In the past 30 years, the population of prisoners in the United States has expanded almost 5-fold, correctional facilities are increasingly overcrowded, and more of the country's disadvantaged populations—racial minorities, women, people with mental illness, and people with communicable diseases such as HIV/AIDS, hepatitis C, and tuberculosis—are under correctional supervision. Because prisoners face restrictions on liberty and autonomy, have limited privacy, and often receive inadequate health care, they require specific protections when involved in research, particularly in today's correctional settings. Given these issues, the Department of Health and Human Services' Office for Human Research Protections commissioned the Institute of Medicine to review the ethical considerations regarding research involving prisoners. The resulting analysis contained in this book, *Ethical Considerations for Research Involving Prisoners*, emphasizes five broad actions to provide prisoners involved in research with critically important protections: • expand the definition of "prisoner"; • ensure universally and consistently applied standards of protection; • shift from a category-based to a risk-benefit approach to research review; • update the ethical framework to include collaborative responsibility; and • enhance systematic oversight of research involving prisoners.

world has high hopes for this emerging economy, many hurdles lie ahead. Its laws, infrastructure, financial institutions, and rules of commerce continue to be a work in progress. This book provides numerous examples of companies that have not only overcome various challenges, but also thrived in the rapidly evolving environment that is Myanmar today. It covers the hopes and dreams of Burmese founders, who are leading organisations that are operating there. By telling the stories of their unique perspectives and experiences, we hope to inspire and guide those who follow, helping them envision and trailblaze their own paths forward in the emerging economy.

An accessible guide for activists, educators, and all who are interested in understanding how the prison system oppresses communities and harms individuals. The United States incarcerates more of its residents than any other nation. Though home to 5% of the global population, the United States has nearly 25% of the world's prisoners—a total of over 2 million people. This number continues to steadily rise. Over the past 40 years, the number of people behind bars in the United States has increased by 500%.

Journalist Victoria Law explains how racism and social control were the catalysts for mass incarceration and have continued to be its driving force: from the post-Civil War laws that states passed to imprison former slaves, to the laws passed under the “War Against Drugs” campaign that disproportionately imprison Black people. She breaks down these complicated issues into four main parts: 1. The rise and cause of mass incarceration 2. Myths about prison 3. Misconceptions about incarcerated people 4.

In October 2016, the National Academies of Sciences, Engineering, and Medicine's Roundtable on Population Health Improvement hosted a workshop to explore sustainable financing structures that reflect a recognition of the health and non-health factors that shape the well-being of U.S. communities. The goals of the workshop were to learn from the long-term, sustainable financing strategies used in other sectors, to explore how those approaches could be applied to population health, and to consider structures that work across sectors. This publication summarizes the presentations and discussions from the workshop.

A crucial indictment of widely embraced "alternatives to incarceration" that

exposes how many of these new approaches actually widen the net of punishment and surveillance "But what does it mean—really—to celebrate reforms that convert your home into your prison?" —Michelle Alexander, from the foreword

Electronic monitoring. Locked-down drug treatment centers. House arrest. Mandated psychiatric treatment. Data-driven surveillance. Extended probation. These are some of the key alternatives held up as cost-effective substitutes for jails and prisons. But many of these so-called reforms actually widen the net, weaving in new strands of punishment and control, and bringing new populations, who would not otherwise have been subject to imprisonment, under physical control by the state. As mainstream public opinion has begun to turn against mass incarceration, political figures on both sides of the spectrum are pushing for reform. But—though they're promoted as steps to confront high rates of imprisonment—many of these measures are transforming our homes and communities into prisons instead. In *Prison by Any Other Name*, activist journalists Maya Schenwar and Victoria Law reveal the way the kinder, gentler narrative of reform can obscure agendas of social control and challenge us to question the ways we replicate the status quo when pursuing change. A foreword by Michelle Alexander situates the book in the context of criminal justice reform conversations. Finally, the book offers a bolder vision for truly alternative justice

practices.

Weekly, Slate, Chronicle of Higher Education, Literary Hub, Book Riot, and Zora A tenth-anniversary edition of the iconic bestseller—“one of the most influential books of the past 20 years,” according to the Chronicle of Higher Education—with a new preface by the author “It is in no small part thanks to Alexander’s account that civil rights organizations such as Black Lives Matter have focused so much of their energy on the criminal justice system.” —Adam Shatz, London Review of Books Seldom does a book have the impact of Michelle Alexander’s *The New Jim Crow*. Since it was first published in 2010, it has been cited in judicial decisions and has been adopted in campus-wide and community-wide reads; it helped inspire the creation of the Marshall Project and the new \$100 million Art for Justice Fund; it has been the winner of numerous prizes, including the prestigious NAACP Image Award; and it has spent nearly 250 weeks on the New York Times bestseller list. Most important of all, it has spawned a whole generation of criminal justice reform activists and organizations motivated by Michelle Alexander’s unforgettable argument that “we have not ended racial caste in America; we have merely redesigned it.” As the Birmingham News proclaimed, it is “undoubtedly the most important book published in this century about the U.S.” Now, ten years after it was first published, The New Press is proud to issue a tenth-anniversary edition with a new preface by Michelle Alexander that discusses the impact the book has had and the state of the criminal justice reform movement today.
