Making, keeping, and enjoying money isn't just about investments, salaries, inheritances, or dividends, according to Deborah Price. It's also about the games people play around money and their character type in relation to it. In *Money Magic*, Price shows how to transform your relationship with money to obtain the wealth you desire. The book is structured around eight "types": the Innocent (the ostrich approach); the Victim (blaming circumstances); the Warrior (conquering money); the Martyr (always rescuing someone); the Fool (gambler looking for a windfall); the Creator/Artist (regarding money as evil); the Tyrant (controlling through money); and the Magician (benefitting spiritually and financially from money). The Magician is the book's ideal, and Price offers exercises to help readers attain it. Describes eight money types, and offers quizzes to determine your type. Shows readers how to stop making fear-based money choices.

In writing this textbook, Mankiw has tried to put himself in the position of someone seeing economics for the first time. The author's

conversational writing style is superb for presenting the politics and science of economic theories to tomorrow's decision-makers. Because Mankiw wrote it for the students, the book stands out among all other principle texts by intriguing students to apply an economic way of thinking in their daily lives. Receiving such praise as "perhaps the best ever" textbook in economic principles, it's no wonder Mankiw's prize project has quickly become one of the most successful books ever to be published in the college marketplace.

If you've ever tried to budget but found it just doesn't work, you need to read this book. When it comes to saving and spending money, we're not all the same. When it comes to other areas of your life, such as food and exercise, you've no doubt embraced a multi-faceted, often highly personalised approach and you recognise that's important. Why should it be any different when it comes to your finances? That's why understanding your Money Story and discovering your Money Type is the key to financial success.

What Others are Saying About God and Money "This is one of the most thoughtful and well researched books on giving that I have had the pleasure of reading. The frameworks presented in the book can be used by people at all stages of experiencing the joy of generosity." —Waters Davis, President of National Christian Foundation Houston. "With uncommon transparency, John and Greg provide a Gospel-centered and practical perspective on wealth. Through a leveling critique of comfortable

Christianity, they challenge us to wholeheartedly pursue the joy of generosity. Read this book and you will be inspired, convicted and thinking differently about using what God has given you for Kingdom impact." —Peter Greer, President & CEO of HOPE International and coauthor of Mission Drift "In God and Money, Baumer and Cortines challenge Christian readers to consider afresh what generosity looks like in light of the Scripture's radical teaching and the day of affluence in which we live. Whether or not you agree with all their conclusions or personal practices, you will be challenged and inspired." —Robert L. Plummer, Ph.D., Professor of New Testament Interpretation, The Southern Baptist Theological Seminary "I greatly enjoyed reading God and Money! God used the framework Greg and John described to challenge my perspective and practice of generosity. I realized in reading their book that my personal bias is more saver and spender than servant. What I truly desire to be is a fully surrendered servant of Jesus. This book gave me practical frameworks to move in that direction." —Todd Harper, President, Generous Giving "The mission of Harvard Business School is "to educate leaders who make a difference in the world," and in John and Greg that mission has been fulfilled abundantly. It has been my privilege to be their teacher, their colleague and now their friend; and I wish them Godspeed as they take the transformative message found in God and Money out to their community and to the world beyond. I have learned to expect great things from them, and they have yet to disappoint." —Derek van Bever, Senior Lecturer in Business Administration; Director, Forum for Growth and Innovation, Harvard Business School Preview God and Money Table of Contents Part I: Foundations Chapter 1: Wealth and Giving in the Bible Chapter 2: Seven Core Principles for Biblical Wealth and Giving Chapter 3: Motivations for Giving Chapter 4: Trends and Movements in Generosity Part II: Frameworks Chapter 5: The "Three S's Framework:" Spender, Saver, or Servant? In this story based on a case from Project Heifer, a young girl's dream of attending school in her small Ugandan village is fulfilled after her family is given an income-producing goat.

The first illustrated guide that makes finance fun and accessible, *Napkin Finance* can help even the most numbers-phobic reader learn about complex financial topics without dying of boredom. Surveys have found that two thirds of Americans can't pass a basic financial literacy test, and nine in ten believe personal finance should become a required high school course. Tina Hay understands the confusion. While attending Harvard Business School, she struggled to keep up with classmates—many of whom came from the banking world—when it came to understanding jargon and numbers-heavy concepts. Tina developed a visual learning strategy using sketches and infographics that helped her succeed in her studies and master even the most complex financial topics. Since then, Tina founded *Napkin Finance*, a thriving company built on the concept of taking seemingly overwhelming topics—such as budgeting, investments, and retirement accounts—and turning them into simple, skimmable explanations. Now, she's synthesized the most important content into this personal finance handbook. *Napkin Finance* includes dozens of individual learning modules, on topics ranging from credit scores to paying off student loans to economics and blockchain. A handy crash course in personal finance, *Napkin Finance* is the groundbreaking guide everyone needs to help them manage their money and feel more secure.

Revised edition of author's Personal financial literacy, copyrighted 2010.

How do we equip the next generation with money management skills that they can carry forth into their adult lives? One of the most important lessons that you can teach your kids is how to handle their money. Unfortunately, for most parents, giving their kids a sound financial education is an afterthought at best. Frustrated by the lack of resources that apply the concept of finance to real life situations for his own children to learn from, author Walter Andal was inspired to create an informative and entertaining book to help children get on the right path to making smart personal financial decisions. In *Finance 101 for Kids*, children and parents will explore: How money started How to earn and make money Saving and investing What credit is and the dangers of mishandling credit What the stock market is Economic forces that can affect personal finance What currencies and foreign exchanges are The importance of giving back to the community And much, much more! Business acumen has emerged as a critical competency for communicators. But if you're a public relations, advertising or communication professional that didn't go to business school, how can you make sure you have the abilities and skills to evolve along with your role? *Business Acumen for Strategic Communicators* is the book for you.

*Applied Mathematics for Personal Finance* provides a general introduction to the ways that mathematics can be applied to personal financial decision-making. This book is suitable for college students with no previous background in economics or finance; only familiarity with high school algebra is assumed. This book demonstrates how you can utilize math skills you already know in application areas that may be unfamiliar; it also introduces some new math skills that you can apply to familiar problems. The book emphasizes the development and application of the economic life-cycle model as the framework for evaluating all of your personal financial decisions. Economists, including six Nobel Laureates, have spent close to a century developing the concept of life-cycle consumption smoothing. "Smoothing" refers to the need to spread your economic resources over your lifetime, taking into account that your future is highly uncertain.

In *The Index Card*, Helaine Olen and Harold Pollack draw on years of experience researching and reporting on financial lives to present an accessible, one-stop guide to taking back your financial future. Beyond outlining rules for financial success, the authors also explain why so few people follow them. The answers to healthy finance, it turns out, are simple enough to fit on an index card. Armed with *The Index Card*, readers will gain the tools, knowledge and confidence to make the right decisions regarding their money.
