Are you a pharmacy technician, or pharmacy technician student, who wants to learn a few simple methods of solving pharmacy calculations without a bunch of formulas? Would you like to raise your hand in Pharmacy Calculations Class, after the instructor explains a complicated formula, and ask to approach the white board to show the class a much simpler method? Do you want to go out on your externship and teach practicing pharmacy technicians how to preform pharmacy calculations? Do you want to walk into your Pharmacy Calculations Class on the first day knowing that you can ace all the tests before the course begins? If you answered yes to any of these questions, this book is for you. The book's first chapter covers the following auxiliary subjects, which are important to a well-rounded knowledge of pharmacy calculations. · Rounding Numbers · Roman Numerals · The Metric System · Scientific Notation · Significant Figures · Percent Error · The Apothecary/Avoirdupois/Household Systems The second chapter will teach you that all the following types of calculations can be performed with one simple method. If you can convert 5 g to mg using this method, you can solve the most complicated IV flow rate problem. · Unit Conversions · Dosage Calculations · IV Flow Rate Calculations · Percent Calculations · Percent Strength Calculations · Ratio Strength Calculations · Quantity to Dispense Calculations · Milliequivalent Calculations The third chapter covers concentrations and dilutions. While there is not one method of solving all these problems, you will quickly see that they all have common components. Topics covered are: · Preparing a Solution Using Two Different Strength Solutions · Preparing a Solution from a Stock Solution and a Diluent · Calculating the Percent Strength of a Mixture · Powder Volume Calculations · Serial Dilution The book

methods that were used to transform small family businesses such as Ferrari, Louis Vuitton, Cartier, Chanel, Armani, Gucci, and Ralph Lauren into profitable global brands. It also now includes a section on marketing and selling luxury goods online and the impact of social networks and digital developments, cementing its position as the authority on luxury strategy.

First published in 1908, *"Scouting for Boys"* is the seminal work on scouting by British Army officer and founder of the worldwide scouting movement, Robert Baden-Powell. Originally written as a manual for self-instruction, *"Scouting for Boys"* details many important scouting skills including scoutcraft, tracking, woodcraft, camping, and first-aid. Baden-Powell's work is a rework of his earlier *"Aids to Scouting"*, published in 1899, and borrows many ideas from Ernest Thompson Seton's *"The Birch Bark Roll of the Woodcraft Indians"*, published in 1906. *"Scouting for Boys"* includes numerous tales that can be told around the campfire, as well as many of Baden-Powell's personal anecdotes, and opinions on proper moral character of boy scouts. While some of the information in this work may seem outdated and some of the moralizing may seem antiquated to modern readers, *"Scouting for Boys"* remains an important

historical work in the scouting movement. Having sold millions of copies since its first publication, the impact Baden-Powell's "Scouting for Boys" as well as his personal advocacy for the scouting movement cannot be overstated. This edition is printed on premium acid-free paper.

It's no secret that certain social groups have predominated India's business and trading history, with business traditionally being the preserve of particular `Bania' communities. However, the past four or so decades have seen a widening of the social base of Indian capital, such that the social profile of Indian business has expanded beyond recognition, and entrepreneurship and commerce in India are no longer the exclusive bastion of the old mercantile castes. In this meticulously researched book ? acclaimed for being the first social history to document and understand India's new entrepreneurial groups ? Harish Damodaran looks to answer who the new `wealth creators' are, as he traces the transitional entry of India's middle and lower peasant castes into the business world. Combining analytical rigour with journalistic flair, India's New Capitalists is an essential read for anyone seeking to understand the culture and evolution of business in contemporary South Asia.

Mechanical Vibrations: Theory and Applications takes an applications-based approach at teaching students to apply previously learned engineering principles while laying a foundation for engineering design. This text provides a brief review of the principles of dynamics so that terminology and notation are consistent and applies these principles to derive mathematical models of dynamic mechanical systems. The methods of application of these principles are consistent with popular Dynamics texts. Numerous pedagogical features have been included in the text in order to aid the student with comprehension and retention. These include the development of three benchmark problems which are revisited in each chapter, creating a coherent chain linking all chapters in the book. Also included are learning outcomes, summaries of key concepts including important equations and formulae, fully solved examples with an emphasis on real world examples, as well as an extensive exercise set including objective-type questions. The text presents an overview of the models developed to explain the stability, dynamics and evolution of the stars, and great care is taken to detail the various stages in a star's life. The authors have succeeded in producing a unique text based on their own pioneering work in stellar modeling. Since its publication, this textbook has come to be considered a classic by both readers and teachers in astrophysics. This study edition is intended for students in astronomy and physics alike.

This Open Access book summarizes the key findings from the second cycle of IEA's International Computer and Information Literacy Study (ICILS), conducted in 2018. ICILS seeks to establish how well schools around the globe are responding to the need to provide young people with the necessary digital participatory competencies. Effective use of information and communication technologies (ICT) is an imperative for successful participation in an increasingly digital world. ICILS 2018 explores international differences in students' computer and information literacy (CIL), namely their ability to use computers to investigate, create, and communicate at home, at school, in the workplace, and in the community. Participating countries also had an option to administer an assessment of students'

computational thinking (CT), focused on their ability to recognize aspects of real-world problems appropriate for computational formulation, and to evaluate and develop algorithmic solutions to those problems, so that the solutions could be operationalized with a computer. The data collected by ICILS 2018 show how digital competencies can be assessed using instruments representing authentic contexts for ICT use, and how students' CIL and CT skills relate to school learning experiences, out-of-school contexts, and student characteristics. Those data also show how learning technologies are used in classrooms around the world. Background questionnaires asked students about their use of ICT, and collected information from teachers, schools, and national education systems about the resourcing and teaching of CIL (and CT) within their countries. The results of ICILS 2018 will enable policymakers and education systems to develop a better understanding of the contexts and outcomes of CIL (and CT) education programs.

Building once more on the core works of *The Rational Male* by Rollo Tomassi, *Positive Masculinity* is the newest supplemental reading in the series designed to give men, not a prescription, but actionable information to build better lives for themselves based on realistic and objective intersexual dynamics between men and women. Rational and pragmatic, the book outlines four key themes: Red Pill Parenting, The Feminine Nature, Social Imperatives and Positive Masculinity. Free of the pop-psychology pablum about parenting today, Red Pill Parenting is primarily aimed at the fathers (and fathers-to-be) who wanted more in depth information about raising their sons and daughters in a Red Pill aware context. While not an instruction manual, it will give men some insight into how to develop a parenting style based on Red Pill principles as well as what they can expect their kids to encounter from a feminine-primary social order determined to 'educate' them. The Feminine Nature is a collection of essays, revised and curated, that specifically address the most predictable aspects of the female psyche. It outlines and explores both the evolutionary and socialized reasons for women's most common behaviors and their motives, and how men can build this awareness into a more efficient way of interacting with them. Social Imperatives details how the female psyche extrapolates into western (and westernizing) cultural narratives, social dictates and legal and political legislation. This is the Feminine Imperative writ large and this section explores how feminism, women's sexual strategy and primary life goals have

molded our society into what we take for granted today. Also detailed is the 'women's empowerment' narrative, and the rise of a blank-slate egalitarian equalism masking as a form of female supremacism that has fundamentally altered western cultures. The last section, Positive Masculinity, is comprised of essays, reformed and expanded upon, that will give men a better idea of how to define masculinity for themselves from a conventional and rational perspective. In an era when popular culture seeks to dismiss, ridicule, shame and obscure masculinity, this section and this book is intended to raise men's awareness of how fluid redefinitions of masculinity have been deliberately used to disempower and feminize men by a feminine-primary social order. This book is the third in of series complements to The Rational Male, the fifteen-year core writing of author/blogger Rollo Tomassi from therationalmale.com. Rollo Tomassi is one of the most prominent voices in the globally growing, male-focused online consortium known as the "Manosphere" as well as one of the 'Godfathers' of intersexual Red Pill awareness.

In the words of economist and scholar Arnold Kling, Martin Gurri saw it coming. Technology has categorically reversed the information balance of power between the public and the elites who manage the great hierarchical institutions of the industrial age government, political parties, the media. The Revolt of the Public tells the story of how insurgencies, enabled by digital devices and a vast information sphere, have mobilized millions of ordinary people around the world. Originally published in 2014, this updated edition of The Revolt of the Public includes an extensive analysis of Donald Trump's improbable rise to the presidency and the electoral triumphs of Brexit and concludes with a speculative look forward, pondering whether the current elite class can bring about a reformation of the democratic process, and whether new organizing principles, adapted to a digital world, can arise out of the present political turbulence. "All over the world, elite institutions from governments to media to academia are losing their authority and

monopoly control of information to dynamic amateurs and the broader public. This book, until now only in samizdat (and Kindle) form, has been my #1 handout for the last several years to anyone seeking to understand this unfolding shift in power from hierarchies to networks in the age of the Internet." --Marc Andreessen, co-founder, Netscape and Andreessen Horowitz "We are in an open war between publics with passionate and untutored interests and elites who believe they have the right to guide those publics. Gurri asks the essential question: can liberal representative democracy survive the rise of the publics? --Roger Berkowitz, Founder and Academic Director of the Hannah Arendt Center, Professor of Politics and Human Rights at Bard College This book constitutes the refereed proceedings of the Fourth International Workshop on Learning Technology for Education in Cloud, LTEC 2015, held in Maribor, Slovenia, in August 2015. The 24 revised full papers presented were carefully reviewed and selected from 46 submissions. The papers cover various aspects of technologies for learning, such as MOOC challenges; cooperative learning; learning engineering; learning tools and environments; STEM.
