Building a gaming PC is arguably the best technological investment you can make. A quality gaming rig lasts longer than a smartphone, boasts more power than a gaming console, and is infinitely more versatile than even the most powerful streaming box. Whether you're typing up documents, editing video or cranking up the settings on the latest and greatest games, a gaming PC is the best tool for the job. With regular maintenance, one of these systems could last five years - with regular upgrades, maybe ten. Still, building a PC can be a daunting process, particularly for newcomers. There are plenty of good guides out there, particularly from our sister sites like PC Gamer and Tom's Hardware. However both of these stories focus a lot on mechanics: what components you need, and how to fit them all into a motherboard. Before I built my first PC, even these guides would have been a little daunting. Instead to split the process into two parts and take a more experiential tack. Before you build a PC, you need to decide why you want to build it. What do you want that you can't get from a prebuilt machine? Which parts will facilitate that goal? And how can you make sense of the hundreds of different tech specs between the half-a-dozen different pieces you'll need? With that in mind, this book focuses on picking parts. In a broad sense, I'd like to discuss my thought process behind each

\$ MONEY \$ It is understandable that we all need money for survival purposes. This is fine and dandy; is acceptable in society but to purposely defraud other people, to get possession of money, is unacceptable no matter of any circumstance. Politicians seem to hoard onto this conception that money is their 'GOD'. The more they possess, the more they have power to control. Politicians, drug cartels, gangs and let us not forget religion are aware of this fact. The richer you are in society, the better people will follow you, supposedly. The 'Elite' in all societies of the world are equally guilty of this crime, called murder on the unsuspecting citizens by depriving these citizens of certain 'FREEDOMS' or plainly swindling them out of their hard earned money, not included are the lazy, incompetent people, who devour the "Welfare System" dry, not even trying to better themselves. Murder is hidden by the non-compliance of doing the right thing as it happens, for prevention as well as protection. This is where this book illustrates certain areas in our American past, which contribute to the beginning of corruption. Corruption is a way of dishonest living in order to remain on top or even to gain the top position. Political separation of parties are a way of distracting the public's focus of what all politicians are involved in, un-constitutional, biased, prejudice and let us begin the "Olympic Blame Game" of each party is guilty but not me, when in reality all are involved in a 'False Flag' cover-up of camouflaged deception, to gain more wealth even if it includes a mass murder. You will be amazed about certain people involved in this book, which seemed honest but in reality are very wicked indeed. This book is the sequel to "AMERICA, The Sleeping Giants MUST Awake" which explains into depth 'Barack Hussein Obama, the creator of 'Obamanism' and of his cronies at large.
