balloons were employed to spot enemy positions and direct artillery fire onto them_has developed at an astonishing speed. Over the past century air intelligence has moved from hazardous observation balloons to micro-circuitry, which can send pictures from a video camera mounted on a remotely-controlled vehicle the size of a hummingbird. The Historical Dictionary of Air Intelligence relates the evolving history of the rapidly advancing field of air intelligence. A chronology, an introductory essay, and cross-referenced dictionary entries on the agencies, agents, operations, equipment, tradecraft, and jargon of air intelligence make this reference as essential as it is fascinating.

developing inclusion in education. It focuses on encouraging pre-service teachers to develop strategies to engage students of all backgrounds, needs and abilities in a diverse classroom. It conveys positive dimensions to promoting the implementation of inclusive education policy in practice, while at the same time focusing on those areas that we know are currently providing challenges for many teachers in engaging students in inclusive learning environments. This third edition responds to constant change in schools, the national curriculum implementation, national and international developments and heightened expectations of teachers by the public and employers. It includes some new chapters, notably one examining the needs of students facing challenges to their mental health and wellbeing. In addition, there is greater focus within most chapters on key issues, including early intervention, the use of technology, and assessment practices. There are also some new headings to help the instructors and students focus on classroom practice and facilitate individual and group learning. With extensive learning features that blend theoretical issues and context with practical skills, Diversity, Inclusion and Engagement provides pre-service teachers with the knowledge and understanding to manage classroom challenges and develop inclusive learning environments.
