UAE Stock Market Business Laws and Regulations Handbook

This book combines classic and recent studies investigating challenges to Emiratization – full employment of Emirati nationals who make up only about 10% of the total workforce – in the United Arab Emirates (UAE). The book offers a comprehensive overview of the events leading to the country's rapid growth and development, as well as important social and cultural issues arising as the country transitioned from an isolated traditional economy to an open globalized one, and explores the specific challenges of incorporating Emiratis in their own vibrant economy. This topic is of interest to scholars, policymakers, and those considering investing or seeking employment in the UAE since it emerged as a Western-friendly, politically stable, and prospering oil-producing country in a region plagued by political, social, and economic turmoil.

The King James translators drew upon all of their English predecessors and much more besides. The authors offer both a political and literary history of the Bible. Their purpose is to explain how styles of presenting Scriptures in English developed out of political and ecclesiastical circumstances. The result is a refreshing reassessment of the literary and scholarly accomplishment of all the Renaissance Bibles and a clear account of what is different and distinctive in the King James Version. They also linger over the texts of the Bible, comparing significant passages in the various versions. Such close study of the texts is warranted because the English Bible has had a profound effect on English language, literature, politics and ideas; it has left a lasting impression on the language that we speak today. No other language, except perhaps German, can boast that its vernacular translation of the Bible is a literary masterpiece in its own right.

Dubai Starting Business (Incorporating) in....Guide Bringing the rich terrain of Arab American histories to bear on conceptualizations of race in the United States, this groundbreaking volume fills a critical gap in the field of U.S. racial and ethnic studies. The articles collected here highlight emergent discourses on the distinct ways that race matters to the study of Arab American histories and experiences and asks essential questions. What is the relationship between U.S. imperialism in Arab homelands and anti-Arab racism in the United States? In what ways have the axes of nation, religion, class, and gender intersected with Arab American racial formations? What is the significance of whiteness studies to Arab American studies? Transcending multiculturalist discourses that have simply added on the category "Arab-American" to the landscape of U.S. racial and ethnic studies after the attacks of September 11, 2001, this volume locates September 11 as a turning point, rather than as a beginning, in Arab Americans'
