Your students may recognize words like determine, analyze, and distinguish, but do they understand these words well enough to quickly and completely answer a standardized test question? For example, can they respond to a question that says "determine the point of view of John Adams in his Letter on Thomas Jefferson" and analyze how he distinguishes his position from an alternative approach articulated by Thomas Jefferson"? Students from kindergarten to 12th grade can learn to compare and contrast, to describe and explain, if they are taught these words explicitly. Marilee Sprenger has curated a list of the critical words students must know to be successful with the Common Core State Standards and any other standardized assessment they encounter. Fun strategies such as jingles, movements, and graphic organizers will engage students and make learning these critical words enjoyable and effective. Learning the critical vocabulary will help your students with testing and college and career readiness, and will equip them with confidence in reading, writing, and speaking. Marilee Sprenger is also the author of *How to Teach So Students Remember*, *Learning and Memory*, and *Brain-Based Teaching in the Digital Age*.

Here's how it works: Take the word DEFENESTRATE, which means to throw out of a window. This word is too limited in use to be in the book, but we want to demonstrate the method by having you actually learn a new word. The next time you encounter DEFENESTRATE, think DEFEND THE STREET. That's called the "key." Now, to "link" the key to the definition, imagine your town invaded by enemy troops, and citizens defending the streets by throwing objects out of the windows at them. So, in the format of Build Your Vocabulary Skills!, we have the following: DEFENESTRATE (duh FEN es trate) to throw out of a window KEY: DEFEND THE STREET LINK SENTENCE: The townfolk defended their streets against the inemy invaders by throwing things out ot the windows at them. Knowledge of word meanings is critical to success in reading. A reader cannot fully understand a text in which the meaning to a significant number of words is

unknown. Vocabulary knowledge has long been correlated with proficiency in reading. Yet, national surveys of student vocabulary knowledge have demonstrated that student growth in vocabulary has been stagnant at best. This volume offers new insights into vocabulary knowledge and vocabulary teaching. Articles range from a presentation of theories of vocabulary that guide instruction to innovative methods and approaches for teaching vocabulary. Special emphasis is placed on teaching academic and disciplinary vocabulary that is critical to success in content area learning. Our hope for this volume is that it may spark a renewed interest in research into vocabulary and vocabulary instruction and move toward making vocabulary instruction an even more integral part of all literacy and disciplinary instruction.

The New York Times best-selling book exploring the counterproductive reactions white people have when their assumptions about race are challenged, and how these reactions maintain racial inequality. In this "vital, necessary, and beautiful book" (Michael Eric Dyson), antiracist educator Robin DiAngelo deftly illuminates the phenomenon of white fragility and "allows us to understand racism as a practice not restricted to 'bad people' (Claudia Rankine). Referring to the defensive moves that white people make when challenged racially, white fragility is characterized by emotions such as anger, fear, and guilt, and by behaviors including argumentation and silence. These behaviors, in turn, function to reinstate white racial equilibrium and prevent any meaningful cross-racial dialogue. In this in-depth exploration, DiAngelo examines how white fragility develops, how it protects racial inequality, and what we can do to engage more constructively.
