Most histories of the Spanish Civil War (1936–1939) have examined major leaders or well-established political and social groups to explore class, gender, and ideological struggles. The war in Spain was marked by momentous conflicts between democracy and dictatorship, Communism and fascism, anarchism and authoritarianism, and Catholicism and anticlericalism that still provoke our fascination. In Republic of Egos, Michael Seidman focuses instead on the personal and individual experiences of the common men and women who were actors in a struggle that defined a generation and helped to shape our world. By examining the roles of anonymous individuals, families,

and small groups who fought for their own interests and survival—and not necessarily for an abstract or revolutionary cause—Seidman reveals a powerful but rarely considered pressure on the outcome of history. He shows how price controls and inflation in the Republican zone encouraged peasant hoarding, black marketing, and unrest among urban workers. Soldiers of the Republican Army responded to material shortages by looting, deserting, and fraternizing with the enemy. Seidman's focus on average, seemingly nonpolitical individuals provides a new vision of both the experience and outcome of the war.

The story of the Bosnian Muslims in World War II is an epic frequently alluded to in discussions of the 1990s Balkan conflicts, but almost as frequently misunderstood or falsified. This first comprehensive study of the topic in any language sets the record straight. Based on extensive research in the archives of Bosnia- Herzegovina, Serbia and Croatia, it traces the history of Bosnia and its Muslims from the Nazi German and Fascist Italian occupation of Yugoslavia in 1941, through the years of the Yugoslav civil war, and up to the seizure of power by the Communists and their establishment of a new Yugoslav state. The book explores the reasons for Muslim opposition to the new order established by the Nazis and Fascists in Bosnia in 1941 and the different forms this opposition took. It describes how the Yugoslav Communists were able to harness part of this Muslim opposition to support their own resistance movement and revolutionary bid for power. This Muslim element in the Communists' revolution shaped its form

and outcome, but ultimately had itself to be curbed as the victorious Communists consolidated their dictatorship. In doing so, they set the scene for future struggles over Yugoslavia's Muslim question.

Satellite Empire is an in-depth investigation of the political and social history of the area in southwestern Ukraine under Romanian occupation during World War II. Transnistria was the only occupied Soviet territory administered by a power other than Nazi Germany, a reward for Romanian participation in Operation Barbarossa. Vladimir Solonari's invaluable contribution to World War II history focuses on three main aspects of Romanian rule of Transnistria: with fascinating insights from recently opened archives, Solonari examines the conquest and delimitation of the region, the Romanian administration of the new territory, and how locals responded to the occupation. What did Romania want from the conquest? The first section of the book analyzes Romanian policy aims and its participation in the invasion of the USSR. Solonari then traces how Romanian administrators attempted, in contradictory and inconsistent ways, to make Transnistria "Romanian" and "civilized" while simultaneously using it as a dumping ground for 150,000 Jews and 20,000 Roma deported from a racially cleansed Romania. The author shows that the imperatives of total war eventually prioritized economic exploitation of the region over any other aims the Romanians may have had. In the final section, he uncovers local responses in terms of collaboration and resistance, in particular exploring relationships with the local Christian population, which initially welcomed the occupiers as liberators from Soviet oppression but eventually became hostile to them. Ever increasing hostility towards the occupying regime buoyed the numbers and efficacy of pro-Soviet resistance groups.

In smoky rooms above pubs, bare rooms with battered stools and beer-stained tables, where the stage was little more than a scrap of carpet and sound systems were unheard of, an acoustic revolution took place in Britain in the 1950s and '60s. This was the folk revival, where a generation of musicians, among much drink and raucous cheer, would rediscover the native songs of their own tradition, as well as the folk and blues coming from across the Atlantic by artists such as Leadbelly, Woody Guthrie and Big Bill Broonzy. Singing from the Floor is the story of this remarkable movement, faithfully captured in the voices of those who formed it by JP Bean. We hear from luminaries such as Shirley Collins, Martin

Carthy, Peggy Seeger and Ralph McTell, alongside figures such as Billy Connolly, Jasper Carrott and Mike Harding, who all started their careers on the folk circuit. The book charts the revival's improvised beginnings and its ties to the CND movement, through the heyday of the '60s and '70s, when every university, town and many villages across the country boasted a folk club, to the fallow years of the '80s and '90s. The book finishes on a high note, with the recent resurgence of interest in folk, through such artists as the Lakemans, Sam Lee and Eliza Carthy. It is a joyous, boisterous and hugely entertaining book, and an essential document of our recent history stretching into the past.

Memories of catastrophes--both those which occur naturally and those which are consequences of human actions--loom large in the modern consciousness. The volume opens with an investigation of the concepts of catastrophe and collective memory, and the relationships between them. Arguing that a pervasive catastrophic memory may be as disabling as it is instructive, Gray and Oliver stress the necessity of rendering the phenomenon subject to secular critical inquiry. The value of such an approach is then demonstrated in a series of case studies.

'Magnificent. Narrative history at its vivid and compelling best' Fergal Keane The first major history of the International Brigades: a tale of blood, ideals and tragedy in the fight against fascism. The Spanish Civil War was the first armed battle in the fight against fascism, and a rallying cry for a generation. Over 35,000 volunteers from sixty-one countries around the world came to defend democracy against the troops of Franco, Hitler and Mussolini. Ill-equipped and disorderly, yet fuelled by a shared sense of purpose and potential glory, disparate groups of idealistic young men and women banded together to form a volunteer army of a size and kind unseen since the Crusades, known as the International Brigades. These passionate liberal fighters – from across Europe, China, Africa and the Americas – would join the Republican cause, fighting for over two years on the bloody battlegrounds of Madrid, Jarama and Ebro. Were they heroes or fools? Saints or bloodthirsty adventurers? And what exactly did they achieve? This is a story rendered vivid in the writings of Orwell and Hemingway, the paintings of Picasso and the photographs of Taro and Capa. But here, in this magisterial history, award-winning historian Giles Tremlett tells – for the first time – the story of the Spanish Civil War through the experiences of this remarkable group of people. Drawing on the Brigades' extensive archives in Moscow, Comintern documents and first-hand accounts, Tremlett captures all the human drama of an historic mission to halt fascist expansion in Europe. A fascinating history of resistance, The International Brigades shows just how far ordinary people will go to save democracy against overwhelming odds in a tale of European solidarity that resonates just as strongly today.
