The Kennel Club's Breed Standards form the basis for judging dogs at all licensed breed shows. This fully revised edition of the authoritative guide outlines the descriptive 'standards' for each of the 201 pure breeds of dog now recognised by the Kennel Club. The book has been completely updated by a panel of experts to incorporate the latest standards for all breeds in each of the principal categories - Hound, Gundog, Terrier, Utility, Working, Pastoral and Toy. As well as providing a beautiful colour photograph of each dog, each entry contains a history of the breed, including its origins and function, as well as a full description outlining its essential features. There is also useful advice on the nature of each breed and practical information to help guide anyone who is buying a dog, as well as a glossary of canine terms. This book is essential reading for anyone who owns, or hopes to own, a pedigree dog and is indispensable for breeders, judges and those professionally involved with dogs.

A single promise can change a life forever. We all make promises constantly. "Yes, I'll be there." "Sure, no problem!" But do we really mean what we are saying? What is the impact of a broken promise? And what happens to a life when a promise is honored? Because I said I would is the international social movement at the forefront of shifting how the world views commitment and accountability. With over 10.3 million Promise Cards distributed, this cause has played a unique role in changing lives around the world.

Heartwarming, humorous, inspirational, and tragic—these stories will challenge readers to look deep within themselves

range, or in the trial pen. • Recognize more than 60 different herding breeds and much, much more. From the author of *The World of Fighting Dogs* and *Pit Bulls and Tenacious Guard Dogs* comes this third and most impressive book to date, *Gladiator Dogs*. Bringing to life 13 breeds originally used as fighting dogs, Dr. Carl Semencic illustrates the history, characteristics and abilities of the world's toughest canines, and shares hundreds of great color photographs of top dogs sent by owners around the globe. The author does not fight dogs and does not condone dogfighting, but he is fascinated with the qualities and instincts of these fearless gladiator breeds. *Gladiator Dogs* is a valuable book that represents years of experience and research on these remarkable historical dogs. In addition to the author's favorite breed, the American Pit Bull Terrier, Dr. Semencic discusses other related breeds, such as the Staffordshire Bull Terrier, Bull Terrier and American Staffordshire Terrier, covering the differences and similarities between these bully cousins. A respected rare-breed authority and an accomplished world traveler, Dr. Semencic shares his firsthand experience with these dogs from his trips to the Canary Islands, South Africa, Europe, and more. *Gladiator Dogs* profiles many breeds that the author has introduced, mentored and promoted, including the American Bulldog, Canary Dog, South African Boerboel and Korean Jindo.

Today's dog food industry is producing hundreds of dog food formulas for the market. This industry has also tested many different breeds of dogs for their nutritional requirements. Results of this testing were published in 1985, showing such a wide range of nutritional requirements that we now know one food cannot be correct for all dogs. Yet, to date, no one from any of the dog food companies has come forward to tell us which breeds might react adversely to their food. This has left most dog food buyers in the position of having to experiment at home in order to find the best food for their dog. Too often this type of experimenting has had disastrous results. But now the dog food buyer has a tool...this book can help all dog owners match their dog to the right food.

Recommendations in this book are made by the nutrient sources found in most commercial dog food formulas, and not by brand name or with any bias or brand loyalty.

Now a Netflix original series starring Austin Abrams and Midori Francis! A whirlwind holiday season romance from the New York Times bestselling authors of Nick & Norah's Infinite Playlist. "I've left some clues for you. If you want them, turn the page. If you don't, put the book back on the shelf, please." 16-year-old Lily has left a red notebook full of challenges on her favorite bookstore shelf, waiting for just the right guy to come along and accept its dares. Dash, in a bad mood during the holidays,

happens to be the first guy to pick up the notebook and rise to its challenges. What follows is a whirlwind romance as Dash and Lily trade dares, dreams, and desires in the notebook they pass back and forth at locations all across New York City. But can their in-person selves possibly connect as well as their notebook versions, or will their scavenger hunt end in a comic mismatch of disastrous proportions? Co-written by Rachel Cohn (GINGERBREAD) and David Levithan, co-author of WILL GRAYSON, WILL GRAYSON with John Green (THE FAULT IN OUR STARS), DASH & LILY'S BOOK OF DARES is a love story that will have readers scouring bookstore shelves, looking and longing for a love (and a red notebook) of their own.

Gundogs Unveiled is a unique book covering a wide range of topics about gundogs, from their historical beginnings to their role in modern society. Thirty recognized Gundog breeds are described and illustrated with almost 300 carefully selected photographs and illustrations. Breeds are compared in easily referenced tables. Gundog Terminology is explained in simple terms, illustrated by over 20 original purpose-drawn graphics. General topics such as care and management of dogs in our modern society complement the breed information. This book is written by Jane Harvey, a well-respected dog expert, author and judge. Over the last ten years, her widely acclaimed website,

Learn to communicate with your dog—using their language “Good reading for dog lovers and an immensely useful manual for dog owners.”—The Washington Post An Applied Animal Behaviorist and dog trainer with more than twenty years’ experience, Dr. Patricia McConnell reveals a revolutionary new perspective on our relationship with dogs—sharing insights on how “man’s best friend” might interpret our behavior, as well as essential advice on how to interact with our four-legged friends in ways that bring out the best in them. After all, humans and dogs are two entirely different species, each shaped by its individual evolutionary heritage. Quite simply, humans are primates and dogs are canids (as are

wolves, coyotes, and foxes). Since we each speak a different native tongue, a lot gets lost in the translation. This marvelous guide demonstrates how even the slightest changes in our voices and in the ways we stand can help dogs understand what we want. Inside you will discover:

- How you can get your dog to come when called by acting less like a primate and more like a dog
- Why the advice to “get dominance” over your dog can cause problems
- Why “rough and tumble primate play” can lead to trouble—and how to play with your dog in ways that are fun and keep him out of mischief
- How dogs and humans share personality types—and why most dogs want to live with benevolent leaders rather than “alpha wanna-bes!”

Fascinating, insightful, and compelling, *The Other End of the Leash* is a book that strives to help you connect with your dog in a completely new way—so as to enrich that most rewarding of relationships.

A guide to using the power of S-PLUS to perform statistical analyses, providing both an introduction to the program and a course in modern statistical methods. Readers are assumed to have a basic grounding in statistics, thus the book is intended for would-be users, as well as students and researchers using statistics. Throughout, the emphasis is on presenting practical problems and full analyses of real data sets, with many of the methods discussed being modern approaches to topics such as linear and non-linear regression models, robust and smooth regression methods, survival analysis, multivariate analysis, tree-based methods, time series, spatial statistics, and classification. This second edition is intended for users of S-PLUS 3.3, or later, and covers both Windows and UNIX. It treats the recent developments in graphics and new statistical functionality, including bootstrapping, mixed effects linear and non-linear models, factor analysis, and regression with autocorrelated errors. The authors have written several software libraries which

The Law Library presents the complete text of the Seafood Import Monitoring Program (US National Oceanic and Atmospheric Administration Regulation) (NOAA) (2018 Edition). Updated as of May 29, 2018 Pursuant to the Magnuson-Stevens Fishery Conservation and Management Act (MSA), this final rule establishes permitting, reporting and recordkeeping procedures relating to the importation of certain fish and fish products, identified as being at particular risk of illegal, unreported, and unregulated (IUU) fishing or seafood fraud, in order to implement the MSA's prohibition on the import and trade, in interstate or foreign commerce, of fish taken, possessed, transported or sold in violation of any foreign law or regulation or in contravention of a treaty or a binding conservation measure of a regional fishery organization to which the United States is a party. Collection of catch and landing

documentation for certain fish and fish products will be accomplished through the government-wide International Trade Data System (ITDS) by electronic submission of data through the Automated Commercial Environment (ACE) maintained by the Department of Homeland Security, Customs and Border Protection (CBP). The information will be collected through the ITDS electronic single window consistent with the Safety and Accountability for Every (SAFE) Port Act of 2006 and other applicable statutes. Specifically, this rule revises an existing NMFS requirement for the importer of record to file electronically through ACE data prescribed under certain existing NMFS programs (and to retain records supporting such filings) to also cover the data required to be reported under this rule. This rule requires data to be reported on the harvest of fish and fish products. In addition, this rule requires retention of additional supply chain data by the importer of record and extends an existing NMFS requirement to obtain an annually renewable International Fisheries Trade Permit (IFTP) to the fish and fish products regulated under this rule. The information to be reported and retained, as applicable, under this rule will help authorities verify that the fish or fish products were lawfully acquired by providing information to trace each import shipment back to the initial harvest event(s). The rule will also decrease the incidence of seafood fraud by requiring the reporting of this information to the U.S. Government at import and requiring retention of documentation so that the information reported (e.g., regarding species and harvest location) can be verified. THE AIREDALE TERRIER BY HOLLAND BUCKLEY A VINTAGE DOG BOOKS CLASSIC REPRINT. Originally published in 1905 with later editions, this extremely rare early work on the Airedale Terrier is both expensive and hard to find in any edition. VINTAGE DOG BOOKS have republished it, using the original text and photographs, as part of their CLASSIC BREED BOOKS series. The author was a highly respected breeder of the day who was devoted to this, the largest breed of the Terrier family. The book's one hundred and four pages cover all aspects of the Airedale Terrier in its eight Comprehensive Chapters . Commencing with a detailed look at the origins and history of the breed, it moves on to discuss buying, breeding, feeding and showing amongst many other topics. The author rounds off with some interesting chapters on the "Back Blood of the Breed" and "Some American Fanciers". There is also a "Standard description of the correct appearance and scale of points" and a number of excellent photos of famous dogs of the day. This is a fascinating read for any Airedale Terrier enthusiast or historian of the breed but also contains much information that is still useful and practical today. Many of the earliest dog breed books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. VINTAGE DOG BOOKS are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

AN EXTRAORDINARILY RESONANT AND PROPHETIC COLLECTION OF SPECULATIVE SHORT FICTION FOR OUR TECH-SAVVY ERA BY DEBUT AUTHOR ALEXANDER WEINSTEIN *Children of the New World* introduces readers to a near-future world of social media implants, memory manufacturers, dangerously immersive virtual reality games, and alarmingly intuitive robots. Many of these characters live in a utopian future of instant connection and technological gratification that belies an unbridgeable human distance, while others inhabit a post-collapse landscape made primitive by disaster, which they must work to rebuild as we once did millennia ago. In “The Cartographers,” the main character works for a company that creates and sells virtual memories, while struggling to maintain a real-world relationship sabotaged by an addiction to his own creations. In “Saying Goodbye to Yang,” the robotic brother of an adopted Chinese child malfunctions, and only in his absence does the family realize how real a son he has become. *Children of the New World* grapples with our unease in this modern world and how our ever-growing dependence on new technologies has changed the shape of our society. Alexander Weinstein is a visionary new voice in speculative fiction for all of us who are fascinated by and terrified of what we might find on the horizon. Provides information on the different breeds of dog and their characteristics, and advice on dog selection and care
