beer enthusiast who is curious about what goes into their favourite drink. This second edition provides substantially more data than the well-received first edition.

Written by a home-brewing authority, this guide "includes detailed instructions for both novice and more advanced home-brewers, as well as comprehensive recipes for recreating some of Britain's best-loved beers at home. Recipes are grouped by beer style, allowing home brewers to recreate popular and classic milds, pale ales, bitters, stouts, porters, old ales, and barley wines. Full instructions are included for both malt extract and full-grain brewing while a full-color section on brewing methods and equipment helps readers to choose the right brewing method for them and the right equipment to brew successfully.

It is difficult to believe that at one time hops were very much the marginalized ingredient of modern beer, until the burgeoning craft beer movement in America reignited the industry's enthusiasm for hop-forward beer. The history of hops and their use in beer is long and shrouded in mystery to this day, but Stan Hieronymous has gamely teased apart the many threads as best anyone can, lending credence where due and scotching unfounded claims when appropriate. It is just one example of the deep research through history books, research articles, and first-hand interviews with present-day experts and growers that has enabled Stan to produce a wide-ranging, engaging account of this essential beer ingredient. While they have an exalted status with today's craft brewers, many may not be aware of the journey hops take to bring them, neatly baled or pressed into blocks and pellets, into the brewhouse. Stan paints a detailed and, at times, personal portrait of the life of hops, weaving technical information about hop growing and anatomy with insights from families who have been running their hop farms for generations. The author takes the reader on a tour of the main growing regions of central Europe, where the famous landrace varieties of Slovenia, the Czech Republic, and Germany originate, to England and thence to North America, and latterly, Australia and New Zealand. Growing hops and supplying the global brewing industry has always been a hard-nosed business, and Stan presents statistics on yields, acreage, wilt and other diseases, interspersed with words from the farmers themselves that illustrate the challenges and uncertainties hop growers face. Along the way, Stan gives details about some of the most well-known varieties—Saaz, Hallertau, Tettnang, Golding, Fuggle, Cluster, Cascade, Willamette,

Citra, Amarillo, Nelson Sauvin, and many others—and their history of use in the Old World and New World. The section culminates in a catalog of 105 hop varieties in use today, with a brief description of character and vital statistics for each. Of course, the art and science of using hops in making beer is not forgotten. Once the hops have been harvested, processed, and delivered to the brewery, they can be used in myriad ways. The author moves from the toil of the hop gardens to that of the brewhouse, again presenting a blend of history and present-day interviews and research articles to explain alpha acids, beta acids, bitterness, harshness, smoothness, and the deterioration of bittering flavors over time. Perception is all important when discussing bitterness, and the author touches on genetics, evolution, the vagaries of individuals' perceptions of bitterness, and changing tastes, such as the “lupulin shift.” The meaning of the international bitterness unit, or IBU, is not always properly understood and here Stan lays out a brief history of how the IBU came to be and an appreciation of the many variables affecting utilization in the boil and final bitterness in beer. Adding hops is not as simple as it sounds, and Stan's research illustrates that if you ask ten brewers about something you will get eleven opinions. Early additions, late additions, continuous hopping, first wort hopping, and hop bursting are all discussed with a healthy dose of pragmatic wisdom from brewers and a pinch of chemistry. There then follows an entire chapter devoted to the druidic art of dry hopping, following its commonplace usage in nineteenth-century England to the modern applications found in today's US craft brewing scene. The author uncovers hop plugs, hop coffins, and the “pendulum method,” along with the famous hop rocket and hop torpedo used by some of America's leading craft breweries. Every brewer has their dry hopping method and, gratifyingly, many are happy to share with the author, making this chapter a great source for inspiration and ideas. Many of the brewers the author interviewed were also happy to share recipes. There are 16 recipes from breweries in America, Belgium, Czech Republic, Denmark, England, Germany, and New Zealand. These not only present delicious beers but give some insight into how professional brewers design their recipes to get the most out of their hops. As always, Stan imparts wisdom in an engaging and accessible fashion, making this an amazing compendium on “every brewer's favorite flower.”

Author Ray Daniels provides the brewing formulas, tables, and information to take your brewing to the next level in this detailed technical manual.

More than 100 homebrew recipes for all of the well-known Real Ales from Great Britain.  
Brew Your Own British Real Ale Recipes for More Than 100 Brand-name Real Ales  
Storey Publishing

From Scratch: Brew includes recipes and top tips on everything you need to know to make your own beer from scratch. Making good beer at home is easy, and oh so cheap. From Scratch: Brew takes the novice beer-enthusiast by the hand and talks you through every last step of the process. The craft beer revolution is upon us. All over the world we're enjoying bottles of American craft, old Belgian, real British ale and exquisite German lager, and you can make it all for yourself. You don't need to go out and buy loads of kit. With a plastic bucket or two, you can make beer as good as any beer in the entire world and customise it to your own tastes. Extracting from and updating his book Brew, James Morton offers comprehensive sections on how and what you need to get started, bottling and storing, a glossary of key ingredient types, troubleshooting tips and proven beer recipes that result in complex flavours; every taste and skill level is catered for. From Scratch: Brew isn't like other brewing books. It is for those who have never brewed and want to understand more, for those who have a basic grasp and a few beers under their belt, and it is for those with experience who want inspiration to continue to grow. Text is extracted and updated from Brew: The Foolproof Guide to Making World-Class Beer at Home by James Morton.

No longer are mild ales confined to the small towns of England. Once a designation for an entire class of beers, mild ale now refers to a beer style some describe as the “elixir of life for

the salt of the earth.” Mild is a beer that can be at once light or dark, very low or very high in alcohol, and either rich in dark malt flavor or light and crisp with a touch of hop flavor and aroma. The recipes included offer a wide range of interpretations for a style that has unparalleled flexibility. The Classic Beer Style Series from Brewers Publications examines individual world-class beer styles, covering origins, history, sensory profiles, brewing techniques and commercial examples.
